Preparer of Incident Report:	Carrier
Description of Events:	DOCKWORKER PLACED THE SKID IN THE LOAD POSITION AND STARTED TO EXIT THE TRAILER IN REVERSE. AS THE FORKLIFT EXITED ON THE DOCK PLATE THE FORKS BOUNCED UP AND KNICKED THE DRUM APPROXIMATELY 2 1/2 INCHES FROM THE BOTTOM. HE THEN DROVE BACK INTO THE UNIT AND PICKED UP THE PALLET AND MOVED THE THE HAZ MAT BAY AREA RESULTING IN A TRAIL FROM THE TRAILER TO THE HAZ MAT BAY.
Recommendations/Actions Taken:	SHOULD HAVE LEFT THE DRUM IN THE TRAILER TO CONTAIN THE SPILL. CORRECTIVE ACTION TAKEN.

Label: Not reported  
Registration #: Not reported  
Inspection date: 12/01/01  
Exemption #: Not reported  
Contributing cause: Dropped, Improper blocking, Venting  
Contributing Object: Roadway  
Contributing failure: VALVE BROKE  
Affected side: Top  
Other contributing cause: Not reported  
Capacity container code: 0  
Number failed code: 0  
Shipment code number: 0

Remarks:

DRIVER WAS RETURNING TO SERVICE CENTER WITH THREE TOTES FROM ALLIED REFRIDERATION TWO OF THE TOTES FELL TO THE GROUND, WITH ONE OF THEM BEING DAMAGED. THE TRAILER ARRIVED IN THE YARD AND WAS PARKED IN A REMOTE CORNER OF THE YARD, BECAUSE OF VAPORS ESCAPING FROM THE TRAILER. AFTER THE VAPOR HAD DECEASED, DOOR WAS OPENED AND TOTES WERE EXAMINED. TOTES THEN WERE PLACED BACK IN AN UPRIGHT POSITION. DRIVER WAS COUNSELED ON PROPER METHODS OF SECURING FREIGHT DURING DELIVERIES AND PICK UPS.

Shipment code number:	0

Remarks:

THE PAIL WAS UNLOADED FROM THE LINE TRAILER AND NO APPARENT DAMAGE WAS VISIBLE AT THAT TIME. THE DRIVER WAS VERIFYING HIS LOAD AND WAS DOUBLE CHECKING HIS HM PAPERWORK, NOTICED SOME SEEPAGE ON THE SIDE OF THE CONTAINER. HE REPORTED THIS TO A SUPERVISOR AND THE FREIGHT WAS REMOVED. THE SHIPMENT WAS RE-COOPEDED PENDING DISPO FROM THE SHIPPER, WHICH WAS NOTIFIED ABOUT THE DAMAGE, AND POSSIBLE STRESS DAMAGE.

Report #: 2008050170  
System ID: 451044  
Report type: A  
Incident site: 3050 TEAGARDEN ST  
SAN LEANDRO, CA 94577  
Incident county: ALAMEDA  
Incident country: US  
Incident date: 05/08/08  
Incident time: 0400  
NRC report #: 0  
Other fed agency reported to: Not reported  
Other agency report #: Not reported  
Incident foreign country: Not reported  
Transportation mode: 4  
Transportation phase: 262  
Carrier DOT ID: 121058  
Carrier Hazmat ID: 0517065500600Q  
Carrier name: UPS Freight  
Carrier address: 1000 Semmes Avenue  
RICHMOND, VA 23224  
Carrier country: US  
Incident consequence: Spillage  
EMS/Fire crew responded: False  
EMS/Fire crew report #: Not reported  
Police responded: False  
Police report #: Not reported  
In-house cleanup occurred: True  
Other cleanup occurred: False  
Estimated damages exceed \$500: False  
Value of material lost: 0  
Value of carrier loss: 0  
Value of pub/priv property loss: 0  
Response cost: 0  
Remediation cost: 0

Details of fatalities by vapor/fire/explosion of hazardous material:

Did Fatalities occur: False  
No. of employee fatalities: 0  
No. of responder fatalities: 0  
No. of public fatalities: 0

Details of fatalities not due to hazardous material:

Did fatalities occur: False  
No. of dead persons: 0

Details of injuries due to hazardous material:

Did injuries occur: False  
No. of employees hospitalized: 0  
No. of employees not hospitalized: 0  
No. of responders hospitalized: 0  
No. of responders not hospitalized: 0  
No. of public hospitalized: 0  
No. of public not hospitalized: 0  
Evacuation was required: False  
No. of employees evacuated: 0  
No. of public evacuated: 0  
Total number evacuated: 0  
Evacuation time in hours: 0  
Road/facility was closed: False  
No. of hours closed: 0  
Hazmat involved in crash/derailment: False  
Estimated speed of crash: 0  
Crash weather conditions: Not reported  
Vehicle overturned: Not reported  
Did vehicle leave road/track: Not reported  
Where incident occurred/discovered: Not reported  
Shipment handling details: Not reported

Incident report preparer details:

Preparer name: Neatra E Lockett  
Preparer title: Environmental Clerk  
Hazmat registration ID: Not reported  
Employer business name: UPS Freight  
Address: 1000 Semmes Avenue  
RICHMOND, VA 23224  
Country: US  
Report date: 05/12/08  
Telephone: 804-231-8267  
Fax: 8042915688  
Business type: C  
Preparer other function: Not reported

Description of Events:

WORKER PUNCTURED WITH FORK-LIFT

Recommendations/Actions Taken to Prevent Future Incidents:

CORRECTIVE ACTION ISSUED AND RE-TRAINED

Shipper Details:

Shipper ID: 451224  
Shipper name: Ecolab  
Address: 110 PARMENAS LANE

Description of Events:	A STRONG ODOR WAS COMING FROM THE PACKAGES NEAR THE HAZMAT AREA. OPERATION WAS STOPPED ON ONE SIDE OF THE DOCK AS A PRECAUTION. A CONTRACTOR ARRIVED TO CHECK OUT THE PACKAGES AND ADVISED IT WAS OK TO RETURN TO WORK ON THAT SIDE OF THE DOCK AS THERE WAS NO INHALATION HAZARD. SOME PRODUCT HAD LEAKED FROM THE CAP.

Incident report preparer details:

Preparer name: Chris Baker  
Preparer title: Emergency Response Coordinator  
Hazmat registration ID: Not reported  
Employer business name: FedEx Freight Chemical Management  
Address: 1805 East 23rd Street Suite 1  
LITTLE ROCK, AR 72206  
Country: US  
Report date: 08/27/07  
Telephone: 800-603-3828  
Fax: Not reported  
Business type: C  
Preparer other function: Not reported

Description of Events:

The carton was damaged by improper loading causing release of product. All product was absorbed with oil dry and placed into a salvage drum and was handled according to all local, state, and federal regulations.

Recommendations/Actions Taken to Prevent Future Incidents:

Responsible Associate has been shown proper freight handling and loading techniques.

Shipper Details:

Shipper ID: 435443  
Shipper name: ICI Paint  
Address: 13489 Jurupa Ave  
FONTANA, CA 92337  
Shipper country: US  
Hazmat papers #: 125 611 7144  
Shipment origin: Not reported  
Shipment origin country: US

Details of material being shipped:

Material ID: 441572  
Material name: PAINT RELATED MATERIAL including paint thinning, drying, removing or reducing compound  
UN ID: UN1263  
Hazard class code: 30  
Trade name: Not reported

Technical/Trade Name: Not reported  
Identification Number: UN1139  
Hazardous Class Code: 3  
Hazardous Class: FLAMMABLE - COMBUSTIBLE LIQUID  
Packing Group: II  
Quantity Released: 1  
Unit of Measure: LGA  
HAZMAT Waste Indicator: No  
HAZMAT Waste EPA ID: Not reported  
HMIS Toxic by Inhalation: No  
TIH Hazard Zone: Not reported  
Material Shipment Approval: No  
Mat. Shipment Approval #: Not reported

Preparer of Incident Report: Other-Authorized Agent  
Description of Events: During loading freight was improperly blocked and braced. This allowed the freight to become damaged by other freight. Damage caused a release of product. Dock personnel recovered released product with absorbents and placed into a container for disposal.  
Recommendations/Actions Taken: Provide additional training to insure initial handlers are utilizing proper freight handling techniques and can recognize and prevent future incidents.

Incident county: ALAMEDA  
Incident country: US  
Incident date: 06/15/07  
Incident time: 0630  
NRC report #: 0  
Other fed agency reported to: Not reported  
Other agency report #: Not reported  
Incident foreign country: Not reported  
Transportation mode: 4  
Transportation phase: 263  
Carrier DOT ID: 62728  
Carrier Hazmat ID: 050404550013MO  
Carrier name: FedEx Freight West, Inc.  
Carrier address: 6411 Guadalupe Mines Road  
SAN JOSE, CA 95120  
  
Carrier country: US  
Incident consequence: Spillage  
EMS/Fire crew responded: False  
EMS/Fire crew report #: Not reported  
Police responded: False  
Police report #: Not reported  
In-house cleanup occurred: True  
Other cleanup occurred: False  
Estimated damages exceed \$500: False  
Value of material lost: 0  
Value of carrier loss: 0  
Value of pub/priv property loss: 0  
Response cost: 0  
Remediation cost: 0

Details of fatalities by vapor/fire/explosion of hazardous material:

Did Fatalities occur: False  
No. of employee fatalities: 0  
No. of responder fatalities: 0  
No. of public fatalities: 0

Details of fatalities not due to hazardous material:

Did fatalities occur: False  
No. of dead persons: 0

Details of injuries due to hazardous material:

Did injuries occur: False  
No. of employees hospitalized: 0  
No. of employees not hospitalized: 0  
No. of responders hospitalized: 0  
No. of responders not hospitalized: 0  
No. of public hospitalized: 0  
No. of public not hospitalized: 0  
Evacuation was required: False  
No. of employees evacuated: 0  
No. of public evacuated: 0  
Total number evacuated: 0  
Evacuation time in hours: 0  
Road/facility was closed: False  
No. of hours closed: 0  
Hazmat involved in crash/derailment: False  
Estimated speed of crash: 0  
Crash weather conditions: Not reported

Vehicle overturned: Not reported  
Did vehicle leave road/track: Not reported  
Where incident occurred/discovered: Not reported  
Shipment handling details: Not reported

Incident report preparer details:

Preparer name: Chris Baker  
Preparer title: Emergency Response Coordinator  
Hazmat registration ID: Not reported  
Employer business name: FedEx Freight Chemical Management  
Address: 1805 East 23rd Street Suite 1  
LITTLE ROCK, AR 72206  
Country: US  
Report date: 06/27/07  
Telephone: 800-603-3828  
Fax: Not reported  
Business type: C  
Preparer other function: Not reported

Description of Events:

The carton was damaged by freight shift causing release of product. All product was absorbed with oil dry and placed into a salvage drum and was handled according to all local, state, and federal regulations.

Recommendations/Actions Taken to Prevent Future Incidents:

Responsible Associate has been shown proper freight handling and loading techniques.

Shipper Details:

Shipper ID: 432723  
Shipper name: Gemini Coatings  
Address: 2450 Valley Road Ste 2  
RENO, NV 89512  
Shipper country: US  
Hazmat papers #: 125 658 7496  
Shipment origin: Not reported  
Shipment origin country: US

Details of material being shipped:

Material ID: 438812  
Material name: PAINT RELATED MATERIAL including paint thinning, drying, removing or reducing compound  
UN ID: UN1263  
Hazard class code: 30  
Trade name: Not reported  
Packing group: II  
Amount reported released: 0.500000 Gallon(s)  
Amount released: 0.500000 Gallon(s)  
Material listed as hazardous waste: False  
EPA manifest number of haz. waste: Not reported  
Material listed as toxic inhalant: False  
Hazard zone of toxic inhalant: Not reported  
Material shipped under exemption/ approval/ Competent Authority Cert. False  
Exemption/approval/CAC number: Not reported  
Undeclared Hazmat shipment: False

Registry ID: 110000483502

Environmental Interest/Information System  
AIR EMISSIONS CLASSIFICATION UNKNOWN

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that

discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Investigations at these sites indicated that a regional shallow groundwater contamination exist. A Public Health Advisory was issued, advising residents not to use private wells for domestic purposes unless tested regularly. Contaminants of primary concern are trichloroethylene(TCE), perchloroethylene(PCE), dichloroethylene and related compounds. They as well as metals and nitrate have all been found above the state drinking water standards. Domestic water is supplied by East Bay Municipal Utility District. However, up to 2000 private wells may exist in San Leandro. In 1993 and 1995 DTSC conducted a series of investigations and determined the extent of the plume to be 1 mile wide and 2 miles long. DTSC is conducting a number of in-situ pilot studies to evaluate techniques to treat the underlying groundwater. groundwater. For site specific information see 1465 Factor Avenue, Hudson I.C.S., 750 139th Avenue Site, Singer Friden, Staefa, U.S. Can Company, Former Transcon Lines Site, Simmons Site, Dana Corporation Site, Cintas Corporation Site and Century Plating.</p>	<p>Comments Date: 01201993          Comments: Interim Groundwater Contamination Report for Central San          Comments Date: 01201993          Comments: Leandro. Background Info: The site consists of a 130,000 square foot building on 7 acres of land. In 1957, Sherwin-Williams manufactured metal cans and containers. Solvents were used as part of that process. In 1983, the facility was sold to U. S. Can Company, who continued to use the same processes to manufacture metal cans and containers. U.S. Can Company added an aerosol can manufacturing operation. The manufacturing facility closed in 1989. The building is used for warehousing. Investigations found that both the soil and groundwater at the Site were contaminated with dichloroethane, dichloroethylene, and tetrachloroethylene. A limited soil hot spot was removed and a sump was closed in place. The site is located within a regional groundwater plume located in Central San Leandro. Groundwater contamination will be addressed as part of the regional plume (see site ID 01990002).

**FINDS:**

Registry ID: 110002783667

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Division: Water Boards  
Violation Program: INDSTW  
Violation Source: SMARTS

Evaluation:

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 08-19-2016  
Violations Found: No  
Eval Type: Routine done by local agency  
Eval Notes: No changes. Their household collected hazardous waste is mostly in the center of the main processing building. Their site generated hazardous waste are mostly kept in the hazardous waste near the southeastern corner of their facility. The shop/maintenance area has the remaining site generated hazardous wastes. Most haz wastes are kept in ASTs, but there is also drained used oil drums. The containers were free of loose hazardous wastes. All containers were labeled and all generation start dates were filled out. They are maintaining hazardous waste area logs. They are keeping hazardous waste related records indefinitely. The facility contact has a spread she that she uses to tract all hazardous waste shipments, TSDf arrivals, and receipt of paperwork (TSDf signed manifest copies). No violations were observed.

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 08-19-2016  
Violations Found: No  
Eval Type: Routine done by local agency  
Eval Notes: Their last CERS submittal was on 8/18/16. It did not include an emergency response/contingency plan. The last plan submitted was on 2/23/16. The approved submissions had next reporting due dates of 2/23/17 to remind the business that a full CERS submission including the emergency response/contingency plan will be due by that date. This was also discussed with the facility contact and she acknowledge the requirement for future submissions. Note: her other facility located at 577 Aladdin Ave. San Leandro had an overdue emergency response contingency plan that was noted as a violation. The rest of the plan looked good and the emergency response/contingency plan also looked good. No violations were observed.

Background Info: plating shop at this location for approximately 8 years. At that time, Century was shut down by local authorities for noncompliance with fire and building codes and for unpermitted discharges to the sanitary sewer. Subsequently, U.S. EPA removed drums of chemicals, contaminated equipment, and debris from the building and adjoining yard. Six inches of surface soil, contaminated primarily with metals, was removed from the yard and a private well was closed. Soil under the building was contaminated with solvents and metals and was believed to be the source of groundwater contamination in the area. Groundwater samples had detected perchloroethene and trichlorethene above the drinking water standards. The plume migrating from this Site is part of the commingled plume which has been named DWA Plume. The groundwater investigation of this site will be carried out as part of the investigation of the San Leandro Plume. Please also review that profile report for further information. Century Plating Company, Inc. operated a plating and machine shop at 1124 139th Avenue from about 1973 until October 1991. Prior to Century Plating, Inc., Paddy O'Chrome operated a

**FINDS:**

Registry ID: 110002147070

**Environmental Interest/Information System**

**AIR EMISSIONS CLASSIFICATION UNKNOWN**

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Secondary Waste: Not reported  
Secondary Waste Type: Not reported  
Design Flow: 0  
Baseline Flow: 0  
Reclamation: Not reported  
POTW: Not reported  
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

- Waste code: D001
- Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code:	D002
Waste name:	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Annual Waste Handled:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 15548

Waste code: D035  
Waste name: METHYL ETHYL KETONE  
Amount (Lbs): 15548

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.  
Amount (Lbs): 136

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.  
Amount (Lbs): 240

Waste code: D007  
Waste name: CHROMIUM  
Amount (Lbs): 4

Waste code: D009  
Waste name: MERCURY  
Amount (Lbs): 1

Waste code: D010  
Waste name: SELENIUM  
Amount (Lbs): 4

Waste code: P001  
Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%  
Amount (Lbs): 8

Waste code: P075  
Waste name: NICOTINE, & SALTS  
Amount (Lbs): 59

**FINDS:**

Registry ID: 110055770839

Environmental Interest/Information System  
STATE MASTER

Registry ID: 110002683016

Environmental Interest/Information System  
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Local Agency: SAN LEANDRO, CITY OF  
 RB Case Number: 01S0673  
 File Location: Regional Board  
 Potential Media Affected: Other Groundwater (uses other than drinking water), Soil, Soil Vapor, Under Investigation

Potential Contaminants of Concern: Other Chlorinated Hydrocarbons, Vinyl chloride, Diesel

Site History: The site was originally owned and operated by Albertsons Incorporated, which used the site for grocery distribution operations since the late 1950s. In 2005, Kaiser Foundation Hospitals (Kaiser Permanente) purchased the site from Albertsons and is considering redeveloping the site with a future hospital, medical buildings, parking structures, parking lots, and buildings for commercial purposes. Two historical environmental issues were identified at the site. The first issue is related to 17 underground storage tanks (USTs) that were used and managed by Albertsons during their tenure. Between 1992 and 1993, 15 of the USTs were removed and collectively replaced with two new USTs (near Building 16). In June 1995, the California Regional Water Quality Control Board (Water Board) issued a case closure letter for all 15 USTs. Recently in September 2006, the last two remaining USTs were removed from the site. The closure of these two USTs is pending. The second environmental issue identified for the site is related to a regional groundwater plume consisting largely of volatile organic compounds (VOCs). This regional groundwater plume, referred to as the San Leandro plume, is located in shallow groundwater in central San Leandro and known to be crossing the southeast corner of the site.

Potential Media Affected:	Soil Vapor
Potential Contaminants of Concern:	Tetrachloroethylene (PCE)
Site History:	In February 2017, a new case RO0003239 was opened for a portion of the property described as the "East Sector" while the portion of the site, described as the "West Sector" stayed with RO0003217 which was originally opened for Assessor Parcel Number (APN) 411-92-1, located at 1233 Bockman Road in San Lorenzo, California. APN 411-92-1 is planned for the development of 53 two-story residential units within 10 buildings. The legal descriptions for the "East Sector" and "West Sector" on APN 411-92-1 were recorded on February 2017 for the sole purpose for use in conjunction with phased environmental closure for the subject site. The "West Sector" and the "East Sector" are a portion of Lot 1, as said lot is shown on the final map of Tract 8284 filed on September 23, 2016 in Book 343 of Maps, at page 20, Alameda County Records. Four residential buildings (Buildings 1 through 4) will be located on the West Sector (RO0003217), and five buildings (Buildings 5 through 9) will be located on the East Sector

(RO0003239). The West Sector of the property located at 1233 Bockman Road is a separate project. An automotive repair facility was historically located on the western portion of the property. Site investigation and remediation are complete for that case (RO0003217) and is pending closure Remediation of VOC impacts associated with a former drycleaner located on the east portion of the property has been completed and vapor mitigation measures installed to protect human health and the environment and the case closed with long term site management requirements.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

- Waste code: D001
- Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 148

- Waste code: D002
- Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RB Case Number: 01-0771  
Local Agency: Not reported  
File Location: All Files are on GeoTracker or in the Local Agency Database  
Local Case Number: RO0000212  
Potential Media Affect: Other Groundwater (uses other than drinking water)  
Potential Contaminants of Concern: Diesel, Gasoline  
Site History: This case closure applies to Parcel 80C-479-6-21, which is currently Holland Park, a recreational facility owned and operated by the Hayward Area Recreation & Park District (HARD). Surrounding land use includes Edendale Middle School to the west, recreational fields to the south, Parcel 80C-479-6-20 (planned youth center) to the east, commercial properties to the north and southeast, and East 14th Street to the northeast. Parcel 80C-479-6-20, which is owned by the Alameda County Redevelopment Agency and is the planned site for the Ashland Youth Center, was previously part of this case but is now considered under a separate fuel leak case, RO0003078 (GeoTracker Global ID T10000003245). The site was utilized as a bulk fuel storage and distribution facility from the 1960s to the mid 1980s. The bulk storage facility consisted of aboveground storage tanks and eight underground storage tanks (USTs), three of which contained gasoline, two contained diesel, two contained kerosene, and one contained stoddard solvent. The USTs were removed in 1998 and the excavated overburden soil was placed back in the UST excavations. Additionally, two former structures, a warehouse located in the southwestern section and a small garage located in the central section of the site, were reportedly used for vehicle maintenance. The bulk fuel storage and distribution business was located in the property interior; former property parcels fronting on East 14th Street were utilized until recent years as auto sales lots. In 2008, the properties were purchased by HARD and the Alameda County Redevelopment Agency and the property parcel boundaries were modified. When compared to the current property parcel boundaries, the bulk storage facility was primarily located on parcel 80C-479-6-21 but also extended into the northwestern and southwestern portions of Parcel 80C-479-6-20. Therefore, both current parcels were considered part of one fuel leak case until August 2011. On August 24, 2011, HARD requested that Parcel 80C-479-6-21, which is currently Holland Park, be considered under a separate fuel leak case in order to move the case towards closure more quickly. Remedial actions, which include excavation and construction of a cap, have been completed at Holland Park but, at the time of preparation of this closure summary, remedial actions have not been completed on the planned youth center site, Parcel 80C-479-6-20. ACEH opened a separate fuel leak case for Parcel 80C-479-6-20 on August 31, 2011. Petroleum hydrocarbons were first detected at the site during a subsurface investigation performed in 1990. Soil samples collected from five soil borings near the former diesel USTs contained up to 25,000 ppm of TPHd. In April 1996, three groundwater monitoring wells were installed at the site. Soil samples collected from the well borings contained up to 4,400 ppm of TPHg and 8,200 ppm of TPHd. Groundwater samples collected from the monitoring wells contained up to 33,000 ppb of TPHg, 9,700 ppb of TPHd, and 12 ppb of benzene. Quarterly groundwater monitoring was conducted using the three

**U001598514**

monitoring wells from April 1996 until March 1998. In 1998, the contents of approximately 143 55-gallon drums and 60 smaller containers were inventoried and removed from the site by vacuum truck. Approximately 4,636 gallons of oily water contaminated with halogenated constituents were transported to Evergreen in Newark, CA for recycling. Approximately 650 gallons of oily water contaminated with halogenated constituents were disposed at the Solvent Service facility in San Jose, CA. Two 55-gallon drums containing oily water contaminated with PCBs were transported off-site for incineration. One 55-gallon drum containing sodium hypochlorite was also transported off-site for disposal. All 55-gallon drums were crushed and transported off-site for disposal. On September 3 and 4, 1998, twenty aboveground storage tanks (ASTs) were emptied, demolished, and then transported off-site for recycling. Eight USTs were removed from five separate tank pits on September 9, 1998 (connected T1 and T2, T3, T4, connected T5 and T6, and connected T7 and T8). Slight to moderate petroleum odor and green discoloration was observed in soils in each tank pit. A sheen on groundwater was also observed on groundwater in each tank pit. Soil samples collected from the tank pits contained up to 6,900 ppm of TPHg, 3,200 ppm of TPHd, and 9,200 ppm of TPHss. Soil overburden from the tank pit excavations was placed back into the tank pits. In January 2001, 46 soil borings were advanced to collect a total of 131 soil samples. TPHg, TPHd, and TPHss were detected at concentrations up to 13,000 ppm, 8,400, and 8,300 ppm, respectively. In September and October 2008, five soil borings (B-9 through B-12 and pilot boring MW-9) were advanced in the southeastern portion of the site. Four deep soil borings (DB-1A, DB-1B, DB-2, and DB-3) were advanced on October 1, 2008 to collect soil samples and grab groundwater samples from a lower water-bearing zone. The grab groundwater samples collected from the lower water-bearing zone contained TPHg at concentration up to 120 ppb. TPHd, BTEX, and MTBE were not detected at concentrations above reporting limits in grab groundwater samples from the deeper water-bearing zone. In October 2008, soil vapor samples were collected from six locations (SVP-1 through SVP-6) within the parcel, where construction of a community center has been proposed. The concentrations of all constituents of concern were below residential screening criteria for potential vapor intrusion to indoor air. In May 2009, soil vapor sampling was conducted on the adjoining Edendale Middle School property for the purposes of confirming that groundwater contamination from the site had not affected the future site of the gymnasium. Three soil vapor samples were collected within the proposed footprint of the gymnasium and the samples were analyzed for VOCs. No chemicals of concern were detected in the three soil vapor samples. In September 2009, a total of 4,352.2 tons of soil were excavated and removed from the site and disposed of at Vasco Road Landfill in Livermore, CA. The areas excavated corresponded to five excavation cells described in the CAP. Soils within the impacted areas adjacent to the USTS were excavated to depths ranging from 6 to 10 feet bgs. ACEH also requested that soil be removed to a depth of one foot throughout the park site outside of the UST areas. All exposed surfaces were to be covered by hard surfaces such as asphalt or concrete or a minimum of one foot of clean fill or landscaped materials. Verification of the grading, thickness of fill material was to be provided in an excavation report. All materials used to backfill the excavation cells were provided from other on-site areas of the property. Approximately one third of the backfill material

MAP FINDINGS

**JACK HOLLAND (Continued)**

**U001598514**

came from the Area C clean soil stockpile. Laboratory results from the clean stockpile soil sampling indicated that PCB and TPH-d concentrations in the top one-half of the stockpile exceeded their respective cleanup goals. These soils were removed from the site and transported to the landfill along with the impacted soil stockpile for proper disposal. Soils from the bottom half of the Area C clean stockpile contained TPHd concentrations that exceeded the CG of 83 mg/kg, which the highest concentration reported at 220 mg/kg. These soils were used to backfill the bottom of the deeper UST area excavations. The remaining backfill material was excavated from the northern corner of the site, which was not part of the bulk storage facility. On April 14, 2010, the previously excavated soil in cells A1 and A2 were re-excavated in order to compact the soils. Soil that was visually stained or exhibited odor was segregated for off-site disposal. On April 16, 2010, the excavations were backfilled with on-site soil. Between April 15 and September 14, 2010, surface grading and construction of the asphalt or concrete areas was conducted as part of park construction. Surface grading of the cap within landscaped areas was also conducted at this time. The material used to build up the subgrade beneath the landscaped areas consisted of excess soil generated during grading of the remainder of the site and imported soil amendment. Because the cap soils used for the landscaped areas were not from a documented clean fill source, soil samples were collected from the landscaped areas on September 27, 2010. Based on results of the soil sampling, ACEH requested that several areas be re-excavated and covered with clean imported fill. Approximately 580 cubic yards of soils was excavated and disposed off-site at the West Winton Landfill in Hayward, CA. On January 12, 2011, soil samples were collected from the proposed clean imported fill. ACEH did not approve the fill material due to the presence of TPHd, TPHmo, and polycyclic aromatic hydrocarbons. Following approval of the second imported fill material, the excavated area was backfilled with approximately 500 cubic yards of clean imported fill between January 28 and March 1, 2011.

Registry ID: 110058327010

Environmental Interest/Information System  
AIR EMISSIONS CLASSIFICATION UNKNOWN

Registry ID: 110002430628

Environmental Interest/Information System  
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART)  
provides California with information on hazardous waste shipments for  
generators, transporters, and treatment, storage, and disposal  
facilities.

RCRAInfo is a national information system that supports the Resource  
Conservation and Recovery Act (RCRA) program through the tracking of  
events and activities related to facilities that generate, transport,  
and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA  
program staff to track the notification, permit, compliance, and  
corrective action activities required under RCRA.

Completed Info:

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Other Report  
Completed Date: 05/12/1989  
Comments: Liquid Gold filed a RCRA Part A permit application on December 10, 1980 for their facility located at 1696 Martinez Street in San Leandro. No interim status document was ever issued for this facility. In April of 1989 twelve samples were taken from surface soil at the site during a RCRA inspection. Moderately elevated levels of lead (less than 500 mg/kg) were found in the samples.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## **STANDARD ENVIRONMENTAL RECORDS**

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 07/19/2019	Source: EPA
Date Data Arrived at EDR: 07/30/2019	Telephone: N/A
Date Made Active in Reports: 09/03/2019	Last EDR Contact: 09/05/2019
Number of Days to Update: 35	Next Scheduled EDR Contact: 10/14/2019
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/19/2019	Source: EPA
Date Data Arrived at EDR: 07/30/2019	Telephone: N/A
Date Made Active in Reports: 09/03/2019	Last EDR Contact: 09/05/2019
Number of Days to Update: 35	Next Scheduled EDR Contact: 10/14/2019
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## ***Federal Delisted NPL site list***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 07/19/2019

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

## ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

	Data Release Frequency: Quarterly

## ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency

## ***Federal RCRA generators list***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

## ***Federal institutional controls / engineering controls registries***

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 08/13/2019	Source: Department of the Navy
Date Data Arrived at EDR: 08/20/2019	Telephone: 843-820-7326
Date Made Active in Reports: 08/26/2019	Last EDR Contact: 08/07/2019
Number of Days to Update: 6	Next Scheduled EDR Contact: 11/25/2019
	Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 08/19/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/20/2019	Telephone: 703-603-0695
Date Made Active in Reports: 08/26/2019	Last EDR Contact: 08/20/2019
Number of Days to Update: 6	Next Scheduled EDR Contact: 12/09/2019
	Data Release Frequency: Varies

### US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 08/19/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/20/2019	Telephone: 703-603-0695

## ***State- and tribal - equivalent CERCLIS***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

## **State and tribal Brownfields sites**

### BROWNFIELDS: Considered Brownfields Sites Listing

A listing of sites the SWRCB considers to be Brownfields since these are sites have come to them through the MOA Process.

Date of Government Version: 06/24/2019	Source: State Water Resources Control Board
Date Data Arrived at EDR: 06/25/2019	Telephone: 916-323-7905
Date Made Active in Reports: 08/21/2019	Last EDR Contact: 06/25/2019
Number of Days to Update: 57	Next Scheduled EDR Contact: 10/07/2019
	Data Release Frequency: Quarterly

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### **Local Brownfield lists**

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 06/03/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/04/2019	Telephone: 202-566-2777

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 06/11/2019

### DEED: Deed Restriction Listing

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Number of Days to Update: 50	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

## Other Ascertainable Records

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013

Data Release Frequency: Quarterly

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Data Release Frequency: Annually

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

	Data Release Frequency: Quarterly

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency

## HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Data Release Frequency: Varies

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Date of Government Version: 03/27/2019	Source: Department of Interior

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

## WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

## WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

## EDR HIGH RISK HISTORICAL RECORDS

### *EDR Exclusive Records*

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

Date of Government Version: 04/30/2012	Source: Los Angeles County Department of Public Works
Date Data Arrived at EDR: 04/17/2019	Telephone: 626-458-6973

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 05/14/2019	Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 05/14/2019	Telephone: 860-424-3375

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

## Medical Centers: Provider of Services Listing

Version Date:	2012
East Map:	5640616 HAYWARD, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

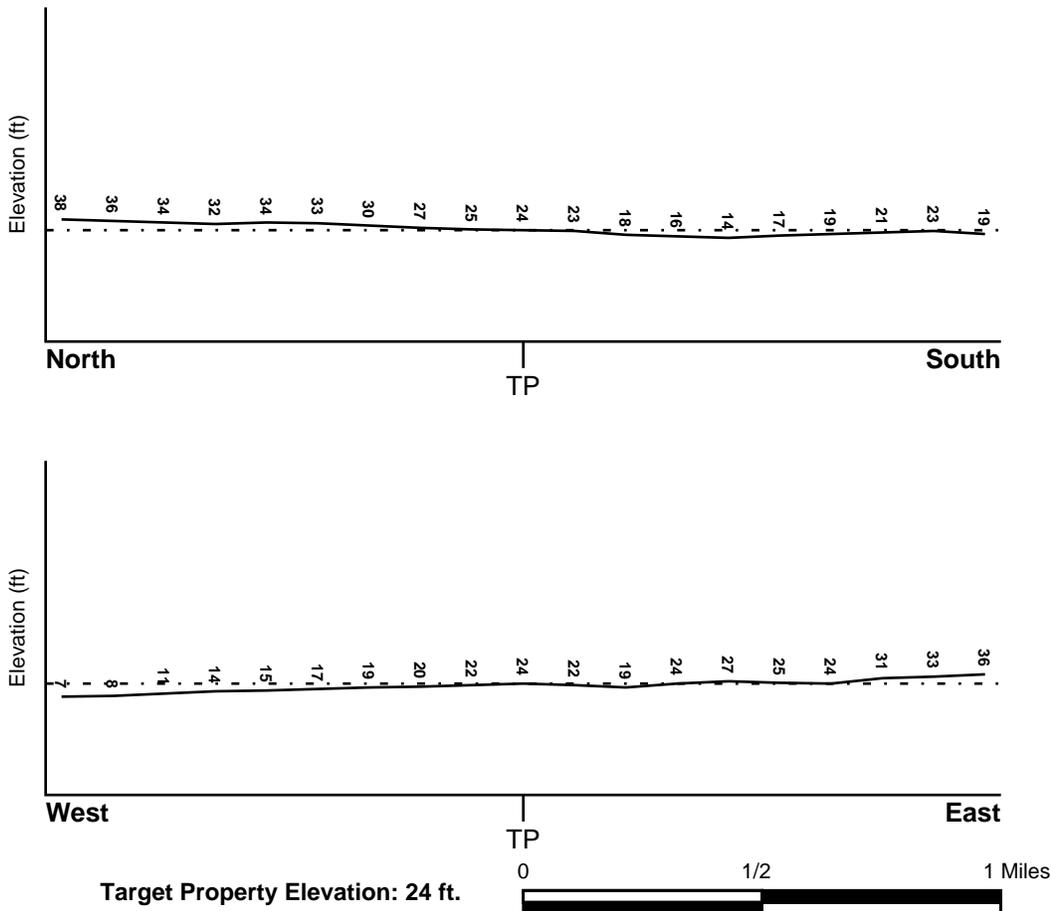

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06001C0259G	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06001C0258G	FEMA FIRM Flood data
06001C0266G	FEMA FIRM Flood data
06001C0267G	FEMA FIRM Flood data

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
SAN LEANDRO	YES - refer to the Overview Map and Detail Map

## **HYDROGEOLOGIC INFORMATION**

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Status:	Not found

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

4G	1/2 - 1 Mile ESE	SW

For additional site information, refer to Physical Setting Source Map Findings.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: Danville

Soil Surface Texture: silty clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	20 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6
2	20 inches	53 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6
3	53 inches	79 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

**Soil Map ID: 2**

Soil Component Name: Clear Lake

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 137 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	25 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9

**LOCAL / REGIONAL WATER AGENCY RECORDS**

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

#### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

## OTHER STATE DATABASE INFORMATION

#### California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

#### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

### RADON

#### State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

## PHYSICAL SETTING SOURCE RECORDS SEARCHED

### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

**QUALIFICATIONS OF PROJECT PERSONNEL**

## EXPERIENCE SUMMARY

Mr. Bell has 22 years of experience obtaining, interpreting and reporting technical data regarding site assessments, remedial investigations, and contaminant assessment programs. He is the Program Manager for the D.R. Horton Contract and Contract Manager for the TxDOT Scientific Services contract and serves as a Client Manager for a variety of clients and contracts. His responsibilities include supervising and directing more than 300 site assessments annually at current and former federal military facilities, landfills, refineries, bulk storage facilities, gas transmission facilities, underground storage tank sites, maintenance facilities, highway right-of-ways, commercial and residential sites across the country. His experience also includes conducting/managing Phase I and Phase II Environmental Site Assessments and other investigations; developing/implementing remedial action plans; designing and installing recovery systems; supervising underground storage tank removal; preparing reports; interpreting geophysical data; and developing GIS. He also serves as a liaison for clients, subcontractors, and government agencies. Typically manages multiple projects with budgets ranging from \$1,000 to \$3 million concurrently, including personnel and subcontractors.

Oil and Gas Experience: 1996 – Present (22 years)

USACE Experience: 1998 – 2017 (19 years)

TxDOT Experience: 1998 – Present (20 years)

## RELEVANT EXPERIENCE

### DUE DILIGENCE

**Program Manager; Environmental Support Services; D.R. Horton (Confidential), Nationwide, January 2014 – Present.** Program Manager for the D.R. Horton Nationwide account. Responsible for performing quick paced projects on time, on schedule and under budget, leads the One Tetra Tech approach to providing the client with Due Diligence services according to the most current ASTM Guidelines and State requirements. Projects are located in 29 of the 50 states. Projects include Phase I and Phase II Environmental Site Assessments, UXO Clearances, SWPPP support, regulatory agency interaction and negotiation, remedial design and implementation, and design of engineering controls. Annual contract value is approximately \$ 3 million.

**Project Manager; Site Investigation/Remediation; Schlumberger, Carthage, Texas; June 2011 to 2017.** Mr. Bell served as Project Manager for the investigation/assessment addressing soil contamination due to a historical release of metals. This project was acquired by Schlumberger through the acquisition of Smith International. During the assessment, Tetra Tech recommended excavating the impacted soil. Schlumberger approved supplemental funding to remove the impacted soil and to increase the chance of a clean closure. PM duties included coordination between facility owner and corporate managers and TCEQ negotiations. The work included preparation of detailed Sampling and Analysis Plan and Health and Safety Plan, installation of soil borings, collection of soil samples for chemical analysis, risk analysis, APAR preparation, and soil excavation/disposal. Project Value: \$80,000

## YEARS OF EXPERIENCE

22

**Project Manager; Phase II Assessment; Gibson Energy LLC, Ballard, Utah, February 2014 – June 2014.** Managed the performance of Phase II Assessment activities at a newly acquired facility that was previously an Oil and Gas production site and equipment maintenance and storage facility. Coordinated field activities that included collection of soil and groundwater samples for analysis through a sister company. Report was delivered on time and under budget. Project cost was \$20,000.

**Project Manager; Terminal Decommissioning; Gibson Energy LLC, Rosanky, Texas, March 2014 – June 2014.** Managed the performance of Terminal Decommissioning activities at an existing terminal. The task included breaking down existing above ground storage tanks, piping, and pumps used for the transfer of crude oil from tanker trucks to the storage facility. The equipment was cleaned and transported to a storage facility for future use. Soil samples were collected to document the soil condition after the decommissioning activities were completed. Report was delivered on time and under budget. Project cost was \$ 50,000.

**Project Manager; Phase I and II ESA; Gibson Energy LLC, Stockdale, Texas, April 2014 – July 2014.** Managed the performance of Phase I and II Environmental Site Assessment activities at a newly acquired facility that was previously an Oil and Gas production site. Coordinated field activities that included collection of soil and groundwater samples for analysis. Report was delivered on time and under budget. Project cost was \$30,000.

**Project Manager; Site Investigation; Schlumberger, Houston, Texas; January 2009 to January 2012.** Mr. Bell served as Project Manager for the investigation/assessment addressing soil and groundwater contamination due to a historical release of chlorinated solvents. The site awarded to Tetra Tech to move a stagnant project towards closure. Though negotiations with the TCEQ VCP project Manager, a path to closure was identified and the plan for a site investigation was identified. PM duties included coordination between facility and corporate managers, negotiations with the City of Houston (COH) for installation of monitoring wells in the city ROW and obtaining an access agreement to install monitoring wells at a COH facility, negotiations with other adjacent property owners, and TCEQ negotiations to identify cleanup criteria and to pave the way for a Municipal Setting Designation and ultimately closure. The work included preparation of detailed Sampling and Analysis Plan and Health and Safety Plan, installation of soil borings and monitoring wells, and collection of soil and groundwater samples for chemical analysis, risk analysis, APAR preparation, COC forensic analysis interpretation, P&A of wells and MSD application support. Project Value: \$181,000.

**Project Manager; Site Investigation and CAP Preparation; Schlumberger, Laurel, Mississippi; June 2011 to 2017.** Mr. Bell served as Project Manager for the investigation/assessment addressing soil contamination due to a historical release of metals. This project was acquired by Schlumberger through the acquisition of Smith International. During the assessment, Tetra Tech prepared a corrective action plan (CAP) to excavate the impacted soil. PM duties included coordination between facility owner and corporate managers and MDEQ negotiations. The work included preparation of detailed Sampling and Analysis Plan and Health and Safety Plan, installation of soil borings and monitoring wells, collection of soil and groundwater samples for chemical analysis, risk analysis, Site Characterization Report preparation, and CAP preparation. Project Value: \$84,000

**Project Manager; Site Investigation; Upper Chain of Wetlands, Dallas Floodway Extension; USACE Fort Worth District; Dallas, Texas; January 2008 to January 2011.** Served as project manager leading the Stell Environmental Enterprises-Tetra Tech team in performing Hazardous and Toxic Waste Site Investigations at various properties within the proposed Dallas Floodway Extension Corridor on the Trinity River. Conducted this project for the Fort Worth District COE as part of a Federal Government and City of Dallas \$500M initiative to develop flood controls within the floodplain of the Trinity River south of the City of Dallas. Tasks include installation of approximately 300 soil borings including monitoring wells, rights-of-entry coordination, traffic control plans, coordination with utility companies, soil and rock geotechnical hollow stem and mud rotary drilling, chemical

analysis of soil and groundwater, surveying, IDW disposal, work plan generation, SSHP preparation, geotechnical report preparation, HTRW report preparation, soil management plan preparation, coordination between all entities involved in the project, liaison for the USACE with property owners, etc. Contract value of \$700,000.

**Task Order Manager; Geotechnical and Hazardous, Toxic and Radiological Waste (HTRW) Site Investigation; Central City; USACE Fort Worth District; Fort Worth, Texas; June 2007 to January 2009.**

Served as project manager in performing Geotechnical and HTRW Site Investigations at various properties within the proposed Central City Project area on the Trinity River. Project is a multiphase project to develop the western side of Fort Worth, creating a bypass channel, dams, levees, parks and revitalized commercial and residential areas. The Central City Project is a joint venture between the USACE, Tarrant Regional Water District (TRWD), City of Fort Worth, and Texas Department of Transportation. Tasks include installation of 77 soil borings including monitoring wells, rights-of-entry coordination, traffic control plans, coordination with utility companies, soil and rock geotechnical hollow stem and mud rotary drilling, chemical analysis of soil and groundwater, surveying, IDW disposal, work plan generation, SSHP preparation, geotechnical report preparation, HTRW report preparation, coordination between all entities involved in the project, liaison for the USACE and TRWD with property owners, etc. Worked with the USACE to receive a partial award and began the project prior to full funding by stakeholders. The project was required a quick ramp up to collect time critical geotechnical data required for the Samuel Ave Dam location and design. Tetra Tech mobilized resources from across the company to meet the schedule. Once the critical samples were collected and data received, Tetra Tech was awarded follow-on work for other phases of the project. Reports were submitted as per the schedule; however data was collected, interpreted and submitted to the USACE as required for the USACE to meet their internal schedule. Contract value of \$992,000.

**Geologist/ Site Manager; National UST Services Time and Material Contract; Conoco Inc.; Houston, Texas; October 1996 to August 1998.**

Served as Site Manager and Safety Coordinator for individual facilities on a project valued at \$25 million for services described in a large, broadly scoped environmental contract with multiple concurrent delivery orders. Client had many facilities under time constraints due to regulations or property transactions, requiring the project team to perform site assessments and remediation efficiently and effectively. Many facilities were functioning retail facilities. Scheduled and planned fieldwork with individual facility managers so as to minimize service disruption and customer inconvenience. Also performed site work that included soil, water, and vapor assessment, monitoring, pump tests, remediation system design and maintenance, soil excavation, Phase I & II investigations, and report writing.

**Project Manager; Texas Department of Transportation, Remediation Services; November 2011 to present.**

Mr. Bell serves as a project manager for various remediation projects including fuel system removals, pipeline removal and abandonment, asbestos/lead abatement, waste/debris removal and disposal, and water well abandonment projects. His responsibilities include work plan and proposal preparation, project coordination, and reporting.

**Project Manager; Texas Department of Transportation, Storm Water Remediation Services; November 2011 to February 2013.**

Mr. Bell serves as a project manager for the inspection and remedial services related to an illicit discharge in a TxDOT storm sewer into the Houston Ship Channel. Managed the inspection of 6,000 linear feet of storm sewer for infiltration of hydrocarbons and recovery of hydrocarbons at the sewer outfall. Tasks include 24-hour monitoring, boom deployment, surface water clean-up, and coordination with United States Coast Guard, TCEQ, City of Houston, General Land Office, and TxDOT. Project Value \$670,000.

**Project Manager; Texas Department of Transportation, Non-Emergency Remediation Services; August 2008 to 2011.**

Mr. Bell serves as a project manager for various non-emergency projects including fuel system removals, pipeline removal and abandonment, soil excavation and disposals, waste/debris removal and disposal, storm water

sampling, and water well abandonment projects. His responsibilities include work plan and proposal preparation, project coordination, and reporting.

**Project Manager; Site Investigation/Remediation; Schlumberger, Carthage, Texas; June 2011 to December 2012.** Mr. Bell served as Project Manager for the investigation/assessment addressing soil contamination due to a historical release of metals. This project was acquired by Schlumberger through the acquisition of Smith International. During the assessment, Tetra Tech recommended excavating the impacted soil. Schlumberger approved supplemental funding to remove the impacted soil and to increase the chance of a clean closure. PM duties included coordination between facility owner and corporate managers and TCEQ negotiations. The work included preparation of detailed Sampling and Analysis Plan and Health and Safety Plan, installation of soil borings, collection of soil samples for chemical analysis, risk analysis, APAR preparation, and soil excavation/disposal. Project Value: \$80,000

**Project Manager; Site Investigation and CAP Preparation; Schlumberger, Laurel, Mississippi; June 2011 to December 2012.** Mr. Bell served as Project Manager for the investigation/assessment addressing soil contamination due to a historical release of metals. This project was acquired by Schlumberger through the acquisition of Smith International. During the assessment, Tetra Tech prepared a corrective action plan (CAP) to excavate the impacted soil. PM duties included coordination between facility owner and corporate managers and MDEQ negotiations. The work included preparation of detailed Sampling and Analysis Plan and Health and Safety Plan, installation of soil borings and monitoring wells, collection of soil and groundwater samples for chemical analysis, risk analysis, Site Characterization Report preparation, and CAP preparation. Project Value: \$44,000.

**Task Order Manager; Expanded Site Investigation and Feasibility Study; Former Fire Training Area, Former James Connally AFB; USACE Tulsa/Fort Worth District; Waco, Texas; March 2005 to 2017.** Performing HTRW site investigation within the Former James Connally Air Force Base (FJCAFB) property boundaries in compliance with the Formerly Used Defense Sites (FUDS) program. The Former Fire Training Area (FTA), flammable chemicals were burned in open pits and on aircraft parts for fire fighting training. The site is managed concurrently under different state regulations. Performed environmental activities according to Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) regulations and Texas Risk Reduction Program (TRRP). Other Tasks include developing and preparing Work Plans, including Sampling and Analysis Plans, Site Safety and Health Plans, an Affected Property Assessment Report (APAR), Ecological Evaluation, and a Feasibility Study. Also developing and establishing a Community Relations Plan (CRP) including a CERCLA Administrative Record (AR) file consistent with MARKS classification, FUDS Information Improvement (FIIP) Program Management Plan, and Army Records Information Management System (ARIMS). Tetra Tech met with the TCEQ prior to performing field activities to streamline the investigation and decrease cost by minimizing sample collection. Total project is estimated at \$450,000.

**Contract Manager; Scientific Services Contract, Texas Department of Transportation, Various Sites across Texas; October 2009 to Present.** Responsible for contract and project management duties for TxDOT projects including UST location and removal, affected property assessment, landfill investigation, LPST assessment, and corrective action and remediation. Reporting requirements include Affected Property Assessment Reports, release determination reports, groundwater monitoring reports, corrective action plans, drinking water studies, Soil and Groundwater Management Reports, Health and Safety Plans, and site closure reports. Project management tasks included budget tracking, procurement, scheduling, coordination, field activities, serving as site safety officer, and client liaison. The project value is set at \$2,000,000.

**Contract Manager; Class V Injection Well Investigation, Texas Department of Transportation, Various Sites across Texas; October 2005 to June 2009.** Contracted to perform site investigations related to Class V Injection Well Systems at various Texas Department of Transportation (TxDOT) facilities. Each project was broken into two

major tasks: "Release Determination Investigation (RDI)" and "Affected Property Assessment (APA)." The goal of the RDI was to determine if any onsite Class V systems were releasing COCs into the environment. During this task, verified TxDOT database information, reviewed engineered drawings, and conducted interviews with TxDOT personnel. Based on the RDI findings, conducted APA to determine the nature and extent of the environmental impact and to fill any data gaps necessary to prepare an APAR. Other tasks include: scope of work development, cost estimating, contract negotiations, site visits, client and regulatory interactions, IDW management, surveying, budget tracking, subcontractor procurement. Three APARs and 11 RDIs have been completed with four facilities receiving closure. The approach that Tetra Tech took in writing the approach, expedited the closure without additional investigation. Contract value of \$1 million with maximum cap of \$5 million.

**Task Order Manager/ Project Geologist; Affected Property Assessment; Red River Army Depot; USACE Fort Worth District; Texarkana, Texas; August 2001 to January 2007.** Performed an Affected Property Assessment and completed an Affected Property Assessment Report. Produced work plans, supervised fieldwork, and prepared Ecological Risk Assessments, Affected Property Assessment Reports, and Response Action Plans for the post closure care of landfills at the facility. Tasks included reviewing historical data, investigating releases to the environment including sediment, surface water, and groundwater, and response action recommendations. Supervised Malcolm Pirnie in performing multiple tasks under this Task Order. Tetra Tech worked closely with the TCEQ to minimize field investigations and to move toward closure. The landfill has received a "No Further Action" letter and is proceeding with the revocation of the landfill permit. Task Order was valued at \$600,000.

**Task Order Manager/ Project Geologist; RCRA Facility Investigation; Lone Star Army Ammunition Plant; USACE Fort Worth District; Texarkana, Texas; June 2000 to June 2003.** Work included drilling and collection of subsurface and surface soil samples to determine the impact of past operations, including GPS surveying, and generating reports documenting the site sampling activities according to the Texas Natural Resource Conservation Commission Risk Reduction Program. LSAAP is on the National Priority List due to elevated levels of explosives and heavy metals in the soil and the detection of heavy metals in the groundwater. Tetra Tech received closure for the individual units investigated. Task Order is valued at \$180,000.

**Environmental Scientist/ Project Manager; Phase I and Phase II Environmental Site Assessment; Hydrodyne, Inc.; Denver, Colorado; November 1999 to March 2000.** Completed a Phase I environmental site assessment-using ASTM 1527. Performed record searches, personnel interviews, and visual site inspections at a facility that formally manufactured explosive triggering devices for the DOD. Following the Phase I assessment, conducted a Phase II investigation that analyzed for explosives, metals and volatile organics.

**Environmental Scientist; General Services Contract; CITGO North Houston Bulk Terminal, Houston, Texas; October 1996 to 2003.** Researched and satisfied the plant's required permits for compliance with the TNRCC for discharge regulations. Also assisted with maintaining and analyzing the remediation system located on the terminal property. On-going site responsibilities are health and safety audits, groundwater sampling, and remediation system trouble shooting.

#### **CHRONOLOGICAL WORK HISTORY:**

**Program/Project Manager; Tetra Tech, Inc.; Houston, Texas; March 2005 to Present.**

**Operations Manager; ESA Specialists of America, Inc.; Houston, Texas; June 2003 to March 2005.**

**Project Manager; Tetra Tech, Inc.; Houston, Texas; October 1996 to May 2003.**

**Lead Surveyor; Schlumberger; Houston, Texas; June 1996 to October 1996.**

#### **PROFESSIONAL AFFILIATIONS**

Member; Society of American Military Engineers: Tulsa, Fort Worth, and Houston/Galveston Posts

**EXPERIENCE SUMMARY**

While at Texas A&M University, Mr. Richardson acquired basic knowledge of fundamental environmental regulations, remediation technologies and hands-on experience in testing for common contaminants in soil, water, and air. His current duties include aiding in due diligence support and reporting for Phase I Environmental Site Assessments, and other regulatory compliance reports.

**RELEVANT EXPERIENCE**

**Phase I and II Environmental Site Assessments (ESAs); DR Horton; United States; Ongoing.** Mr. Richardson prepares and reviews Phase I ESAs to satisfy due diligence, environmental compliance, and health and safety concerns in multiple states across the United States. The preparation of Phase I ESAs includes conducting a site reconnaissance, records review, and reporting as required by current ASTM standards. Based on the findings of the reports, the client is able to select specific sites to perform additional investigation in order to limit their environmental liability.

**Emergency Spill Response; Kinder Morgan; Galena Park, TX; Ongoing.** Prepare for and respond quickly and safely to emergencies originating from the pipelines and associated facilities. Incident responses can include spills, blowouts, tank explosions, equipment failures, and other situations that require specific expertise and immediate response. The purpose is to provide environmental and remediation techniques/guidelines for achieving an efficient, coordinated, and effective response to emergencies which may occur along the pipeline and/or associated facilities.

**Waste Gas Sampling; Kinder Morgan; Galena Park, TX; Ongoing.** Collect waste gas samples from several locations throughout the splitter facility to ensure compliance with the facility's air permit.

**Soil Assessments; Noble Energy; Gates Ranch; Ongoing.** Perform soil assessments to determine if operations have impacted the shallow soil in equipment areas as part of the decommissioning of these areas.

**Soil Borings and Sampling; CenterPoint Energy; Pasadena, TX; Ongoing.** Delineate the extent of a pipeline release and supervise the work of a third-party consultant to ensure the client's right-of-way is returned to pre-release conditions.

**Groundwater Sampling; Teleflex; Pasadena, TX; Ongoing.** Collect groundwater samples from a network of monitoring wells on a semi-annual basis to measure the

concentration of contaminants within a delineated groundwater plume. Sampling methods include utilization of a peristaltic pump, bladder pump, and Horiba flow through cell.

**Tier II Waste Reporting; Various; Texas; February 2018.** Generated and submitted Tier II waste reports utilizing the EPA Tier2 Submit software for a variety of facilities in Texas to ensure the facilities remain compliant with Section 312 of the Emergency Planning and Community Right to Know Act (EPRCA).

**Groundwater Well Installation; Kinder Morgan; Cuero, TX; January 2018.** Installed and developed groundwater monitoring wells in the vicinity of a pipeline release within a natural gas terminal.

**Naturally Occurring Radioactive Materials (NORM) Surveys; Pioneer; Cuero, TX; June-July 2017.** Measured various pieces of oil/gas production equipment for the presence of NORM as part of the facility decommissioning process.

**Landfill Container Inspections; Waste Management; Conroe, TX; August – September 2017.** Conducted weekly inspections of covered and air-tight roll-off containers of hazardous materials to ensure the containers were in good condition and accounted for. Coordinated the daily removal of the containers until all containers were removed from the facility.

**Tenant Inspections; CBRE/Transwestern; Greater Houston Area, TX; July – September 2017.** Inspected a variety of commercial/industrial warehouse facilities for the storage and production of hazardous materials/wastes and any additional environmental concerns (leaks, spills, stains, etc.).

**Water/Wastewater; Tx-DOT; Zion Hills; November 2016.** Conducted groundwater sampling using the hand bailing method. Assisted with product recovery in wells and collected water samples for lab analysis.

**Soil Borings and Sampling; DR Horton, Texas.** Assisted in soil sampling and hydrocarbon testing via Geoprobe direct push technologies and hand auger. Hydrocarbon testing was conducted using the TNRCC Method 1005.

**Lead-Based Paint (LBP) Abatement; Tx- DOT; Various locations; October 2016.** Health and Safety Officer for LBP abatement activities using hydraulic lifts. Prepared daily photo log reports and maintained a field log book.

**Environmental Specialist; SWCA, Houston, TX; 2016.** Mr. Richardson assisted in delineating wetlands and mapping water bodies in Texas. Mr. Richardson also aided in vegetation and wildlife surveys in the Houston area.

**Environmental and Regulatory Technician; Morris P. Hebert Inc., Houston, Texas; 2015.** Mr. Richardson conducted environmental and regulatory permitting tasks, oyster lease sampling and wetland delineations. Additionally, Mr. Richardson carried out field surveys, prepared survey reports and statements of findings.

Instrument Man, SAM Inc., Houston, TX; 2012, 2013

**EXPERIENCE SUMMARY**

Ms. Jodi Gunning is a new hire to Tetra Tech hired in 2019. Ms. Gunning serves as an Environmental Scientist 1. Her Tetra Tech Portfolio consists of three fire remediation projects. Environmental Unit Leader, Mendocino Complex Fire Incident, Carr Fire Incident and Camp Fire Incident.

**RELEVANT EXPERIENCE**

Ms. Jodi Gunning was an intern fish ecologist for the Monterey Salmon and Trout Project where she assisted in spawning Coho Salmon. Ms. Gunning has raised Coho Salmon fingerlings and studied fish growth over time. She performed general hatchery maintenance tasks to limit spread of airborne diseases.

Ms. Gunning interned for San Mateo County Parks Natural Resources Division where she conducted endangered butterfly surveys of the Mission Blue, Callippee Silverspot and San Bruno Elfín. She completed walking transect surveys as well as plot surveys. Ms. Gunning identified plant species, she used GIS to map host and nectar plants to identify vegetation shifts. Ms Gunning collected and analyzed data for the San Bruno Mountain Habitat Conservation Plan.

**APPENDIX E**  
**USER QUESTIONNAIRE**

# ENVIRONMENTAL SITE ASSESSMENT USER QUESTIONNAIRE

Site/Project Name: MapleLane

---

Location: 903 Manor Blvd., San Leandro, CA 94579

---

In Order to qualify for one of the *Landowner Liability Protections (LLPs)*<sup>1</sup> offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*")<sup>2</sup>, the *user* must provide the following information (if available) to the *environmental professional*. Failure to provide this information could result in a determination that "*all appropriate inquiry*" is not complete. Please explain your answers if appropriate.

**1. Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).**

Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state or local law?

Yes \_\_\_\_\_ No X

**2. Activity and land use limitations (AULs) that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).**

Are you aware of AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

Yes \_\_\_\_\_ No X

**3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).**

As the *user* of this *Environmental Site Assessment (ESA)* do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

---

<sup>1</sup> *Landowner Liability Protections, or LLPs*, is the term used to describe the three types of potential defenses to Superfund liability in EPA's *Interim Guidance Regarding Criteria Landowners Must Meet in Order to Qualify for Bona Fide Prospective Purchaser, Contiguous Property Owner, or Innocent Landowner Limitations on CERCLA Liability* ("Common Elements" Guide) issued on March 6, 2003.

<sup>2</sup> P.L. 107-118.

# ENVIRONMENTAL SITE ASSESSMENT USER QUESTIONNAIRE

Yes \_\_\_\_\_ No  X

**4. Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29).**

Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*?

Yes  X  No \_\_\_\_\_

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*?

Yes \_\_\_\_\_ No \_\_\_\_\_ NA  X

**5. Commonly known or *reasonably ascertainable* information about the *property* (40 CFR 312.30).**

Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases?

Yes \_\_\_\_\_ No  X

For example, as *user*,

(a) Do you know the past uses of the *property*? Yes \_\_\_\_\_ No  X

(b) Do you know of specific chemicals that are present or once were present at the *property*? Yes \_\_\_\_\_ No  X

(c) Do you know of spills or other chemical releases that have taken place at the *property*? Yes \_\_\_\_\_ No  X

(d) Do you know of any environmental cleanups that have taken place at the *property*? Yes \_\_\_\_\_ No  X

## ENVIRONMENTAL SITE ASSESSMENT USER QUESTIONNAIRE

6. The degree of obviousness of the presence or likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

As the *user* of the *ESA* based on your knowledge and experience related to the *property* are there any obvious indicators that point to the presence or likely presence of contamination at the *property*?

Yes \_\_\_\_\_ No X

**To enable Tetra Tech to complete your project, please also respond to the following items.**

- (a) The reason why the Phase I is required: *The City of San Leandro is requesting the full Phase 1 Environmental Site Assessment.*
- (b) The type of *property* (e.g., industrial, commercial, vacant, agricultural, residential, etc.) and type of *property* transaction, for example, sale, purchase, exchange, etc.: *The proposed MapleLane residential development currently consists of approximately 2 acres of commercial land which will be purchased.*
- (c) The complete and correct address for the *property*, including county (a map or other documentation showing *property* location and boundaries is helpful): *See attached Title Report.*
- (d) The scope of services desired for the Phase I (including whether any parties to the *property* transaction may have a required standard scope of services or whether any considerations beyond the requirements of Practice E 1527 are to be considered): *A full Phase 1 Environmental Site Assessment.*
- (e) Identification of all parties who will rely on the Phase I *report*:

City of San Leandro

- (f) Identification of the site contact and how the contact can be reached:

Oronzo "Otto" Catrina  
ocatrina@gmail.com (510) 507-8226  
4484 Hillsborough Drive  
Castro Valley, CA 94546

## ENVIRONMENTAL SITE ASSESSMENT USER QUESTIONNAIRE

(g) Any special terms and conditions which must be agreed upon by the *environmental professional*: *No*

(h) Any other knowledge or experience with the *property* that may be pertinent to the *environmental professional* (for example, copies of any available prior *environmental site assessment reports*, documents, correspondence, etc., concerning the *property* and its environmental conditions. These include, but are not necessarily limited to:

- *ESA reports*,
- *Environment compliance audit reports*,
- *Environmental permits* (for example, *solid waste disposal permits*, *hazardous waste disposal permits*, *wastewater permits*, *NPDES permits*, *underground injection permits*),
- *Registrations for underground and above-ground storage tanks*,
- *Registrations for underground injection systems*,
- *Material safety data sheets*,
- *Community right-to-know plan*,
- *Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans; etc.*,
- *Reports* regarding hydrogeologic conditions on the *property* or surrounding area,
- *Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the property or relating to environmental liens encumbering the property*,
- *Hazardous waste generator notices or reports*,
- *Geotechnical studies*,
- *Risk assessments*, and
- *Recorded AULs*.

See attached:

- *Tetra Tech Phase 1 Environmental Site Assessment Executive Summary*.
- *Soils Report*

(i) *Proceedings Involving the Property* – whether the User knows of:

(a) Any pending, threatened, or past litigation relevant to *hazardous substances* or *petroleum products* in, on, or from the *property*;

Yes \_\_\_\_\_ No   X

## ENVIRONMENTAL SITE ASSESSMENT USER QUESTIONNAIRE

(b) Any pending, threatened, or past administrative proceedings relevant to *hazardous substances* or *petroleum products* in, on, or from the property;

Yes \_\_\_\_\_ No  X

(c) Any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to *hazardous substances* or *petroleum products*;

Yes \_\_\_\_\_ No  X

Please explain any "Yes" answers below.

### PRELIMINARY REPORT

In response to the above referenced application for a policy of title insurance, this company hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Policy or Policies of Title Insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an Exception below or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations of said Policy forms.

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Exhibit A attached. *The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties.* Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Exhibit A. Copies of the policy forms should be read. They are available from the office which issued this report.

**Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Exhibit A of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.**

**It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.**

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

Dated as of July 06, 2018 at 7:30 A.M.

The form of Policy of title insurance contemplated by this report is:

ALTA Extended Loan Policy - 2006

ALTA Extended Owner Policy - 2006

A specific request should be made if another form or additional coverage is desired.

Title to said estate or interest at the date hereof is vested in:

PHIPPIN MANOR PROPERTIES, LLC, A CALIFORNIA LIMITED LIABILITY COMPANY

The estate or interest in the land hereinafter described or referred to covered by this Report is:

A fee.

The Land referred to herein is described as follows:

(See attached Legal Description)

At the date hereof exceptions to coverage in addition to the printed Exceptions and Exclusions in said policy form would be as follows:

1. General and special taxes and assessments for the fiscal year 2018-2019, a lien not yet due or payable.
2. The lien of supplemental taxes, if any, assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.
3. An easement for right of way for public highway and incidental purposes, recorded January 12, 1951 as Book 6333, Page 20 of Official Records.  
In Favor of: County of Alameda  
Affects: Southerly portion
4. A deed of trust to secure an original indebtedness of \$700,000.00 recorded September 02, 2016 as Instrument No. 2016224272 of Official Records.  
Dated: August 31, 2016  
Trustor: Phippin Manor Properties, LLC, a California Limited Liability Company  
Trustee: Bay Commercial Bank  
Beneficiary: Bay Commercial Bank

A document entitled "Assignment of Rents" recorded September 02, 2016 as Instrument No. 2016224273 of Official Records, as additional security for the payment of the indebtedness secured by the deed of trust.

5. Rights of the public in and to that portion of the land lying within any Road, Street, Alley or Highway.
6. Rights of parties in possession.
7. Any facts, rights, interests or claims which would be disclosed by a correct ALTA/NSPS survey.

**Prior to the issuance of any policy of title insurance, the Company will require:**

8. With respect to Phippin Manor Properties, LLC, a California limited liability company:
  - a. A copy of its operating agreement and any amendments thereto;
  - b. If it is a California limited liability company, that a certified copy of its articles of organization (LLC-1) and any certificate of correction (LLC-11), certificate of amendment (LLC-2), or restatement of articles of organization (LLC-10) be recorded in the public records;
  - c. If it is a foreign limited liability company, that a certified copy of its application for registration (LLC-5) be recorded in the public records;
  - d. With respect to any deed, deed of trust, lease, subordination agreement or other document or instrument executed by such limited liability company and presented for recordation by the Company or upon which the Company is asked to rely, that such document or instrument be executed in accordance with one of the following, as appropriate:
    - (i) If the limited liability company properly operates through officers appointed or elected pursuant to the terms of a written operating agreement, such document must be executed by at least two duly elected or appointed officers, as follows: the chairman of the board, the president or any vice president, and any secretary, assistant secretary, the chief financial officer or any assistant treasurer;
    - (ii) If the limited liability company properly operates through a manager or managers identified in the articles of organization and/or duly elected pursuant to the terms of a written operating agreement, such document must be executed by at least two such managers or by one manager if the limited liability company properly operates with the existence of only one manager.
  - e. Other requirements which the Company may impose following its review of the material required herein and other information which the Company may require
9. An ALTA/NSPS survey of recent date which complies with the current minimum standard detail requirements for ALTA/NSPS land title surveys.

**INFORMATIONAL NOTES**

Note: The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than the certain dollar amount set forth in any applicable arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. If you desire to review the terms of the policy, including any arbitration clause that may be included, contact the office that issued this Commitment or Report to obtain a sample of the policy jacket for the policy that is to be issued in connection with your transaction.

1. General and special taxes and assessments for the fiscal year 2017-2018.  
First Installment: \$19,913.81, PAID  
Penalty: \$0.00  
Second Installment: \$19,913.81, PAID  
Penalty: \$0.00  
Tax Rate Area: 10-006  
A. P. No.: 080H-1541-036
  
2. Supplemental taxes for the fiscal year 2016-2017 assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.  
First Installment: \$9,671.28, PAID  
Penalty: \$0.00  
Second Installment: \$9,671.28, PAID  
Penalty: \$0.00  
Tax Rate Area: 10-006  
A. P. No.: 080H-1541-036
  
3. According to the latest available equalized assessment roll in the office of the county tax assessor, there is located on the land a(n) Commercial Structure known as 903 Manor Boulevard, San Leandro, California.
  
4. According to the public records, there has been no conveyance of the land within a period of twenty four months prior to the date of this report, except as follows:

A document recorded September 02, 2016 as Instrument No. 2016224271 of Official Records  
From: Manor Enterprises, a Limited partnership  
To: Phippin Manor Properties, LLC, a California limited liability company

The map attached, if any, may or may not be a survey of the land depicted hereon. First American expressly disclaims any liability for loss or damage which may result from reliance on this map except to the extent coverage for such loss or damage is expressly provided by the terms and provisions of the title insurance policy, if any, to which this map is attached.

APN: 080H-1541-036

***NOTICE***

Section 12413.1 of the California Insurance Code, effective January 1, 1990, requires that any title insurance company, underwritten title company, or controlled escrow company handling funds in an escrow or sub-escrow capacity, wait a specified number of days after depositing funds, before recording any documents in connection with the transaction or disbursing funds. This statute allows for funds deposited by wire transfer to be disbursed the same day as deposit. In the case of cashier's checks or certified checks, funds may be disbursed the next day after deposit. In order to avoid unnecessary delays of three to seven days, or more, please use wire transfer, cashier's checks, or certified checks whenever possible.

**EXHIBIT A**  
**LIST OF PRINTED EXCEPTIONS AND EXCLUSIONS (BY POLICY TYPE)**

**CLTA STANDARD COVERAGE POLICY – 1990**  
**EXCLUSIONS FROM COVERAGE**

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building or zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien, or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
- (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
  - (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
  - (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
  - (c) resulting in no loss or damage to the insured claimant;
  - (d) attaching or created subsequent to Date of Policy; or
  - (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate of interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

**EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART I**

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.  
Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

**CLTA/ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (12-02-13)**  
**EXCLUSIONS**

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
  - a. building;
  - b. zoning;
  - c. land use;

- d. improvements on the Land;
  - e. land division; and
  - f. environmental protection.
- This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.
2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
  3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
  4. Risks:
    - a. that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
    - b. that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;
    - c. that result in no loss to You; or
    - d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.
  5. Failure to pay value for Your Title.
  6. Lack of a right:
    - a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
    - b. in streets, alleys, or waterways that touch the Land.

This Exclusion does not limit the coverage described in Covered Risk 11 or 21.
  7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.
  8. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
  9. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

**LIMITATIONS ON COVERED RISKS**

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:  
For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.  
The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	<u>Your Deductible Amount</u>	<u>Our Maximum Dollar Limit of Liability</u>
Covered Risk 16:	1% of Policy Amount Shown in Schedule A or \$2,500 (whichever is less)	\$10,000
Covered Risk 18:	1% of Policy Amount Shown in Schedule A or \$5,000 (whichever is less)	\$25,000
Covered Risk 19:	1% of Policy Amount Shown in Schedule A or \$5,000 (whichever is less)	\$25,000
Covered Risk 21:	1% of Policy Amount Shown in Schedule A or \$2,500 (whichever is less)	\$5,000

**2006 ALTA LOAN POLICY (06-17-06)**  
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
  - (i) the occupancy, use, or enjoyment of the Land;
  - (ii) the character, dimensions, or location of any improvement erected on the Land;
  - (iii) the subdivision of land; or
  - (iv) environmental protection;

or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.

  - (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
  - (a) created, suffered, assumed, or agreed to by the Insured Claimant;
  - (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;

- (c) resulting in no loss or damage to the Insured Claimant;
  - (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
  - (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
  5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
  6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
    - (a) a fraudulent conveyance or fraudulent transfer, or
    - (b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
  7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

#### EXCEPTIONS FROM COVERAGE

[Except as provided in Schedule B - Part II, [t[or T]his policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:

#### [PART I

[The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

#### PART II

In addition to the matters set forth in Part I of this Schedule, the Title is subject to the following matters, and the Company insures against loss or damage sustained in the event that they are not subordinate to the lien of the Insured Mortgage:]

### 2006 ALTA OWNER'S POLICY (06-17-06)

#### EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
  - (i) the occupancy, use, or enjoyment of the Land;
  - (ii) the character, dimensions, or location of any improvement erected on the Land;
  - (iii) the subdivision of land; or
  - (iv) environmental protection;

or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.

- (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
  - (a) created, suffered, assumed, or agreed to by the Insured Claimant;
  - (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;

- (c) resulting in no loss or damage to the Insured Claimant;
  - (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 or 10); or
  - (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
- (a) a fraudulent conveyance or fraudulent transfer, or
  - (b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

#### EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of: [The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the Public Records.
7. [Variable exceptions such as taxes, easements, CC&R's, etc. shown here.]

#### **ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY (07-26-10)**

#### EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
  - (i) the occupancy, use, or enjoyment of the Land;
  - (ii) the character, dimensions, or location of any improvement erected on the Land;
  - (iii) the subdivision of land; or
  - (iv) environmental protection;

or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.

(b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.

2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
  - (a) created, suffered, assumed, or agreed to by the Insured Claimant;
  - (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
  - (c) resulting in no loss or damage to the Insured Claimant;
  - (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
  - (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the

Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.

7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.
8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.
9. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
  - (a) a fraudulent conveyance or fraudulent transfer, or
  - (b) a preferential transfer for any reason not stated in Covered Risk 27(b) of this policy.
10. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
11. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

## First American Title

### Privacy Information

#### We Are Committed to Safeguarding Customer Information

In order to better serve your needs now and in the future, we may ask you to provide us with certain information. We understand that you may be concerned about what we will do with such information - particularly any personal or financial information. We agree that you have a right to know how we will utilize the personal information you provide to us. Therefore, together with our subsidiaries we have adopted this Privacy Policy to govern the use and handling of your personal information.

#### Applicability

This Privacy Policy governs our use of the information that you provide to us. It does not govern the manner in which we may use information we have obtained from any other source, such as information obtained from a public record or from another person or entity. First American has also adopted broader guidelines that govern our use of personal information regardless of its source. First American calls these guidelines its Fair Information Values.

#### Types of Information

Depending upon which of our services you are utilizing, the types of nonpublic personal information that we may collect include:

- Information we receive from you on applications, forms and in other communications to us, whether in writing, in person, by telephone or any other means;
- Information about your transactions with us, our affiliated companies, or others; and
- Information we receive from a consumer reporting agency.

#### Use of Information

We request information from you for our own legitimate business purposes and not for the benefit of any nonaffiliated party. Therefore, we will not release your information to nonaffiliated parties except: (1) as necessary for us to provide the product or service you have requested of us; or (2) as permitted by law. We may, however, store such information indefinitely, including the period after which any customer relationship has ceased. Such information may be used for any internal purpose, such as quality control efforts or customer analysis. We may also provide all of the types of nonpublic personal information listed above to one or more of our affiliated companies. Such affiliated companies include financial service providers, such as title insurers, property and casualty insurers, and trust and investment advisory companies, or companies involved in real estate services, such as appraisal companies, home warranty companies and escrow companies. Furthermore, we may also provide all the information we collect, as described above, to companies that perform marketing services on our behalf, on behalf of our affiliated companies or to other financial institutions with whom we or our affiliated companies have joint marketing agreements.

#### Former Customers

Even if you are no longer our customer, our Privacy Policy will continue to apply to you.

#### Confidentiality and Security

We will use our best efforts to ensure that no unauthorized parties have access to any of your information. We restrict access to nonpublic personal information about you to those individuals and entities who need to know that information to provide products or services to you. We will use our best efforts to train and oversee our employees and agents to ensure that your information will be handled responsibly and in accordance with this Privacy Policy and First American's Fair Information Values. We currently maintain physical, electronic, and procedural safeguards that comply with federal regulations to guard your nonpublic personal information.

#### Information Obtained Through Our Web Site

First American Financial Corporation is sensitive to privacy issues on the Internet. We believe it is important you know how we treat the information about you we receive on the Internet. In general, you can visit First American or its affiliates' Web sites on the World Wide Web without telling us who you are or revealing any information about yourself. Our Web servers collect the domain names, not the e-mail addresses, of visitors. This information is aggregated to measure the number of visits, average time spent on the site, pages viewed and similar information. First American uses this information to measure the use of our site and to develop ideas to improve the content of our site. There are times, however, when we may need information from you, such as your name and email address. When information is needed, we will use our best efforts to let you know at the time of collection how we will use the personal information. Usually, the personal information we collect is used only by us to respond to your inquiry, process an order or allow you to access specific account/profile information. If you choose to share any personal information with us, we will only use it in accordance with the policies outlined above.

#### Business Relationships

First American Financial Corporation's site and its affiliates' sites may contain links to other Web sites. While we try to link only to sites that share our high standards and respect for privacy, we are not responsible for the content or the privacy practices employed by other sites.

#### Cookies

Some of First American's Web sites may make use of "cookie" technology to measure site activity and to customize information to your personal tastes. A cookie is an element of data that a Web site can send to your browser, which may then store the cookie on your hard drive.

[FirstAm.com](http://FirstAm.com) uses stored cookies. The goal of this technology is to better serve you when visiting our site, save you time when you are here and to provide you with a more meaningful and productive Web site experience.

#### Fair Information Values

**Fairness** We consider consumer expectations about their privacy in all our businesses. We only offer products and services that assure a favorable balance between consumer benefits and consumer privacy.

**Public Record** We believe that an open public record creates significant value for society, enhances consumer choice and creates consumer opportunity. We actively support an open public record and emphasize its importance and contribution to our economy.

**Use** We believe we should behave responsibly when we use information about a consumer in our business. We will obey the laws governing the collection, use and dissemination of data.

**Accuracy** We will take reasonable steps to help assure the accuracy of the data we collect, use and disseminate. Where possible, we will take reasonable steps to correct inaccurate information. When, as with the public record, we cannot correct inaccurate information, we will take all reasonable steps to assist consumers in identifying the source of the erroneous data so that the consumer can secure the required corrections.

**Education** We endeavor to educate the users of our products and services, our employees and others in our industry about the importance of consumer privacy. We will instruct our employees on our fair information values and on the responsible collection and use of data. We will encourage others in our industry to collect and use information in a responsible manner.

**Security** We will maintain appropriate facilities and systems to protect against unauthorized access to and corruption of the data we maintain.

**TETRA TECH**

**PHASE I ENVIRONMENTAL SITE ASSESSMENT  
USER QUESTIONNAIRE**

Please fax the completed questionnaire to (713) 784-2962 or email a scanned copy to nicolas.richardson@tetratech.com. Thank you.

Site/Project Name: **MANOR BOWL**

Location/Address: **887 MANOR BLVD SAN LEANDRO CA. 94579**

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"), the user must provide the following information (if available) to the *environmental professional*. Failure to provide this information could result in a determination that "*all appropriate inquiry*" is not complete. Please explain your answers if appropriate.

**1. Environmental cleanup liens that are filed or recorded against the property (40 CFR 312.25).**

Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law?

 Yes

 No

**2. Activity and land use limitations (AULs) that are in place on the property or that have been filed or recorded in a registry (40 CFR 312.26).**

Are you aware of AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

 Yes

 No

**3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).**

As the user of this Environmental Site Assessment (ESA) do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

 Yes

 No

**4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).**

Does the purchase price being paid for this property reasonably reflect the fair market value of the property?

Yes

No

Unknown

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Yes

No

Not Applicable

**5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).**

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases?

Yes

No

For example, as user,

a) Do you know the past uses of the property?

Yes

No

b) Do you know of specific chemicals that are present or once were present at the property?

Yes

No

c) Do you know of spills or other chemical releases that have taken place at the property?

Yes

No

d) Do you know of any environmental cleanups that have taken place at the property?

Yes

No

**6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).**

As the user of the ESA and based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

Yes

No

To enable us to complete this ESA, please also respond to the following items.

- a) The type of property (e.g., industrial, commercial, vacant, agricultural, residential, etc.) and type of property transaction, for example, sale, purchase, exchange, etc.:

COMMERCIAL

- b) The complete and correct address for the property, including county (a map or other documentation showing property location and boundaries is helpful):

887 MANDR BLVD SAN LEANDRO, CA ALAMEDA CO.

- c) Identification of the site contact and how the contact can be reached:

PAN PHIPPIN 510 589-7333

- d) Any other knowledge or experience with the property that may be pertinent to the environmental professional (for example, copies of any available prior environmental site assessment reports, documents, correspondence, etc., concerning the property and its environmental conditions. These include, but are not necessarily limited to:

- ESA reports,
- Environment compliance audit reports,
- Environmental permits (for example, solid waste disposal permits, hazardous waste disposal permits, wastewater permits, storm water permits, underground injection permits),
- Registrations for underground and aboveground storage tanks,
- Registrations for underground injection systems,
- Safety data sheets,
- Community right-to-know plan,
- Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans; etc.,
- Reports regarding hydrogeologic conditions on the property or surrounding area,
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the property or relating to environmental liens encumbering the property,
- Hazardous waste generator notices or reports,
- Geotechnical studies,
- Risk assessments, and
- Recorded AULs.

- e) Proceedings involving the property – whether the user is aware of:

- a) Any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?

Yes

No

- b) Any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?

Yes

No

- c) Any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or

petroleum products?

Yes

No

Please explain any "Yes" answers below:

Job No. 19-137

## **INTRODUCTION**

This report evaluates potential noise impacts resulting from the proposed Maplelane Multifamily Residential development at 903 Manor Boulevard in the City of San Leandro. The Setting Section of this report presents the fundamentals of environmental noise and vibration, describes regulatory criteria that are applicable in the project's assessment, and summarizes the existing noise environment. The Impacts and Mitigation Measures Section describes the significance criteria used to evaluate project impacts, provides a discussion of each project impact, and presents mitigation measures where necessary to provide a compatible project in relation to surrounding land uses.

## **SETTING**

### **FUNDAMENTALS OF ENVIRONMENTAL NOISE**

Noise may be defined as unwanted sound. Noise is usually objectionable because it is disturbing or annoying. The objectionable nature of sound could be caused by its pitch or its loudness. Pitch is the height or depth of a tone or sound, depending on the relative rapidity (frequency) of the vibrations by which it is produced. Higher pitched signals sound louder to humans than sounds with a lower pitch. Loudness is intensity of sound waves combined with the reception characteristics of the ear. Intensity may be compared with the height of an ocean wave in that it is a measure of the amplitude of the sound wave.

In addition to the concepts of pitch and loudness, there are several noise measurement scales which are used to describe noise in a particular location. A *decibel (dB)* is a unit of measurement which indicates the relative amplitude of a sound. The zero on the decibel scale is based on the lowest sound level that the healthy, unimpaired human ear can detect. Sound levels in decibels are calculated on a logarithmic basis. An increase of 10 decibels represents a ten-fold increase in acoustic energy, while 20 decibels is 100 times more intense, 30 decibels is 1,000 times more intense, etc. There is a relationship between the subjective noisiness or loudness of a sound and its intensity. Each 10 decibel increase in sound level is perceived as approximately a doubling of loudness over a fairly wide range of intensities. Technical terms are defined in Table 1.

There are several methods of characterizing sound. The most common in California is the A-weighted sound level or dBA. This scale gives greater weight to the frequencies of sound to which the human ear is most sensitive. Representative outdoor and indoor noise levels in units of dBA are shown in Table 2. Because sound levels can vary markedly over a short period of time, a method for describing either the average character of the sound or the statistical behavior of the variations must be utilized. Most commonly, environmental sounds are described in terms of an average level that has the same acoustical energy as the summation of all the time-varying events. This energy-equivalent sound/noise descriptor is called  $L_{eq}$ . The most common averaging period is hourly, but  $L_{eq}$  can describe any series of noise events of arbitrary duration.

The scientific instrument used to measure noise is the sound level meter. Sound level meters can accurately measure environmental noise levels to within about plus or minus 1 dBA. Various computer models are used to predict environmental noise levels from sources, such as roadways and airports. The accuracy of the predicted models depends upon the distance the receptor is from the noise source. Close to the noise source, the models are accurate to within about plus or minus 1 to 2 dBA.

**TABLE 1: Definitions of Acoustical Terms Used in this Report**

<b>Term</b>	<b>Definition</b>
Decibel, dB	A unit describing, the amplitude of sound, equal to 20 times the logarithm to the base 10 of the ratio of the pressure of the sound measured to the reference pressure. The reference pressure for air is 20.
Sound Pressure Level	Sound pressure is the sound force per unit area, usually expressed in micro Pascals (or 20 micro Newtons per square meter), where 1 Pascal is the pressure resulting from a force of 1 Newton exerted over an area of 1 square meter. The sound pressure level is expressed in decibels as 20 times the logarithm to the base 10 of the ratio between the pressures exerted by the sound to a reference sound pressure (e.g., 20 micro Pascals). Sound pressure level is the quantity that is directly measured by a sound level meter.
Frequency, Hz	The number of complete pressure fluctuations per second above and below atmospheric pressure. Normal human hearing is between 20 Hz and 20,000 Hz. Infrasonic sound are below 20 Hz and Ultrasonic sounds are above 20,000 Hz.
A-Weighted Sound Level, dBA	The sound pressure level in decibels as measured on a sound level meter using the A-weighting filter network. The A-weighting filter de-emphasizes the very low and very high frequency components of the sound in a manner similar to the frequency response of the human ear and correlates well with subjective reactions to noise.
Equivalent Noise Level, $L_{eq}$	The average A-weighted noise level during the measurement period.
$L_{max}$ , $L_{min}$	The maximum and minimum A-weighted noise level during the measurement period.
$L_{01}$ , $L_{10}$ , $L_{50}$ , $L_{90}$	The A-weighted noise levels that are exceeded 1%, 10%, 50%, and 90% of the time during the measurement period.
Day/Night Noise Level, $L_{dn}$ or DNL	The average A-weighted noise level during a 24-hour day, obtained after addition of 10 decibels to levels measured in the night between 10:00 pm and 7:00 am.
Community Noise Equivalent Level, CNEL	The average A-weighted noise level during a 24-hour day, obtained after addition of 5 decibels in the evening from 7:00 pm to 10:00 pm and after addition of 10 decibels to sound levels measured in the night between 10:00 pm and 7:00 am.
Ambient Noise Level	The composite of noise from all sources near and far. The normal or existing level of environmental noise at a given location.
Intrusive	That noise which intrudes over and above the existing ambient noise at a given location. The relative intrusiveness of a sound depends upon its amplitude, duration, frequency, and time of occurrence and tonal or informational content as well as the prevailing ambient noise level.

Source: Handbook of Acoustical Measurements and Noise Control, Harris, 1998.

Since the sensitivity to noise increases during the evening and at night -- because excessive noise interferes with the ability to sleep -- 24-hour descriptors have been developed that incorporate artificial noise penalties added to quiet-time noise events. The Community Noise Equivalent Level, CNEL, is a measure of the cumulative noise exposure in a community, with a 5 dB penalty added to evening (7:00 pm - 10:00 pm) and a 10 dB addition to nocturnal (10:00 pm - 7:00 am) noise levels. The Day/Night Average Sound Level, DNL or  $L_{dn}$ , is essentially the same as CNEL, with the exception that the evening time period is dropped and all occurrences during this three-hour period are grouped into the daytime period.

**TABLE 2: Typical Noise Levels in the Environment**

Common Outdoor Activities	Noise Level (dBA)	Common Indoor Activities
	110 dBA	Rock band
Jet fly-over at 1,000 feet		
	100 dBA	
Gas lawn mower at 3 feet		
	90 dBA	
Diesel truck at 50 feet at 50 mph		Food blender at 3 feet
	80 dBA	Garbage disposal at 3 feet
Noisy urban area, daytime		
Gas lawn mower, 100 feet	70 dBA	Vacuum cleaner at 10 feet
Commercial area		Normal speech at 3 feet
Heavy traffic at 300 feet	60 dBA	
		Large business office
Quiet urban daytime	50 dBA	Dishwasher in next room
Quiet urban nighttime	40 dBA	Theater, large conference room
Quiet suburban nighttime		
	30 dBA	Library
Quiet rural nighttime		Bedroom at night, concert hall
	20 dBA	
		Broadcast/recording studio
	10 dBA	
	0 dBA	

Source: Technical Noise Supplement (TeNS), Caltrans, November 2013.

**Effects of Noise**

*Sleep and Speech Interference.* The thresholds for speech interference indoors are about 45 dBA if the noise is steady and above 55 dBA if the noise is fluctuating. With intruding noise at 45 dBA conversations at normal vocal levels could be held between two persons at a distance about 10 feet (or across a typical room in a residential setting) and with intruding noise at 55 dBA conversations at normal vocal levels could be held between two persons at a distance of about 3 feet<sup>1</sup> (or the typical distance of persons sitting or standing near one another).

<sup>1</sup> Kryter Karl D., The effects of Noise on Man, Second Edition, Academic Press, Inc. London, 1985, Table 4.4, p.96

Outdoors the thresholds are about 15 dBA higher. Steady noise of sufficient intensity (above 35 dBA) and fluctuating noise levels above about 45 dBA have been shown to affect sleep<sup>2</sup>. Interior residential standards for multi-family dwellings are set by the State of California at 45 dBA  $L_{dn}$ . Typically, the highest steady traffic noise level during the daytime is about equal to the  $L_{dn}$  and nighttime levels are 10 dBA lower. The standard is designed for sleep and speech protection and most jurisdictions apply the same criterion for all residential uses.

Based on I&R's over 30 years of acoustical design and acoustical testing experience we have found that with the use of typical wood framed California construction techniques<sup>3</sup>, the typical exterior to interior attenuation in residential structures is commonly 12-17 dBA with open windows. Based on I&R's design and acoustical testing experience I&R has found that with moderate sized<sup>4</sup> closed windows in good condition the noise attenuation factor is commonly around 20 dBA with older (non-thermally insulating) windows in an older structure and around 25 dBA with thermally insulating windows in a newer dwelling.

Sleep and speech interference are therefore possible when exterior noise levels are about 57-62 dBA  $L_{dn}$  with open windows and 65-70 dBA  $L_{dn}$  if the windows are closed. Levels of 55-60 dBA are common along collector streets and secondary arterials, while 65-70 dBA is a typical value for a primary/major arterial. Levels of 75-80 dBA are normal noise levels at the first row of development outside a freeway right-of-way. In order to achieve an acceptable interior noise environment, bedrooms facing secondary roadways need to be able to have their windows closed, those facing major roadways and freeways typically need special glass windows.

### *Annoyance*

Attitude surveys are used for measuring the annoyance felt in a community for noises intruding into homes or affecting outdoor activity areas. In these surveys, it was determined that the causes for annoyance include interference with speech, radio and television, house vibrations, and interference with sleep and rest. The  $L_{dn}$  as a measure of noise has been found to provide a valid correlation of noise level and the percentage of people annoyed. People have been asked to judge the annoyance caused by aircraft noise and ground transportation noise. There continues to be disagreement about the relative annoyance of these different sources. When measuring the percentage of the population highly annoyed, the threshold for ground vehicle noise is about 50 dBA  $L_{dn}$ . At an  $L_{dn}$  of about 60 dBA, approximately 12 percent of the population is highly annoyed. When the  $L_{dn}$  increases to 70 dBA, the percentage of the population highly annoyed increases to about 25-30 percent of the population. There is, therefore, an increase of about 2 percent per dBA between an  $L_{dn}$  of 60-70 dBA. Between an  $L_{dn}$  of 70-80 dBA, each decibel increase increases by about 3 percent the percentage of the population highly annoyed. People appear to respond more adversely to aircraft noise. When the  $L_{dn}$  is 60 dBA, approximately 30-35 percent of the population is believed to be highly annoyed. Each decibel increase to 70 dBA adds about 3 percentage points to the number of people highly annoyed. Above 70 dBA, each decibel increase results in about a 4 percent increase in the percentage of the population highly annoyed.

## **FUNDAMENTALS OF GROUND BORNE VIBRATION**

Ground vibration consists of rapidly fluctuating motions or waves with an average motion of zero. Several different methods are typically used to quantify vibration amplitude. One method is the

---

<sup>2</sup> Kryter Karl D., The effects of Noise on Man, Second Edition, Academic Press, Inc. London, 1985, p.443-447

<sup>3</sup> Typical California construction for exterior walls are considered to be internally insulated walls framed with either 2x4 or 2x6 wood studs, which have an interior facing of 1 layer of gypsum board and a single layer of siding material (i.e. wood, fiber-cement, or stucco).

<sup>4</sup> Moderate sized windows are considered to comprise 25 to 30% or less of the total exterior wall area of a given room within a residence.

Peak Particle Velocity (PPV) and another is the Root Mean Square (RMS) velocity. The PPV is defined as the maximum instantaneous positive or negative peak of the vibration wave. The RMS velocity is defined as the average of the squared amplitude of the signal. The PPV and RMS vibration velocity amplitudes are used to evaluate human response to vibration. Because PPV values are maximum event levels, while RMS values are average values, the PPV value for a given event will typically be higher and the RMS value of this event. Therefore, in this report, a PPV descriptor with units of in/sec is used to evaluate construction generated vibration for building damage and human complaints. Table 3 displays the reactions of people and the effects on buildings that continuous vibration levels produce<sup>5</sup>.

**TABLE 3: Reactions of People and Damage to Buildings from Continuous or Frequent Intermittent Vibration Levels**

Velocity Level, PPV (in/sec)	Human Reaction	Effect on Buildings
0.01	Barely perceptible	No effect
0.04	Distinctly perceptible	Vibration unlikely to cause damage of any type to any structure
0.08	Distinctly perceptible to strongly perceptible	Recommended upper level of the vibration to which ruins and ancient monuments should be subjected
0.1	Strongly perceptible	Virtually no risk of damage to normal buildings
0.3	Strongly perceptible to severe	Threshold at which there is a risk of damage to older structures such as those with plastered walls or ceilings
0.5	Severe - Vibrations considered unpleasant	Threshold at which there is a risk of damage to newer structures

The annoyance levels shown in Table 3 should be interpreted with care since vibration may be found to be annoying at much lower levels than those shown, depending on the level of activity or the sensitivity of the individual. To sensitive individuals, vibrations approaching the threshold of perception can be annoying. Low-level vibrations frequently cause irritating secondary vibration, such as a slight rattling of windows, doors, or stacked dishes. The rattling sound can give rise to exaggerated vibration complaints, even though there is very little risk of actual structural damage. The Federal Transit Administration has published criteria based on international standards for the effect of vibration on people related to the annoyance and interference with activities in buildings in terms of acceptable maximum rms vibration velocity with one second averaging times<sup>6</sup>.

**Table 4: Human Perception/Activity Interference Criteria**

Building Use	Vibration Velocity Level (VdB)	Velocity Level RMS Amplitude (in/sec)	Description vibration level
Workshop	90	0.032	Distinctly perceptible vibration.
Office	84	0.016	Perceptible vibration.
Residential Day	78	0.008	Barely perceptible vibration.
Residential Night	72	0.004	Vibration not perceptible.

Construction activities can cause vibration that varies in intensity depending on several factors. The use of pile driving and vibratory compaction equipment typically generates the highest construction related groundborne vibration levels. Because of the impulsive nature of such activities, the use of the PPV descriptor has been routinely used to measure and assess groundborne

<sup>5</sup> Transportation and Construction Vibration Guidance Manual, California Department of Transportation, 2013.

<sup>6</sup> International Organization for Standardization, "Evaluation of Human Exposure to Whole-Body Vibration, Part 2: Continuous and Shock-Induced Vibrations in Buildings (1-80Hz)," ISO-23612, 1989.

vibration and almost exclusively to assess the potential of vibration to induce structural damage and the degree of annoyance for humans.

The two primary concerns with construction-induced vibration, the potential to damage a structure and the potential to interfere with the enjoyment of life, are evaluated against different vibration limits. As shown in Table 4 the threshold of perception for average persons ranges from 0.008 to 0.016 in/sec RMS and 0.01 to 0.04 in/sec PPV. Human perception to vibration varies with the individual and is a function of physical setting and the type of vibration. Persons exposed to elevated ambient vibration levels, such as people in an urban environment, may tolerate a higher vibration level.

Structural damage can be classified as cosmetic only, such as minor cracking of building elements, or may threaten the integrity of the building. Safe vibration limits that can be applied to assess the potential for damaging a structure vary by researcher and there is no general consensus as to what amount of vibration may pose a threat for structural damage to the building. Construction-induced vibration that can be detrimental to the building is very rare and has only been observed in instances where the structure is at a high state of disrepair and the construction activity occurs immediately adjacent to the structure.

## **REGULATORY CRITERIA**

The proposed project would be subject to noise-related regulations, plans, and policies established within documents prepared by the State of California and the City of San Leandro. These planning documents are implemented during the environmental review process to limit noise exposure at existing and proposed noise sensitive land uses. Applicable planning documents include: (1) the California Environmental Quality Act (CEQA) Guidelines, Appendix G, (2) State Building Code Limits for multifamily residential uses, (3) the City of San Leandro General Plan, (4) the City of San Leandro Municipal Code, and (5) Construction Vibration Criteria. Regulations, plans, and policies presented within these documents form the basis of the significance criteria used to assess project impacts.

### ***State CEQA Guidelines.***

CEQA requires an evaluation of the significance of potential project noise impacts. Potential noise effects from a project are considered to cause a significant environmental impact if any of the following occur:

- a) exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies;
- b) exposure of persons to or generation of excessive ground-borne vibration or ground-borne noise levels;
- c) a substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project;
- d) a substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project;
- e) for a project located within an airport land use plan or where such a plan has not been adopted within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels;
- f) for a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels?

Checklist items (a), (b), (c), and (d) are relevant to the proposed project. The project is not located in the vicinity of a public or private airstrip; therefore, checklist items (e) and (f) are not carried forward in this analysis.

CEQA does not define what noise level increase would be considered substantial. Typically, project-generated noise level increases of 3 dBA  $L_{dn}$ /CNEL or greater would be considered significant where exterior noise levels would exceed the normally acceptable noise level standard. Where noise levels would remain at or below the normally acceptable noise level standard with the project, noise level increases of 5 dBA  $L_{dn}$ /CNEL or greater would be considered significant.

### ***California Building Code, Title 24, Part 2.***

Section 1207.4 of the current (2016) California Building Code (CBC) states that interior noise levels attributable to exterior sources shall not exceed 45 dB(A)  $L_{dn}$  or CNEL (consistent with the noise element of the local general plan) in any habitable room of a residential dwelling. Though this section does not explicitly apply this interior limit to multifamily residential buildings, in keeping with the requirements of prior editions of the CBC this limit is applied to any habitable room for new dwellings other than detached single-family dwellings.

### ***City of San Leandro 2035 General Plan.***

The goal of the Noise Compatibility section of the Environmental Hazards Element of the San Leandro General Plan is to ensure that noise associated with the day-to-day activities of San Leandro residents and businesses does not impede the peace and quiet of the community. The following policies would be applicable to the proposed project:

**Policy EH-7.1 Noise Compatibility Table.** Ensure that potential noise impacts are considered when new development is proposed. Projects that could significantly increase noise levels should incorporate mitigation measures to reduce such impacts. Apply the standards shown in Chart 7-2 (following) when evaluating applications for future development. Chart 7-2 specifies the maximum noise levels that are normally acceptable, conditionally acceptable, and normally unacceptable for new development. A review of Chart 7-2 indicates that exterior use areas associated with new multi-family residences are considered *normally acceptable* if noise levels up to 65 dBA  $L_{dn}$ , *conditionally acceptable* if noise levels range from 60 to 70 dBA  $L_{dn}$ , *normally unacceptable* if noise levels range from 70 to 75 dBA  $L_{dn}$ , and *clearly unacceptable* if noise levels exceed 75 dBA  $L_{dn}$ .

**Policy EH-7.2 Residential Interior Noise Standard.** As required by the State of California, ensure that interior noise levels in new residential construction do not exceed 45 dB  $L_{dn}$ . For non-residential construction, the acceptable interior noise levels should be determined on a case by case basis, depending on the type of activity proposed.

#### ***Action EH-7.2.A: Insulation Standards***

*Continue to enforce Title 24 insulation standards for all new residential construction, including the interior noise level standard of 45 dBA  $L_{dn}$  in all habitable rooms for dwelling units.*

**Policy EH-7.3 Residential Exterior Noise Standard.** Strive to maintain an exterior noise level of no more than 60 dB  $L_{dn}$  in residential areas. Recognizing that some San Leandro neighborhoods already exceed this noise level, encourage a variety of noise abatement measures that benefit these areas.

**Policy EH-7.4 Degradation of Ambient Noise Levels.** If a neighborhood is well within acceptable noise standards, do not automatically allow noise levels to degrade to the maximum tolerable levels shown in Chart 7-2. A project's noise impacts should be evaluated based on the potential for adverse community response, as well as its conformance to the adopted standards. For CEQA purposes, an increase of 3 dB  $L_{dn}$  should generally be considered a significant adverse impact.

Policy EH-7.6: **Minimizing Noise in New Housing Areas.** In the event that new housing is constructed in areas that exceed normally acceptable noise levels, require project design and construction measures that minimize noise intrusion.

Policy EH-7.9 **Vibration Impacts.** Limit the potential for vibration impacts from construction and ongoing operations to disturb sensitive uses such as housing and schools.

*Action EH-7.9.A: **Vibration Impacts.***

*Adopt Standard Conditions of Approval or Construction Development Standards to reduce the potential for vibration related construction impacts for development projects near sensitive uses. Vibration impacts shall be considered as part of the project-level environmental evaluation and approval process for individual development proposals<sup>7</sup>.*

Policy EH-8.3 **Site Planning and Building Design.** Require new development or redevelopment near freeways, arterials, BART, and major bus routes to incorporate site planning and architectural design measures that reduce the exposure of future building occupants to traffic noise.

Policy EH-8.7 **Sound Wall Design.** Where sound walls are used, encourage aesthetically pleasing and innovative designs and require citizen input in the siting and design process. Require future sound wall engineering and acoustical design studies to address and mitigate the potential for displacement of sound from impacted properties to other properties further away from the noise source.

### ***City of San Leandro Municipal Code***

**Section 4-1-1115** of the San Leandro Municipal Code declares the following to be disturbing, excessive and offensive noises in violation of the Code:

(b) *Construction-related Noise Near Residential Uses.* Construction work or related activity which is adjacent to or across a street or right of way from a residential use, except between the hours of 7 a.m. and 7 p.m. on weekdays, or between 8 a.m. and 7 p.m. on Sunday and Saturday. No such construction is permitted on Federal holidays.

(c) *Conflicts with Residential Uses.* Subject to the restrictions on constructions contained in subdivision (b), the sustained operation or use between the hours of 9 p.m. and 8 a.m. of any electric or gasoline powered motor or engine or the repair, modification, reconstruction, testing or operation of any automobile, motorcycle, sweeper, vacuum, public address system, whistle muffler, motorized scooter, machine or mechanical device or other contrivance or facility unless such motor, engine, automobile, motorcycle, sweeper, vacuum, public address system, whistle muffler, motorized scooter, machine or mechanical device is enclosed within a sound insulated structure so as to prevent noise and sound from being plainly audible from any residential property line.

### ***Construction Vibration***

The City of San Leandro has not identified quantifiable vibration limits that can be used to evaluate the compatibility of land uses with the expected vibration environment, however the City's General Plan has identified that vibration impacts should be considered as part of the project-level environmental evaluation and approval process for individual development proposals so as to

---

<sup>7</sup> *The City intends to adopt a Standard Condition of Approval for new non-residential land uses that are subject to CEQA and require the use of large construction equipment (e.g., vibratory roller, pile drivers) within 50 feet of sensitive receptors (e.g., residential dwelling, classroom): The Condition would stipulate that future proposed projects shall use the best available technology for construction equipment and permanent operations so that vibrations are reduced to a level consistent with FTA guidelines for annoyance and architectural damage. Methods to reduce construction-related vibration include the use of smaller and well-maintained equipment, use of static rollers instead of vibratory rollers, drilling of piles as opposed to pile driving, limitations on construction hours, and guidelines for the positioning of vibration-generating equipment.*

reduce ground vibration to a level consistent with Federal Transit Administration (FTA) guidelines for annoyance and architectural damage. The FTA guidelines establish a construction vibration impact criteria of a Peak Particle Velocity (PPV) level of 0.5 in/second as the threshold for structural damage of modern buildings, such as the wood framed residential structures adjacent to and proposed by the project.

CHART 7-2: SAN LEANDRO LAND USE COMPATIBILITY GUIDELINES

Land Uses	CNEL (dBA)					
	55	60	65	70	75	80
Residential – Low Density Single-Family, Duplex, Mobile Homes	Green	Green	Green	Green	Yellow	Red

## NOISE ENVIRONMENT ON THE PROJECT SITE AND THE SITE VICINITY

The primary ambient source of noise on the project site is traffic on Manor Boulevard, along with existing parking lot and operational noise associated with the Bowling Alley which currently occupies the site. Noise from adjacent commercial uses to the west and residential uses to the north and east were also found to contribute to background noise levels in the area. More distant sound from I-880 only contributed the ambient noise environment on the site during late night and early morning hours when local traffic and adjacent activities were absent or significantly reduced.

A noise monitoring survey was conducted to quantify and characterize ambient noise levels on the project site between noon on Wednesday July 10th and 11 a.m. on Friday July 12th, 2019. The monitoring survey included two long-term, 47-hour duration, noise measurements (LT-1 and LT-2) and one short-term, 10-minute duration, noise measurement (ST-1), as shown in Figure 1. All measurements were made with Larson Davis Model 820 integrating sound level meters, equipped with type I precision microphones. The meters were calibrated with a Larson Davis Model CA250 precision acoustic calibrator and the internal clocks on the meters were set to less than one second of each other to ensure both identical sound level response and simultaneous operation.

**Figure 1: Site, Vicinity and Measurement Locations**

The first long-term noise measurement (see LT-1 on Figure 1) was made at the southern edge of the existing surface parking area on the Manor Bowl Sign at a height of 12 feet above grade and an approximate distance of 25 feet from the centerline of Manor Boulevard. The hourly trends in noise levels measured at the long-term measurement location, including the energy equivalent noise level ( $L_{eq}$ ), and the noise levels exceeded 01, 10, 50 and 90 percent of the time (indicated as

L<sub>1</sub>, L<sub>10</sub>, L<sub>50</sub> and L<sub>90</sub>) are shown on Chart 1, following. The L<sub>eq</sub> noise level is typically considered the average noise level, while the L<sub>1</sub> is considered the intrusive level, the L<sub>50</sub> is considered the median noise level and the L<sub>90</sub> is considered the ambient noise level.

A review of Chart 1 shows that the noise levels at LT-1 measurement site follow a typical diurnal pattern characteristic of traffic noise, where the daytime and nighttime average (L<sub>eq</sub>) noise levels ranged from 65 to 70 dBA and 58 to 67 dBA, respectively, with an average daytime L<sub>eq</sub> of 68 dBA and an average nighttime L<sub>eq</sub> of 63 dBA. The daytime and nighttime ambient (L<sub>90</sub>) noise levels ranged from 51 to 58 dBA and 42 to 52 dBA, respectively, with an average daytime ambient level of 55 dBA and an average nighttime ambient level of 46 dBA. The day-night average noise level (L<sub>dn</sub>) over the measurement period was calculated at 71 dBA.

The second long-term noise measurement (see LT-2 on Figure 1) was made at the northern property line shared with the single-family homes which front on Devonshire Avenue to the north. The monitor was installed on property line fence at a height of 5 feet above grade and at an approximate distance of 425 feet from the centerline of Manor Boulevard and 120 feet from the centerline of Devonshire Avenue. The hourly trends in noise levels measured at the long-term measurement location, are shown on Chart 2, following.

A review of Chart 2 shows that the noise levels at LT-2 measurement site follow a modified diurnal pattern characteristic of distant traffic noise with occasionally significant contributions from local (non-Manor Blvd. traffic) sources. At this measurement position the daytime and nighttime average (L<sub>eq</sub>) noise levels ranged from 44 to 55 dBA and 40 to 57 dBA, respectively, with an average daytime L<sub>eq</sub> of 51 dBA and an average nighttime L<sub>eq</sub> of 46 dBA. The daytime and nighttime ambient (L<sub>90</sub>) noise levels ranged from 42 to 51 dBA and 38 to 49 dBA, respectively, with an average daytime ambient level of 47 dBA and an average nighttime ambient level of 42 dBA. The day-night average noise level (L<sub>dn</sub>) over the measurement period was calculated at 56 dBA.

The Short-term measurement (ST-1 in Figure 1) was made at of the eastern property line of the site shared with the single-family homes which front on Norton Street to the east at the northern edge of the current Bowling Alley parking lot to document the current noise exposure in areas fully exposed t, but at a greater distance from Manor Road. This measurement position corresponds to the center of the development’s proposed common outdoor use area and was setback at an approximate distance of 260 feet from the centerline of Manor Road at a height of 5 feet above grade. The results of this short-term measurement and simultaneous (10-minute duration) noise measurement data at both long-term positions are shown in Table 4, below.

**TABLE 4: Summary of Short-Term Noise Data** (measured 7/10/19 between 12:00 p.m. to 12:10 p.m.)

Site ID	Location	Measured Noise Levels, dBA							
		L <sub>max</sub>	L <sub>01</sub>	L <sub>10</sub>	L <sub>eq</sub>	L <sub>50</sub>	L <sub>90</sub>	L <sub>min</sub>	L <sub>dn</sub>
ST-1	260 ft from center of Manor Blvd.	58	54	50	48	47	44	42	<b>52</b> <sup>1</sup>
LT-1	25 ft from center of Manor Blvd.	81	75	71	66	62	50	46	<b>71</b>
LT-2	425 ft from center of Manor Blvd.	64	62	58	55	54	51	48	<b>56</b>

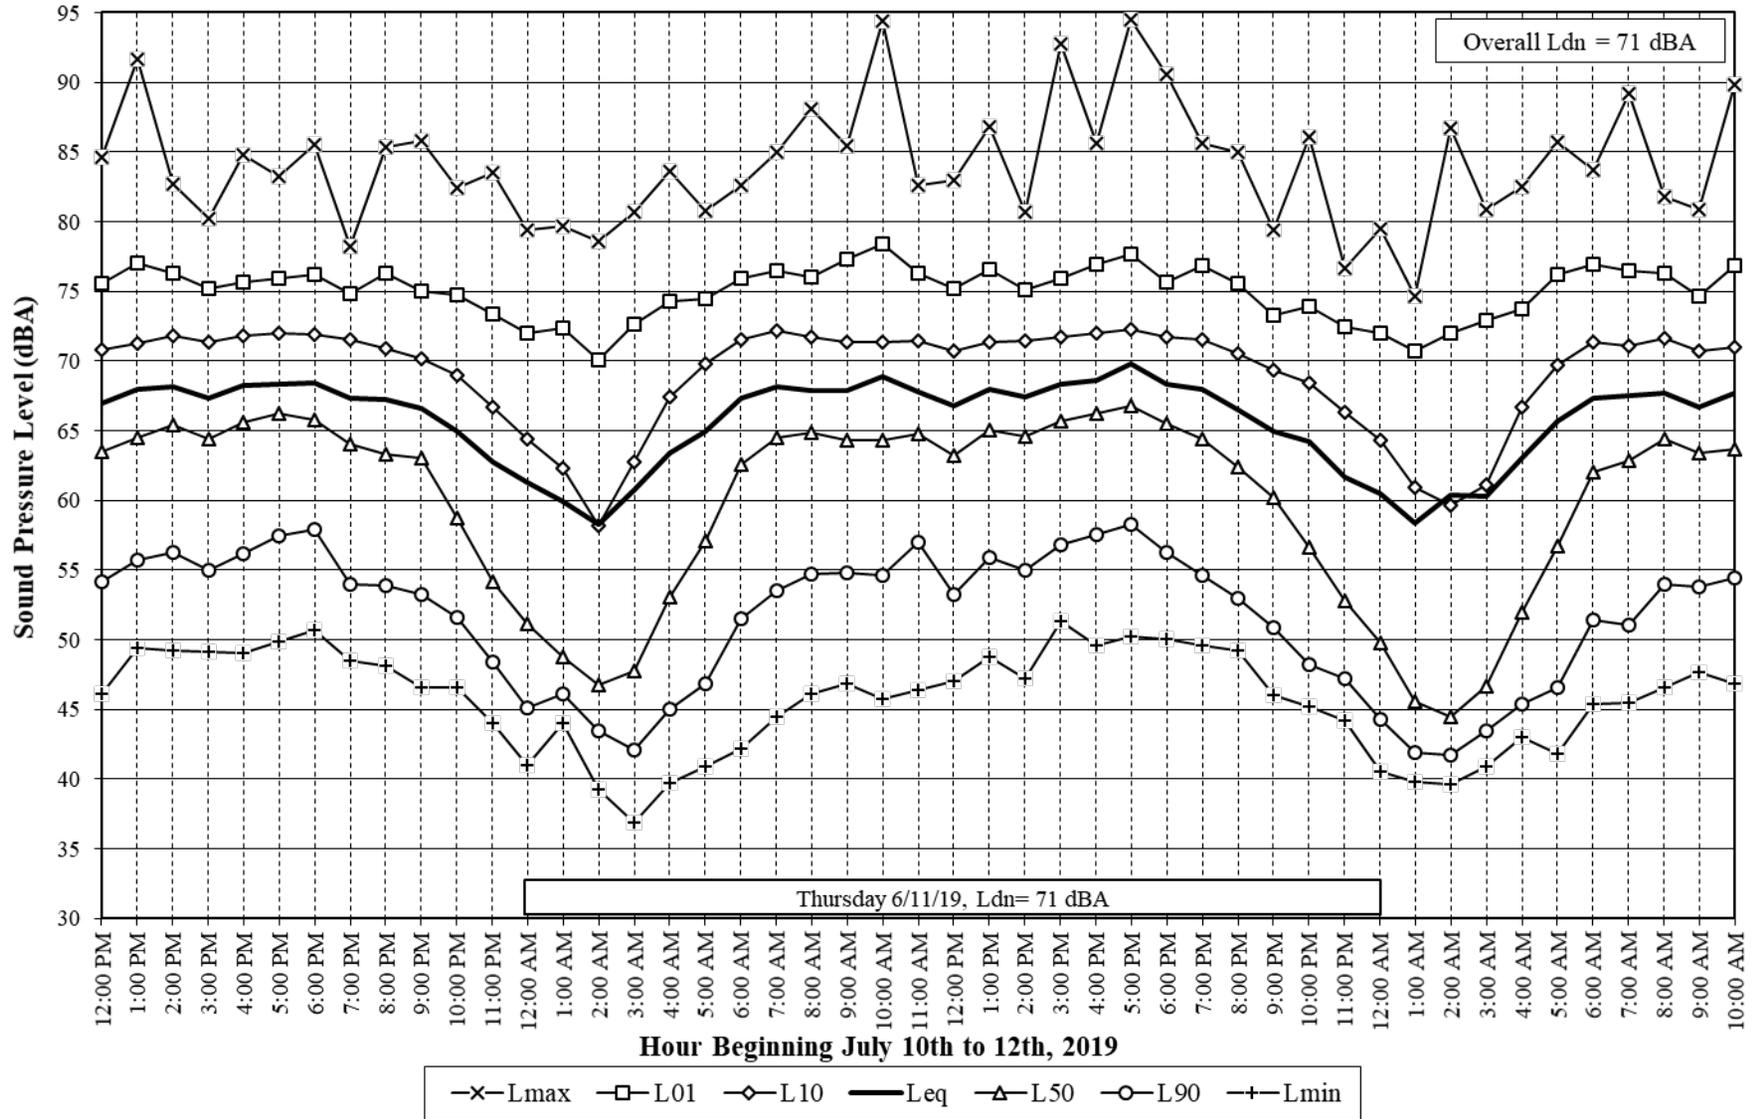

<sup>1</sup> Calculated from average difference in measured L<sub>eq</sub> noise levels from LT-1 and LT-2 to ST-1

## **FUTURE NOISE ENVIRONMENT AT THE PROJECT SITE**

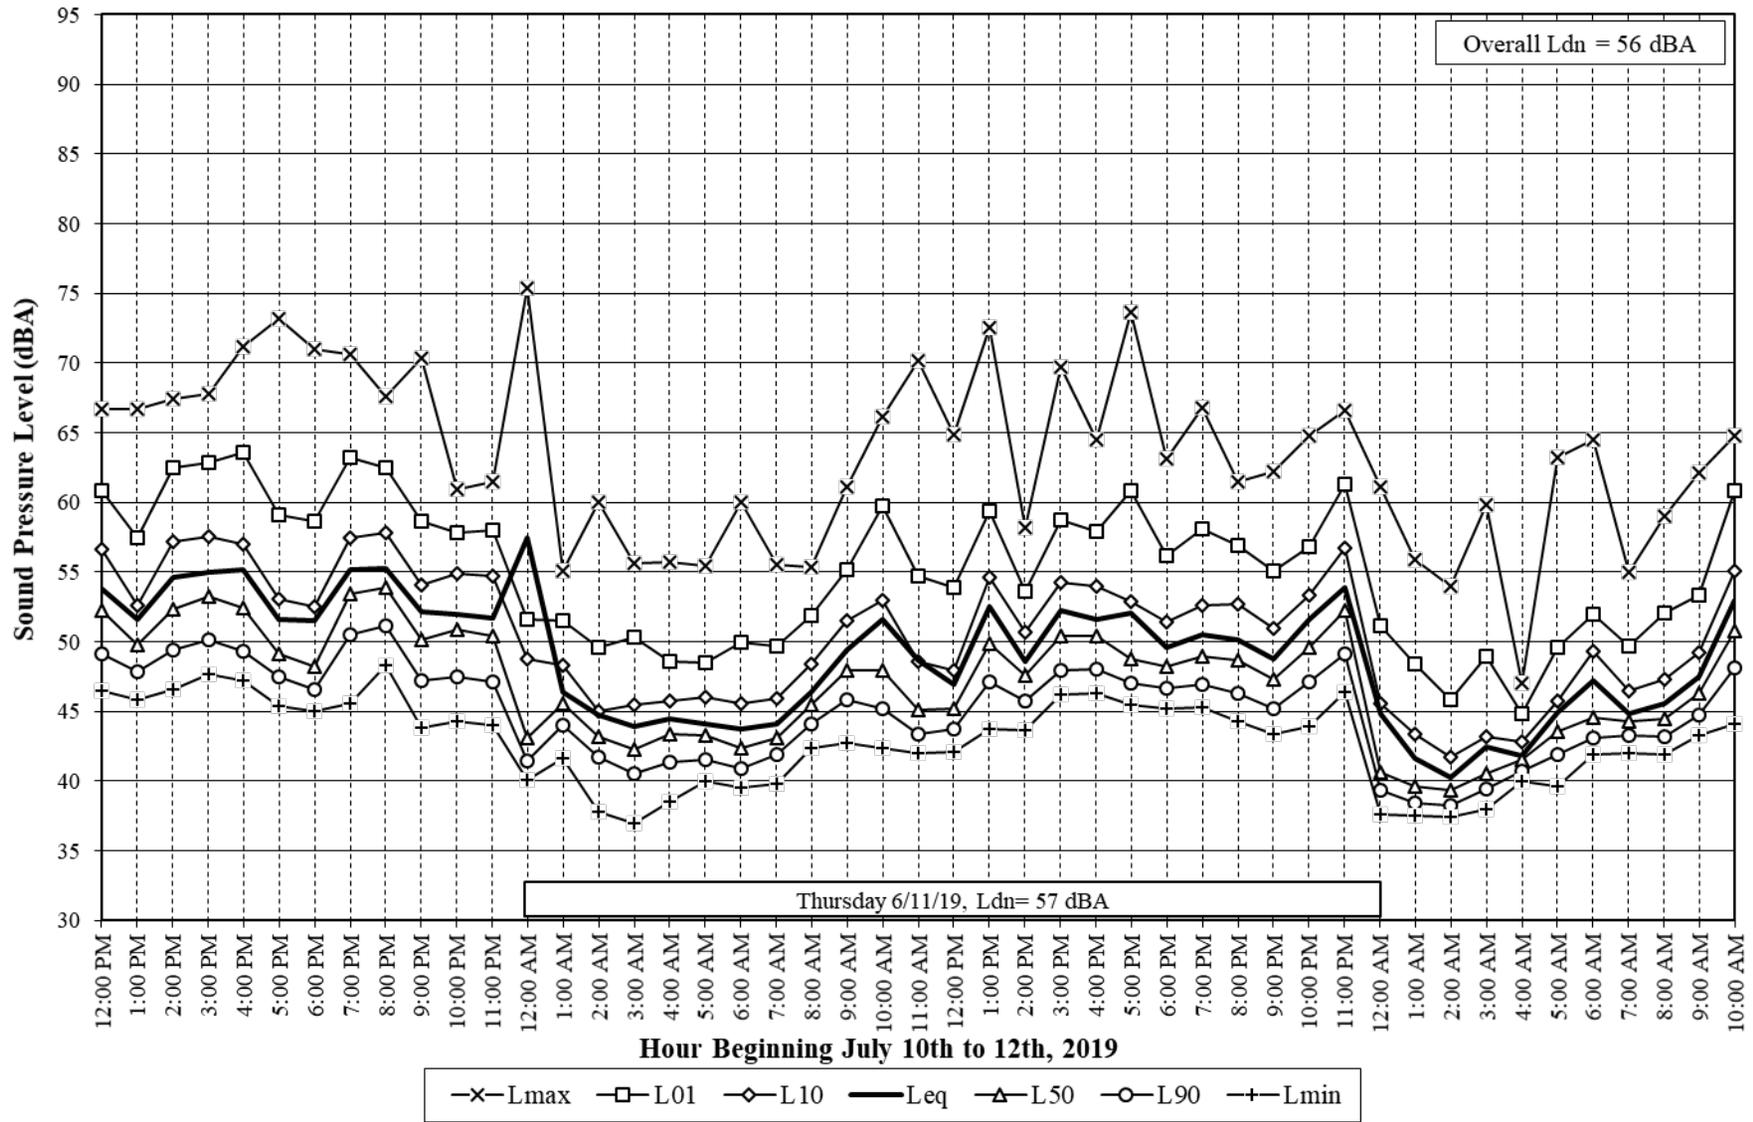

Though the City's General Plan does not contain future traffic projections for Manor Boulevard, however considering the effect of general growth throughout the City and surrounding region, an increase of 1-2% in traffic volume per year on this roadway has been assumed to establish future traffic volumes. Considering this incremental increase, the future noise environment on the project site is expected to increase by approximately 1 decibel over existing noise levels. Such an increase would result in a future  $L_{dn}$  levels of 72 dBA at 25 feet from the roadway centerline and 54 dBA at the setback of the development's common outdoor use area.

A review of project plans indicates that the facades of the proposed residences closest to Manor Boulevard will be setback 40 feet from the roadway centerline. Considering the rate of sound attenuation with distance from Manor Boulevard measured between long term positions and short-term position ST-1, the future  $L_{dn}$  at the facades of the proposed residences closest to Manor Boulevard are expected to be of 70 dBA or less.

### Chart 1: Measured Noise Levels at LT-1

### Chart 2: Measured Noise Levels at LT-2

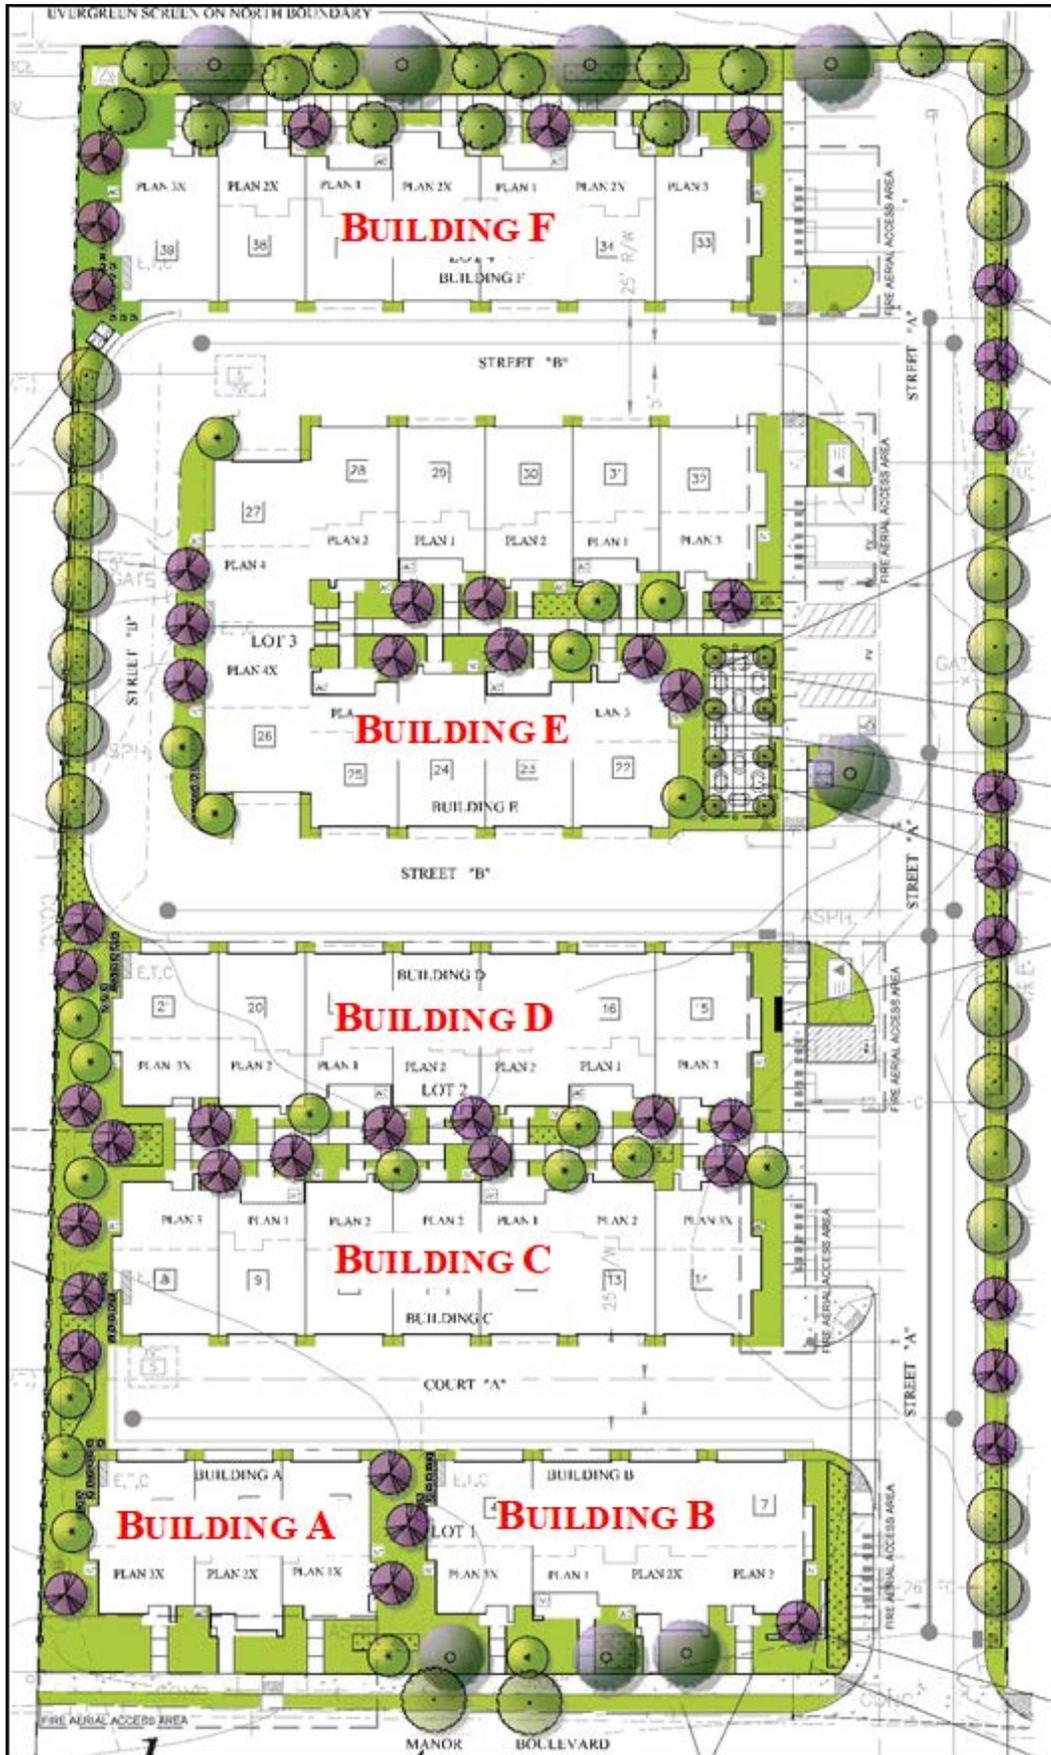

## **NOISE IMPACTS AND MITIGATION MEASURES**

### **Significance Criteria**

Paraphrasing from Appendix G of the CEQA Guidelines, a project would normally result in significant noise impacts if the project would expose future residents and users to noise levels exceeding applicable noise standards, if the project would generate excessive ground-borne vibration levels, or if ambient noise levels at sensitive receivers would be substantially increased over a permanent, temporary, or periodic basis. The following significance criteria were used to evaluate the significance of environmental noise resulting from the project:

- A significant noise impact would result if the project would expose persons to or generate noise levels that would exceed applicable noise standards presented in the General Plan or Municipal Code.
- A significant impact would be identified if the construction of the project would expose persons to damaging or an extended period of disturbing vibration levels. Groundborne vibration levels exceeding 0.5 in/sec PPV would have the potential to result in damage to normal buildings, resulting in a significant impact to adjacent uses.
- Construction activities resulting in groundborne vibration levels exceeding 0.04 in/sec PPV have the potential to result in distinctly perceptible and annoying vibration levels in adjacent structures. While such levels would not result in damage to normal buildings, if this activity were to occur for an extended period of time or during early morning or evening it could result in a significant impact on the adjacent residences.
- A significant impact would be identified if traffic generated by the project would substantially increase noise levels at sensitive receivers in the vicinity. A substantial increase would occur if noise levels with the project would be 3 dBA  $L_{dn}$  or greater above existing conditions.
- A significant noise impact would be identified if construction related noise would result in a substantial temporary increase in ambient noise levels. Construction noise is typically considered significant when noise from construction activities exceed 60 dBA  $L_{eq}$  and the ambient noise environment by at least 5 dBA  $L_{eq}$  for a period of greater than one year or more at exterior areas of noise sensitive residential uses in the project area, or if noise levels produced by construction activities would result in interior noise levels within adjacent residences which could result in significant speech interference. As discussed in the Setting section under the Effects of Noise heading (see page 3), the threshold for speech interference indoors is about 45 dBA if the noise is steady and above 55 dBA if the noise is fluctuating. Thus, constant noise from construction related activities would begin to result in speech interference at a level of 45 dBA, while maximum noise from construction related activities would result in speech interference at a level of 55 dBA or above. Also, per the preceding Fundamentals of Environmental Noise discussion typical structural attenuation is as low as 12 dBA with open windows, around 20 dBA for an older structure with closed windows in good condition and around 25 dBA for newer dwellings. Considering that the existing adjacent residences are not new, but generally in good condition, a consideration that neighbors would generally choose to close their windows for other reasons in addition to noise control during periods of heavy, close construction, and that most construction noise levels are fluctuating in nature, residential speech interference is considered possible when noise levels at the exterior facades of residences in the project vicinity reach average ( $L_{eq}$ ) levels of 65 dBA or maximum ( $L_{max}$ ) noise levels of 75 dBA.

**Figure 2: Proposed Site Plan**

**Impact 1: Noise and Land Use Compatibility.** Exterior noise levels at portions of the project site would exceed the City’s maximum acceptable outdoor noise exposure standard for residential land uses. **This is a potentially significant noise impact**

Based on a review of the project site plan and the results of the existing noise measure survey and future noise predictions (above), the project has been found to include noise protected common outdoor use area for project residences adjacent to Building E (see Figure 2). Exterior noise levels in this area will be below an  $L_{dn}$  of 60 dBA, a level which would be considered “Normally Acceptable” for multifamily residential outdoor use areas.

However, the southern residential facades facing Manor Boulevard of the first-row buildings (Buildings A and B, see Figure 2) would be exposed to an  $L_{dn}$  of 70 dBA under future conditions. Noise levels at the eastern and western facades of these closest buildings would also be exposed to levels of between 67 and 70 dBA  $L_{dn}$ . Due to the effect of distance attenuation and building shielding future exterior noise levels on the facades of all other homes are expected to be exposed to an  $L_{dn}$  of 65 dBA or less.

In areas exposed to an  $L_{dn}$  of 65 dBA or more, the City’s General Plan standard requires that new construction or development be undertaken only after a detailed noise analysis is made and noise reduction measures are identified and included in the project design. To facilitate this, the exterior to interior noise reduction needed to meet the City and State 45 dBA  $L_{dn}$  interior noise level criterion within residential units at the project site was calculated on a unit-by-unit basis using current site, building and unit plans and elevations.

**Mitigation Measure 1:** To meet the City and State 45 dBA  $L_{dn}$  interior noise level criterion within residential units the following window and exterior door sound isolation ratings and mechanical ventilation requirements should be incorporated in the project design and construction:

1. Residential windows and doors on the southern façade of Buildings A and B (facing Manor Boulevard) will require a minimum STC rating of 30,
2. Residential windows and doors on the eastern and western facades of Buildings A and B (perpendicular to Manor Blvd.) will require a minimum STC rating of 28,
3. The northern facades of Buildings A and B (opposite Manor Blvd.) will be exposed to an  $L_{dn}$  of less than 60 dBA under future conditions and thus Standard thermal insulating windows and weather sealed doors will be sufficient at these facades.
4. Because they will be exposed to a future  $L_{dn}$  of greater than 60 dBA all residences in Buildings A and B will require mechanical ventilation to provide a habitable interior environment with windows closed for the purpose of noise control.
5. The southern, eastern and western facades of Building C may be exposed to  $L_{dn}$  levels of between 60 and 65 dBA  $L_{dn}$ , and while standard thermal insulating windows and weather sealed doors will be sufficient to reduce exterior noise within the residential interiors to meet the 45 dBA  $L_{dn}$  interior noise level criterion, all residences in Building C will require mechanical ventilation to provide a habitable interior environment with windows closed for the purpose of noise control<sup>8</sup>.
6. Residential windows and doors at all other buildings in the development are expected to be exposed to an  $L_{dn}$  of less than 60 dBA under future conditions and will thus not require specific STC ratings or mechanical ventilation.

---

<sup>8</sup> In our experience a standard central air conditioning system or a central heating system equipped with a ‘summer switch’, which allows the fan to circulate air without furnace operation in each residence will provide such a habitable interior environment.

### Significance after Mitigation

The implementation of the windows and doors STC rating and mechanical ventilation requirements in Mitigation Measure 1 will allow interior noise levels within the project residences to meet the City and State 45 dBA  $L_{dn}$  interior noise level criterion and reduce this noise impact to a less than significant level.

**Impact 2: Exposure to Groundborne Vibration.** Homes and businesses in the vicinity of the project site could be exposed to construction related vibration during demolition of existing site structures, site preparation and building foundation work. **This is a less-than-significant impact.**

Construction activities would include demolition of existing site structures, site preparation work, foundation work, and new building framing. Removal of the existing building and pavement on the site and site regrading is expected to be completed within one month (3 weeks for site demolition and 10 days of grading). These site activities may, at times, produce substantial vibration and can be expected to result in periods where vibration within homes and businesses adjacent to the site exceed the 0.04 in/sec PPV annoyance threshold. However, the erection of the building structures themselves is not anticipated to be a source of substantial vibration with the exception of sporadic events such as dropping of heavy objects. Home construction on the site is expected to take place over a 20-month period. Considering this, construction vibration is only expected to have the potential to impact neighboring uses for a one-month period and is not expected to result in perceptible vibration for most of project construction period.

Based on a review of the existing site, surrounding uses and the proposed site plan, structures of the residences and businesses adjacent to the project will be located within 12 to 30 feet of vibration inducing parking lot removal and building demolition activities, and 12 to 40 feet from site excavation and grading activities. All adjacent buildings appear to be of normal (non-historic or weaken) type construction. Groundborne vibration levels exceeding 0.50 in/sec PPV (peak particle velocity) would thus, have the potential to result in damage to these adjacent buildings. Table 8, following, presents typical vibration levels that could be expected from construction equipment at distances of 12 and 40 feet.

**TABLE 5: Vibration Source Levels for Construction Equipment**

Equipment	PPV at 12ft. (in/sec)	PPV at 40 ft. (in/sec)
Vibratory Roller (undefined tonnage) <sup>1</sup>	0.44	0.13
2-ton Vibratory Roller <sup>2</sup>	0.29	0.09
Hoe Ram <sup>1</sup>	0.19	0.06
Large bulldozer <sup>1</sup>	0.19	0.06
Caisson drilling <sup>1</sup>	0.19	0.06
Loaded trucks <sup>1</sup>	0.16	0.05
Jackhammer <sup>1</sup>	0.07	0.02
Small bulldozer <sup>1</sup>	0.01	0.002

Note: PPV at reported distances calculated using vibration data from the following sources:

1. Source: Transit Noise and Vibration Impact Assessment, United States Department of Transportation, Office of Planning and Environment, Federal Transit Administration, May 2006.
2. Source: Dowding, C.S., Construction Vibrations, Prentice Hall, 1996, page 249.

A review of Table 5 indicates that at a distance of 12 feet, all construction activities would be below the 0.5 in/sec PPV building damage threshold. Considering this and that the once the grading and foundations work is complete the erection of the buildings on the site themselves is not

anticipated to be a source of substantial vibration, we find that the potential for the project to expose adjacent uses to groundborne vibration a less than significant impact.

**Mitigation Measure 2:** None needed.

**Impact 3: On-Site Project Operational Noise.** Noise due to the use and occupation of the project residences on adjacent noise sensitive uses is not expected to significantly increase or alter the existing noise environment at these uses. **This is a less-than-significant impact.**

The proposed project would place new multifamily residential uses adjacent to noise sensitive existing single-family residential uses to the north and east. The occupation and use of the proposed residences can be expected to result in noise typically associated with residential development, such as voices of the new residents. Though the noise environment may change noticeably in some areas due to the occupation of the new residences, noise associated with residential voices and activities is generally considered to be compatible with the adjacent residential uses.

Mechanical equipment associated with the proposed residential building will include Heating Ventilation and Air Conditioning (HVAC) systems. The primary outdoor noise producing component for residential HVAC systems is the outdoor condensing units, which based on a review of project plans will be located as close as 25 feet from the northern property line and 55 feet from the eastern property line. Based on measurements I&R has conducted the average A-weighted sound level of typical outdoor condensing units for moderate sized homes typically ranges from 67 to 68 dBA at 3 feet from the units. Considering that sound from a fixed-point noise source such as an outdoor condenser typically attenuates at a rate of 6 dBA per distance doubling this would result in sound levels of 49 to 50 dBA at 25 feet. Considering this level and that the project proposes to install an 8-foot high solid wood fence on the property lines shared with the existing single-family residential uses to the north and east, it is expected that noise from project HVAC systems would be lowered by a minimum of 8 dBA on the properties of these adjacent uses. Considering this it is expected that even with continuous operation project generated HVAC noise would produce an hourly average level of less than 42 dBA on the adjacent single-family residential properties. This level would be less than the existing average ambient ( $L_{90}$ ) noise level measure at the northern property line, furthest from existing site and traffic noise sources (LT-2).

The project also includes a driveway and parking areas adjacent to the property line shared with the single-family residential uses to the east. This project element has the potential to introduce a new, dissimilar, type of noise source into the existing noise environment, particular at the residential uses on the northern part of the eastern property line which previously bordered the Bowling alley and not it's parking lot. Noise associated with driveway and parking activities is typically dominated by the sounds of passing cars, engine starts, and door slams. At 40 feet, the average distance of a parked car to the property line, noises from parking activities such as engine starts, and door slams noises would range from 54 dBA to 64 dBA, and at 15 feet, the approximate distance from the driveway centerline to the property line, cars traveling at 15 to 20 mph would produce sound levels of 61 to 66 dBA. Considering these levels and the sound attenuation provided by proposed 8-foot high solid wood fence on the property line discussed above, noise from parking activities would range from 46 dBA to 56 dBA and auto passby noise would range from 53 to 58 dBA. Given the size of the development we would expect that these maximum noise levels from automobile parking and driveway activities on a typical day would occur less than 15 minutes out of any hour. This level of activity would result in an equivalent hourly  $L_{eq}$  of less than

50 dBA on the adjacent single-family residential properties, a level which is less than the existing average hourly daytime noise level measure at the residential property line furthest from existing site and traffic noise sources (LT-2).

Considering these conclusions, we find that noise resulting from the use and occupation of the project residences exceed existing levels at the adjacent residential uses and would result in a less than significant impact.

**Mitigation Measure 3:** None needed.

**Impact 4: Off-Site Existing or Cumulative Traffic Noise Increases.** Project traffic would not substantially increase existing or cumulative traffic noise levels along area roadways. **This is a less-than-significant impact.**

Though no traffic study was reviewed for this analysis, considering the size of the project related to the relative traffic volumes on Manor Boulevard, vehicular traffic generated by the project is not expected to increase noise levels substantially in the area as project traffic would make up only a small percentage of the total traffic along area roadways. Vehicular traffic noise levels are not expected to increase measurably above existing levels as a result of the project (increase would be less than 1 dBA  $L_{dn}$ ). This is a less-than-significant impact, as the noise level increase would not be measurable or noticeable.

**Mitigation 4:** None needed.

**Impact 5: Construction Noise.** During project construction, adjacent businesses and residences would be intermittently exposed to high noise levels. **This is a less-than-significant impact with the incorporation of mitigation.**

Where noise from construction activities exceeds 60 dBA  $L_{eq}$  and the ambient noise environment by at least 5 dBA  $L_{eq}$  at noise-sensitive uses in the project vicinity for a period exceeding one year, or where noise levels produced by construction activities result in average noise levels of 65 dBA or maximum noise levels of 75 dBA or more at the exterior of the adjacent residences, the impact would be considered significant.

The construction of the project would generate noise and would temporarily increase noise levels at adjacent residential receivers. Noise impacts resulting from construction depend on the noise generated by various pieces of construction equipment operating on site, the timing and duration of noise generating activities, and the distance between construction noise sources and noise sensitive receptors. Construction noise impacts primarily result when construction activities occur during noise-sensitive times of the day (e.g., early morning, evening, or nighttime hours), the construction occurs in areas immediately adjoining noise-sensitive land uses, or when construction lasts over extended periods of time.

Demolition and removal of the existing site structures, paving and other features is expected to be completed in three weeks, site grading is expected to be complete in 10 days, and construction of the six multifamily residential buildings on the site is expected to occur in phases with the construction of the first building currently proposed to begin in June of 2020 and the last residential building complete 20 months later in February of 2022. Though this schedule indicates that site construction will be occurring in some form for almost two building seasons, the Construction noise levels would vary by stage and vary within stages based on the amount of equipment in operation and location where the equipment is operating.

Single family residential property lines and structures to the north will, respectively be as close as 20 and 40 feet from the perimeter of project buildings and single-family residential property lines and structures to the east will, respectively be as close as 60 and 90 feet from the perimeter of project buildings. Typical average noise levels at a distance of 50 feet by construction work phase are shown in Table 9 and the maximum noise level for various types of construction equipment are shown in Table 10.

**TABLE 9: Typical Ranges of  $L_{eq}$  Construction Noise Levels at 50 Feet, dBA**

Construction Phase	All pertinent equipment present at Site	Minimum required equipment present at Site.
Ground Clearing	83	83
Excavation	88	75
Foundations	81	81
Erection	81	65
Finishing	88	72

Generator (25 KVA or less)	70	Vibratory Compactor	80
Gradall	85	Vibratory Pile Driver	95
Grader	85	All other equipment with engines larger than 5 HP	85
Grinder Saw	85		

Notes: <sup>1</sup> Measured at 50 feet from the construction equipment, with a "slow" (1 sec.) time constant.

<sup>2</sup> Noise limits apply to total noise emitted from equipment and associated components operating at full power while engaged in its intended operation.

As determined from Tables 9 and 10 and considering that sound levels at 40 feet may be up to 2 dBA higher than those shown in the Tables, average construction noise levels during ground clearing and excavation could reach 85 dBA ( $L_{eq}$ ) with maximum noise levels reaching 87 to 92 dBA at the closest adjacent residences to the project site. Though, as construction moves away from residences or into shielded locations, noise exposures would be lower, construction noise levels would exceed 65 dBA  $L_{eq}$  and 75 dBA  $L_{max}$  during construction at the closest residences. **This is considered a significant impact, which can be reduced to a less than significant level with the incorporation of mitigation.**

### **Mitigation Measure 5:**

The applicant shall develop a construction mitigation plan with input from adjacent noise-sensitive land uses so that construction activities can be scheduled to minimize noise disturbances. Considering the potential for substantial increases in noise at adjacent residences as a result of project construction, the following conditions shall be incorporated into contract agreements:

- a) Pursuant to the Municipal Code, restrict noise-generating activities including construction traffic at the construction site or in areas adjacent to the construction site to the hours of 7:00 a.m. and 7:00 p.m. on weekdays, and to between the hours of 8:00 a.m. and 7:00 p.m. on Saturdays and Sundays, with no construction on Federal holidays.
- b) Do not allow machinery to be cleaned or serviced past 7:00 p.m. or prior to 7:00 a.m. Monday through Friday or 8:00 a.m. on Saturdays and Sundays.
- c) Install a temporary construction noise barrier with a height of 8 feet above grade on the project property lines shared with the residential properties to the north and east before loud construction activities begin and keep in place until construction within 150 feet of the barrier location is complete. The placement of the barriers should not allow clear line of sight, or openings for site access between the site activities and adjacent residential land uses. The barriers may be composed of mass loaded construction blankets on temporary fencing or solid plywood construction barriers and should have a minimum surface weight of 1.0 lb. /ft<sup>2</sup> and an equivalent STC rating of 25 or more.
- d) Muffle and maintain all equipment used on site. All internal combustion engine-driven equipment shall be fitted with mufflers, which are in good condition. Good mufflers shall result in non-impact tools generating a maximum noise level of 80 dB when measured at a distance of 50 feet.
- e) Utilize “quiet” models of air compressors and other stationary noise sources where technology exists.
- f) Locate stationary noise-generating equipment as far as possible from sensitive receptors when sensitive receptors adjoin or are near a construction project area.
- g) Prohibit unnecessary idling of internal combustion engines.
- h) Prohibit construction workers’ radios which are audible on adjoining properties.
- i) Restrict noise-generating construction activities at the site or in areas adjacent to the construction site to the hours between 8:00 a.m. and 5:00 p.m., Monday through Friday.
- j) Limit the allowable hours for the delivery of materials or equipment to the site and truck traffic coming to and from the site for any purpose to Monday through Friday between 7:00 a.m. and 6:00 p.m.
- k) Do not allow any construction or construction-related activities at the project site on Weekends and holidays.
- l) Allowable construction hours shall be posted clearly on a sign at the construction site.
- m) The construction contractor shall designate a “noise disturbance coordinator” who will be responsible for responding to any local complaints about construction noise. A telephone number for the disturbance coordinator shall be conspicuously posted at the construction site. The Disturbance Coordinator shall:
  1. Receive and act on complaints about construction disturbances during site clearing, excavation, infrastructure installation, road building, residential construction, and site other construction activities.
  2. Determine the cause(s) and implement remedial measures as necessary to alleviate significant problems.
  3. Clearly post his/her name and phone number(s) on a sign at the construction site.
  4. Notify area residents of construction activities, schedules, and potential impacts.

**Significance after Mitigation**

The implementation of Mitigation Measure 5 will reduce average ( $L_{eq}$ ) construction related noise levels to less than 65 dBA levels at exterior areas of residential uses in the project vicinity and maximum ( $L_{max}$ ) construction related noise levels to less than 75 dBA at the exterior facades of residences in the project vicinity and reduce construction related noise impacts to a less than significant level.

Trip Generation Report

# HEXAGON TRANSPORTATION CONSULTANTS, INC.

---

October 11, 2019

Mr. Casey Jones  
D.R. Horton  
6683 Owens Drive  
Pleasanton, CA 94588

**Re: *Trip Generation for the Proposed Development Project Located at 903 Manor Blvd. in San Leandro, California***

Dear Mr. Jones:

Hexagon Transportation Consultants, Inc has completed a trip generation analysis for the proposed project for new townhomes at 903 Manor Blvd in San Leandro, California. The project includes 39 attached townhomes with individual 2 car garages. This development will be replacing an existing bowling alley that consists of 30 lanes.

Through empirical research, data have been collected that quantify the amount of traffic produced by many types of land uses. Thus, for many land uses there are standard trip generation rates that can be applied to help predict the future traffic increases that would result from a new development. The trip generation research is compiled and published in the Institute of Transportation Engineers' (ITE) manual entitled *Trip Generation, 10th Edition* (2017). The rates published for Single Family Detached Housing (Land Use 210) were used to estimate the trips that will be generated by the proposed development. The ITE manual does not include a category for attached townhomes with individual garages. The use of the single-family detached housing category presents a conservative analysis because it has the highest rate of trips per unit. Table 1 shows that the proposed townhomes would generate 29 AM peak hour trips (7 inbound and 22 outbound) and 39 PM peak hour trips (25 inbound and 14 outbound), when treated as single-family homes.

The existing occupied building's trip generation can be credited against the proposed residential development, given that with the demolition of the existing land uses, their associated traffic would disappear. Trip generation of the existing bowling alley was estimated based on the Bowling Alley category in the ITE Trip Generation Manual (Land Use 437). The existing bowling alley is estimated to generate 44 AM peak hour trips (42 inbound and 4 outbound) and 39 PM peak hour trips (25 inbound and 14 outbound).

After applying the ITE trip rates and existing site trip credits, the proposed residential development would generate 16 fewer AM peak hour trips (35 less inbound and 19 more outbound) and 0 new PM peak hour trips.

In conclusion, the project would not generate a traffic increase in the area. There is not a need to conduct further traffic analysis.

**Table 1  
 Proposed Project Trip Generation**

Land Use	Size	Daily		AM Peak Hour			PM Peak Hour					
		Rate	Trips	Rate	In	Out	Total	Rate	In	Out	Total	
<b>Proposed Use</b>												
Single-Family Detached Housing	39 units	9.44	368	0.74	7	22	29	0.99	25	14	39	
<b>New Project Trips</b>						<b>7</b>	<b>22</b>	<b>29</b>		<b>25</b>	<b>14</b>	<b>39</b>
<b>Existing Use</b>												
Bowling Alley <sup>2</sup>	30 lanes	N/A	N/A	1.48	42	2	44	1.30	25	14	39	
<b>Net Project Trips</b>						<b>-35</b>	<b>19</b>	<b>-16</b>		<b>0</b>	<b>0</b>	<b>0</b>

Notes:  
<sup>1</sup> Single-Family Detached Housing (Land Use 210) based on ITE's Trip Generation, 10th Edition, average rates.  
<sup>2</sup> Bowling Alley (Land Use 437) based on ITE's Trip Generation, 10th Edition, average rates.

Sincerely,  
**HEXAGON TRANSPORTATION CONSULTANTS, INC.**

Will-Serve Letter from Waste Management

**WASTE MANAGEMENT OF  
ALAMEDA COUNTY**

172 98<sup>TH</sup> Avenue  
Oakland, CA 94603-1004  
(510) 430 8509  
(510) 633 0106 Fax

October 21, 2019

Dominic Carucci  
RUGGERI-JENSEN-AZAR  
4690 Chabot Drive, Suite 200  
Pleasanton, CA 94588

Dear Mr. Carucci,

Waste Management of Alameda County, Inc. will service Court A at the Maple Lane project in San Leandro for trash, recycling, and organics. As long as the cart or container staging and service area is accessible to our collection vehicles, service will not be an issue. The most likely service sequence will be:

Drive into Court A from Street A and service units 14 through 8. Back out onto Street A and proceed to Street B- make a left onto Street B and service units 22 through 32. Make a right turn onto Street A and proceed back to Court A- back into Court A and service units 1 through 7. Make a left turn back onto Street A and proceed to the far entrance of Street B- make a left turn onto Street B and service units 33 through 39 and units 21 through 15. Our truck will then make a right turn onto Street A and exit the complex onto Manor Boulevard.

Contact me if you have any questions at 510-613-2182.

Sincerely,  
WASTE MANAGEMENT OF ALAMEDA COUNTY, INC.

A handwritten signature in blue ink that reads 'Dino Fontana'.

Dino Fontana  
District Operations Manager

# Mitigation Monitoring and Reporting Program

---

The Initial Study-Mitigated Negative Declaration for the 903 Manor Boulevard Residential Project (project) identifies the mitigation measures that will be implemented to reduce the impacts associated with the project. The California Environmental Quality Act (CEQA) requires a public agency to adopt a monitoring and reporting program for assessing and ensuring compliance with any required mitigation measures applied to proposed development. As stated in section 21081.6(a)(1) of the Public Resources Code:

*The public agency shall adopt a reporting or monitoring program for the changes made to the project or conditions of project approval, adopted in order to mitigate or avoid significant effects to the environment.*

Section 21081.6 also provides general guidelines for implementing mitigation monitoring programs and indicates that specific reporting and/or monitoring requirements, to be enforced during project implementation, shall be defined as part of adopting a mitigated negative declaration.

The mitigation monitoring table lists those mitigation measures that may be included as conditions of approval for the project. To ensure that the mitigation measures are properly implemented, a monitoring program has been devised which identifies the timing and responsibility for monitoring each measure. The project applicant will have the responsibility for implementing the measures, and the various City of San Leandro departments will have the primary responsibility for monitoring and reporting the implementation of the mitigation measures.

Mitigation Measure/ Condition of Approval	Action Required	Monitoring Timing	Monitoring Frequency	Responsible Agency	Compliance Verification		
					Initial	Date	Comments
<b>Biological Resources</b>							
<b>BIO-1: Nesting Bird Pre-Construction Survey</b>							
<p>If project construction begins between February 1 and September 1 (the migratory bird nesting season), a pre-construction survey shall be conducted by a qualified biologist within 14 days prior to the start of construction, to ensure that no nesting birds or raptors are disrupted by the project. The survey shall include a review of all trees, shrubs, and structures on the property that provide potential nesting habitat for bird or raptor species, including a buffer of 150 feet for passerines and 500 feet for raptors. If an active nest is encountered, the qualified biologist shall establish an appropriate protective buffer around the nest, to ensure that the nest inhabitants do not become distressed. The protective buffer shall remain in place until the nest is no longer active, as determined by the qualified biologist.</p>	<p>If initial ground disturbance activities, including vegetation removal, occurs between February 1 and September 1, a qualified biologist will conduct a preconstruction nesting bird survey and establish avoidance area buffers if necessary</p>	<p>Prior to issuance of a grading permit</p>	<p>Once</p>	<p>City of San Leandro Community Development Department and On-site Construction Manager</p>			
	<p>If an active nest is encountered, verify no ground disturbing activities occur in buffer until qualified biologist has confirmed breeding/nesting is completed and young have fledged the nest</p>	<p>No more than 14 days prior to vegetation clearance and structure demolition</p>	<p>Once</p>				
			<p>Ongoing throughout construction as necessary</p>		<p>Once</p>		
<b>BIO-2: Roosting Bat Pre-construction Survey</b>							
<p>Prior to building demolition, a roosting bat survey shall be completed by a qualified biologist to determine the presence of bat species on the project site. The biologist shall examine all buildings, structures, trees, and shrubs that will be removed during construction and demolition. If any active roosts are present, the qualified biologist shall identify an appropriate construction-free buffer around the active roosts, and no construction shall occur within the construction-free buffer during the maternity season (April 15 to August 15) or during the overwintering season (October 15 to</p>	<p>Retain a qualified biologist to conduct bat surveys</p>	<p>Prior to building demolition</p>	<p>Once</p>	<p>City of San Leandro Community Development Department and On-site Construction Manager</p>			
	<p>If active roosts are identified, establish a buffer around active roosts in which no construction shall occur between April 15 to August 15 and October 15 to February 28</p>	<p>As needed during construction</p>	<p>As needed</p>				
	<p>Implement measures as determined by qualified biologist to evict roosting bats</p>	<p>As needed during construction</p>	<p>As needed</p>

February 28). A qualified biologist shall safely evict roosting bats outside of these seasons.							
<b>Cultural Resources</b>							
<b>CUL-1: Unanticipated Discovery of Archaeological Resources</b>							
If cultural resources are encountered during ground-disturbing activities, work within 50 feet of the find shall be halted, and an archaeologist meeting the Secretary of the Interior’s Professional Qualifications Standards for archaeology (National Park Service 1983) shall be contacted immediately to evaluate the find. If the discovery proves to be significant under CEQA, additional work such as data recovery excavation, Native American consultation, and archaeological monitoring may be warranted to mitigate any significant impacts.	Verify all work within 50 feet is halted if cultural resources are encountered and a qualified archeologist is contacted to evaluate the find and recommend further actions	As needed, following discovery of cultural resources	As needed	City of San Leandro Community Development Department and On-site Construction Manager			
<b>Geology and Soils</b>							
<b>GEO-1: Unanticipated Discovery of Paleontological Resources</b>							
In the event an unanticipated fossil discovery is made during the course of project development, then in accordance with SVP (2010) guidelines, it is the responsibility of any worker who observes fossils within the project site to stop work within 50 feet of the find and notify a qualified professional paleontologist who shall be retained to evaluate the discovery, determine its significance and if additional mitigation or treatment is warranted. Work in the area of the discovery will resume once the find is properly documented and authorization is given to resume construction work. Any significant paleontological resources found during construction monitoring will be prepared,	Verify all work is halted within 50 feet if paleontological resources are encountered and a qualified paleontologist is contacted to evaluate the find and recommend further actions	As needed, following discovery of paleontological resources	As needed	City of San Leandro Community Development Department and Engineering & Transportation Department and On-site Construction Manager
