## Statement of Work

The City of San Leandro Community Development department is looking to redesign the cubicle area for staff at City Hall. Work will include thirty-one locations where two network connections would run from the second floor telcom room at City Hall to the first floor Community Development space. Cable will be run through the drop ceiling and through existing wall locations into the cubicles, to the desk spaces. One additional cable will be added for expansion of the wireless access point(s) for the department. Existing cabling will be removed from Community Development to the telecom room.
