4-1700 Specific Purposes

In addition to the general purposes listed in Article 1, the specific purposes of the off-street parking and loading regulations are to:

- A. Ensure that off-street parking and loading facilities are provided for new land uses and for major alterations and enlargements of existing uses (except single-family and two-family uses) in proportion to the need for such facilities created by each use.
- B. Ensure that off-street parking and loading facilities are designed in a manner that will ensure efficiency, protect the public safety, and, where appropriate, insulate surrounding land uses from adverse impacts. (Ord. 2001-015 § 1)

- G. Life of Facility. Facilities for off-site parking shall be restricted to that use by a recorded deed, easement, lease, or agreement acceptable to the City Attorney and for a period of time consistent with the use permit requiring the parking, provided that the Zoning Enforcement Official may lift the restriction upon finding that substitute parking facilities meeting the requirements of this Code are provided. No use shall be continued if the required parking is removed unless substitute-parking facilities are provided to the satisfaction of the Zoning Enforcement Official.
- H. Common Loading Facilities. The off-street loading facilities requirements of this Article may be satisfied by the permanent allocation of the prescribed number of berths for each use in a common truck loading facility provided that the total number of berths shall not be less than the sum of the individual requirements. As a requirement of approval, an attested copy of a contract between the parties concerned setting forth an agreement to joint use of a common loading facility shall be filed with the application for a zoning permit. The City may record the contract.
- I. Computation of Spaces Required. If after calculating the number of required off-street parking spaces, a quotient is obtained containing a fraction of one-half (0.5) or more, an additional space shall be required; if such fraction is less than one-half, it may be disregarded.
- J. Other Parking Specifications. All parking specifications not listed in this Article are found in specifications developed and maintained by the City Engineer. A copy of the parking specifications shall be available for public review during normal working hours at the Development Services Department counter.
- K. TOD Strategy Parking Requirements. New residential uses adjacent to the BART station (~~south of Davis Street, west of Carpentier Street, north of Thornton Street~~) shall be provided at a ratio of 1.0 space per dwelling unit. An allowance of unbundled flex parking of 0.25 to 0.50 parking space per unit may be provided above 1.0 space per unit, subject to approval of a Site Plan Review under Article 25. (Ord. 2014-011 § 2; Ord. 2011-003 § 1; Ord. 2008-014 § 1; Ord. 2007-020 § 2; Ord. 2001-015 § 1)

4-1704 Off-Street Parking and Loading Spaces Required

- A. Off-street parking and loading spaces shall be provided in accord with the following list. For off-street loading, references are to Table A, which sets space requirements and standards for different groups of use classifications and sizes of buildings. References to spaces per square foot are to be computed on the basis of gross floor area, unless otherwise specified, and shall include allocations of shared restroom, halls, and lobby area, and mechanical equipment or maintenance areas, but shall exclude area for vertical circulation, stairs, or elevators.
- B. Where the use is undetermined, or not specified herein, the Zoning Enforcement Official shall determine the probable use and the number of parking and loading spaces required. In order to make this determination, the Zoning Enforcement Official may require the submission of survey or other data from the applicant or have data collected at the applicant's expense.

An applicant for a use permit for collective parking may be required to submit survey data substantiating a request for reduced parking requirements. A use permit for collective parking shall describe the limits of any area subject to reduced parking requirements and the reduction applicable to each use. (Ord. 2001-015 § 1)

4-1708 Reduced Parking for Other Uses

A use permit may be approved reducing the number of spaces to less than the number specified in the schedules in Section 4-1704, provided that the following findings are made:

- A. The parking demand will be less than the requirement in Section 4-1704; and
- B. The probable long-term occupancy of the building or structure, based on its design, will not generate additional parking demand; or
- C. Existing buildings are converted to new uses, leading to finding A or B.; or
- D. Shared parking that serves more than one use or site shall be encouraged in Mixed-Use zoning districts.**

In reaching a decision, the Board of Zoning Adjustments shall consider survey data submitted by an applicant or collected at the applicant's or Zoning Enforcement Official's request and the applicant's expense. (Ord. 2001-015 § 1)

4-1710 Parking In-Lieu Payments

- A. Within designated parking districts established by the City and shown on the zoning map and subject to prior approval by the City in each case, a parking requirement serving nonresidential uses on a site may be met by a cash in-lieu payment to the City prior to issuance of a building permit or a certificate of occupancy if no permit is required. The fee shall be to provide public off-street parking in the vicinity of the use.
- B. In establishing such parking districts, the City may set limitations on the number of spaces or the maximum percentage of parking spaces required for which an in-lieu fee may be tendered. Determinations as to whether an in-lieu fee will be accepted and the factors used to calculate the amount of the fee, e.g., estimated values for land and improvement costs for parking spaces, shall be at the sole discretion of the City. (Ord. 2001-015 § 1)

4-1712 Parking Spaces for the Handicapped
