

NIBRS Implementation October 20, 2025

National Incident Based Reporting System

OUR MISSION

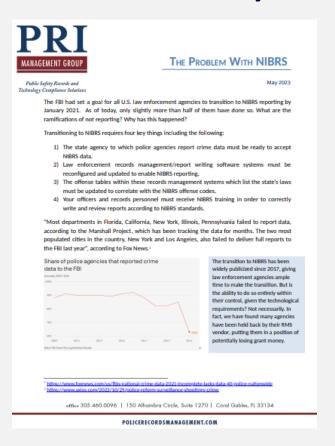

We are committed to providing professional police services and safety to our community in a manner in which we, ourselves expect.

Background

- Historically, law enforcement agencies reported their monthly crime statistics to CA DOJ according to the Uniform Crime Reporting Program (UCR). This data is reported to the FBI.
- UCR provided limited information about crime.
- In 2021, the FBI announced it would be sunsetting the UCR. Law enforcement agencies were required to transition to the National Incident Based Reporting System (NIBRS).
- The police department has made this transition and engaged with a firm, PRI, to assist with training personnel in NIBRS.

Why is this change necessary?

- The FBI is sunsetting the UCR Program and is requiring all agencies to transition to NIBRS.
- However, many agencies are experiencing delays due to issues with their vendor.
- NIBRS provides improved data on crime and criminality.
- Better data that is accurate and meaningful will help us understand how best to target crime.
- This data will give the public a better overall measure of the health and safety of the community.

NIBRS Provides More Detailed Crime Data

NIBRS vs. UCR

- The UCR Program counted crime according to a hierarchy rule- only the most serious offense in an incident was counted.
- NIBRS does not have the hierarchy rule. Each offense in a criminal incident is counted, with limited exceptions.
- NIBRS data provides much more accurate data about crime.
- NIBRS provides a national standard for crime reporting and coding.

Comparing Data

Comparing Data Year-to-Year

• Due to the change in counting methodology under NIBRS, it will not be possible to compare last year's UCR data to this year's NIBRS data.

How will participating in NIBRS affect our community?

- NIBRS provides a national standard for crime reporting.
- The editing and validation checks built into the NIBRS reporting standard provide more accurate incident-based data.
- The additional data collected through NIBRS also provides the context that is needed to understand crime problems better.
- NIBRS data reveals crimes based on the attributes of the criminal incident as a whole, not just on the limited number of crime types captured by the UCR Program.
- It is a common misconception the data will suggest crime is increasing when you switch to NIBRS.

Potential

- When used to its full potential, NIBRS identifies, with precision, when and where crime takes place, what form it takes, and the characteristics of its victims and perpetrators.
- With such information, the San Leandro Police Department can better define the resources it needs to fight crime, as well as use those resources in the most efficient and effective manner.

Inter-Agency Cooperation

- NIBRS provides more common links among agencies.
- As more LEAs use NIBRS, it will allow the identification of common crime problems or trends among similar jurisdictions.
- Agencies can then work together to develop possible solutions or proactive strategies for addressing the issues.
