SCOPE OF SERVICES

Project Description

The City of San Leandro proposes to replace the San Rafael Lift Station force-main and replace/upgrade two force-main valve covers located on Wicks Boulevard.

The San Rafael Street Lift Station was constructed in circa 1947 and provides sanitary sewer service to approximately 100 properties located between San Rafael Street and Grand Avenue. The lift station's force-main extends 700 feet to its discharge point in Sybil Avenue. The force main is of cast iron construction and is heavily corroded. It has reached its useful life and is need of replacement.

Wicks Boulevard Lift Station and Force Main were replaced in 2009. The force main passes through a series of valves located in vault structures beneath Wicks Boulevard roadway. The covers to the vaults, subject to traffic loading including heavy trucks have become loose and rattle when driven over. The existing covers allow for easy opening features to access to the valves below. However, access to the valves is required only infrequently, therefore, less easily accessible but more robust replacement covers are desired.
