4-1600 Specific Purposes and Applicability

This article contains development regulations, other than parking, loading, and sign regulations that are applicable to development in all or several districts. These regulations shall be applied as specified in Part II: Base District Regulations, Part III: Overlay District Regulations, and as presented in this article. (Ord. 2001-015 § 1)

Division 1. Residential Districts

4-1602 through 4-1628 Reserved (Ord. 2001-015 § 1)

Division 2. Nonresidential Districts

4-1630 Fast Food Establishments

The following supplementary development regulations shall apply to fast food establishments, large scale and fast food establishments, small scale use classifications.

- A. No Exterior Walk-Up Service. Food shall be delivered to patrons within a car or within a building, or enclosed or covered outdoor eating area.
- B. Minimum Separation. Fast food establishment, large scale uses on separate freestanding sites that are: (a) not associated as being either a part of or within a shopping center; and (b) have independent access to adjoining parking shall not be closer than five hundred (500) feet to a public or private school, park, library, or playground. This minimum separation requirement does not apply to the fast food establishment, small scale classification.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

- C. Litter Control. Fast food establishment operators shall be responsible for pick-up of patrons' litter within a minimum of one thousand (1,000) feet from the restaurant site. Identifiable containers and napkins shall be used for all carryout food, and all litter resulting shall be promptly removed. A condition of use or zoning permit approval may require the operator to retain a contract litter cleanup service or to take other litter clean-up measures if the Zoning Enforcement Official determines that a litter problem exists. (Ord. 2004-007 § 5; Ord. 2004-004 § 5; Ord. 2001-015 § 1)

4-1632 Entertainment Activities

The following regulations shall apply to any use offering entertainment activities as defined in Article 3, more than six (6) times per calendar year:

- A. Exits, not limited to emergency-use-only, shall not be opposite a Residential (R) District adjoining the site.
- B. A use permit shall establish conditions ensuring that no litter problem will exist.
- C. A use permit for entertainment activities shall apply only to the type of entertainment approved, and a different type of entertainment shall require approval of a new use permit.
- D. A use permit may limit hours, duration, or days on which entertainment activities is provided. (Ord. 2014-011 § 2; Ord. 2001-015 § 1)

4-1634 Service Stations and Automobile Washing

The following supplementary development regulations shall apply to the Service Stations and Automobile Washing use classifications.

- A. Site Layout. Conditions of approval of a use permit may require buffering, screening, planting areas, or limit hours of operation necessary to avoid adverse impacts on properties in the surrounding area.
- B. Planting Areas. Perimeter planting areas shall be provided, as required for parking lots by Article 17, except where a building adjoins an interior property line. Required interior planting areas may adjoin perimeter-planting areas.
- C. Storage of Materials and Equipment. The provisions of Section 4-1662: Outdoor Facilities shall apply. Storage of inoperative vehicles is prohibited. The location of display racks and vending machines shall be specified by the use permit.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

- D. Automobile Washing. Automobile washing or cleaning shall not be permitted in conjunction with a service station unless specifically approved by the use permit. (Ord. 2014-011 § 2; Ord. 2001-015 § 1)

4-1636 Hazardous Materials Storage

- A. Definitions. For purposes of this section, “hazardous substances” shall include all substances on the comprehensive master list of hazardous substances compiled and maintained by the California Department of Health Services pursuant to Section 25282 of the California Health and Safety Code or the California Occupational Safety and Health Agency’s Hazardous Substances List; CCR Title 8, Division 1, Chapter 3.2, Subchapter 1, Article 5, Section 339.
- B. Permit Required. A use permit shall be required for any new commercial, industrial, or institutional use, or accessory use, or major addition or alteration to an existing use that involves the manufacture, storage, handling, or processing of hazardous substances in sufficient quantities that would require permits for hazardous materials under Section 105 of the California Fire Code, with the following exceptions:
1. Underground storage of bulk flammable and combustible liquids complying with requirements of the San Leandro Fire Code;
 2. Hazardous substances in container sizes of ten (10) gallons or less that are stored or maintained for the purposes of retail or wholesale sales; and
 3. Any manufacture, storage, handling, or processing of hazardous substances which the Zoning Enforcement Official, after consultation with the Fire Marshall and review of any required hazardous materials response plan (“business plan”) determines is not likely to substantially and adversely affect property in the vicinity.
- C. Above-Ground Storage Tanks. Aboveground storage tanks for any flammable liquids shall not be allowed except as permitted in the California Fire Code. (Ord. 2014-011 § 2; Ord. 2001-015 § 1)

4-1638 Game Centers

The following supplemental regulations shall apply in addition to the requirements of Section 4-3-110 of the Municipal Code to the operation of game centers, including mechanical or electronic games or any other similar machine or device.

- A. Restrictions. The Zoning Enforcement Official may impose reasonable restrictions on the physical design, location, and operation of a game center in order to minimize the effects of noise, congregation, parking, and other nuisance factors that may be detrimental to the public health, safety, and welfare of the surrounding community.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

- B. Appeals. Any person may appeal the decision of the Zoning Enforcement Official on an application for an initial permit or a renewal of a permit for a game center to the Board of Zoning Adjustments. (Ord. 2001-015 § 1)

4-1640 Reserved (Ord. 2001-015 § 1)

4-1642 Walls Adjoining Residential Use

A solid masonry or concrete wall at least six (6) feet and not more than eight (8) feet high shall adjoin the property line of the site of a new nonresidential use abutting an existing ground-floor residential use. However, where the portion of the site within ten (10) feet of the property line is occupied by planting area or by a building having no openings except openings opposite a street property line, the Zoning Enforcement Official may grant an exception to this requirement. A wall within fifteen (15) feet of a street property line shall not exceed three (3) feet in height. (Ord. 2001-015 § 1)

4-1644 Concurrent Sale of Motor Vehicle Fuel and Alcoholic Beverages

No person shall engage in the concurrent sale of motor vehicle fuel and alcoholic beverages unless authorized as a conditional use in accord with Article 22, subject to the minimum standards for approval established by this Section and any additional conditions of approval determined by the Board of Zoning Adjustments to be reasonable and necessary.

- A. Minimum Standards for Approval. All persons applying for conditional use approval to engage, and all persons actually engaged as of January 1, 1988, in the concurrent sale of motor vehicle fuel and alcoholic beverages shall comply with all of the following minimum standards:

1. No alcoholic beverages shall be displayed within five (5) feet of the cash register or the front door of the establishment, unless it is in a permanently affixed cooler;
2. No sale of alcoholic beverages shall be made from a drive-up window;
3. No display of alcoholic beverages shall be made from an ice tub;
4. No alcoholic beverage advertising shall be located on motor fuel islands or otherwise visible from outside the building in which the alcoholic beverage is sold; and
5. Employees on duty between the hours of 10:00 p.m. and 2:00 a.m. shall be at least twenty-one (21) years of age to sell alcoholic beverages.

- B. Conditions of Approval. In addition to the minimum standards set forth, the Board of Zoning Adjustments may provide that any approvals for the concurrent sale of motor vehicle fuel and alcoholic beverages be contingent upon acceptance and observance of specified conditions or limitations determined by the Board to be reasonable and

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

necessary in order to make the required findings, including but not limited to any of the following conditions or limitations relating to:

1. Additional limitations on advertising and display of alcoholic beverages;
2. Banning of video game machines and/or jukeboxes or similar devices where concurrent sale of motor vehicle fuel and alcoholic beverages take place;
3. Limitations on hours of operation and on amount of shelf space devoted to alcoholic beverages;
4. Requirement for security guards and other security devices on the premises;
5. Minimum parking lot lighting and fencing;
6. Minimum training for sales personnel and/or security guards;
7. Policies to discourage drinking alcoholic beverages outside the premises; or
8. A minimum distance required between businesses engaged in the concurrent sale of motor vehicle fuel and alcoholic beverages. (Ord. 2001-015 § 1)

4-1646 Recycling Facilities

A. Definitions.

1. “Recycling” means the process of collecting, sorting, cleansing, treating, and reconstituting materials that would otherwise become solid waste, and returning them to the economic mainstream in the form of raw material for new, reused, or reconstituted products which meet the quality standards necessary to be used in the marketplace.
2. “Recyclable Material” is reusable material, including, but not limited to, metals, glass, plastic, and paper, which are intended for reuse, remanufacture, or reconstitution for the purpose of using the altered form.
3. “Recycling Facility” is a center for the collection and/or processing of recyclable materials and includes facilities for the drop-off, buyback, deposit, or return for redemption, of recyclable material. Recyclable material is reusable material including, but not limited to, metals, glass, plastic, and paper which is intended for remanufacture or reconstitution for the purpose of using the altered form. A recycling facility consists of a reverse vending machine, collection facility, or processing facility, as defined below. A recycling collection facility may also consist of a facility

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

for the collection of reusable household goods or clothes by a charitable organization.

- a. "Collection Facility" is a center for the acceptance by donation, redemption, or purchase of recyclable materials from the public.
 - i. "Small collection facilities" occupy less than five hundred (500) square feet and may include:
 - Bulk reverse vending machines or a grouping of reverse vending machines occupying more than fifty (50) square feet;
 - Kiosk-type units that may include permanent structures; or
 - Unattended containers placed for the donation of recyclable materials.
 - ii. "Large collection facilities" occupy more than five hundred (500) square feet and may include permanent structures as well as mobile units, bulk reverse vending machines, kiosk-type units.
 - b. "Processing Facility" is a building or enclosed space used for the collection and processing of recyclable materials. Processing means the preparation of material for efficient shipment, or to an end-user's specifications, by such means as baling, briquetting, compacting, flattening, grinding, crushing, mechanical sorting, shredding, cleaning, and remanufacturing.
 - i. A "light-processing facility" occupies less than forty-five thousand (45,000) square feet, all activities are conducted entirely within an enclosed building, and includes equipment for baling, briquetting, crushing, compacting, grinding, shredding and sorting of source-separated recyclable materials, except ferrous metals other than food and beverage containers, and repairing of reusable materials. (See Subsection B "Permits Required.")
 - ii. A "heavy-processing facility" is any processing facility other than a light-processing facility.
4. "Reverse Vending Machine(s)" is an automated mechanical device that accepts at least one or more types of empty beverage containers such as aluminum cans, glass and plastic bottles, and issues a cash refund or a redeemable credit slip. A reverse vending machine may sort and process containers mechanically, provided that the entire process is enclosed within the machine.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike-through~~ represents text to be eliminated

- a. A “single-feed reverse vending machine” is designed to accept individual containers one (1) at a time.
 - b. A “bulk reverse vending machine” is designed to accept more than one (1) container at a time and to compute the refund or credit due on the basis of weight.
5. “Small Scale Hazardous Waste Center” means a center for the collection, short-term storage, transfer, or limited processing of hazardous waste from households, small businesses or other small-scale generators, as defined in Article 3: Definitions, Section 1-304, under “Recycling Centers.”

B. Permits Required. No person shall permit the placement, construction, or operation of any recycling facility without first obtaining a permit as follows:

Type of Facility	Districts Permitted	Permit Required
Single-Feed Reverse Vending Machine(s)	All C, NA, SA, P, I (AU), DA-1 and DA-2	Admin. Review
Bulk Reverse Vending Machine	CN, CC, CS, NA, SA-1, SA-2, SA-3, I and I (AU)	Admin. Review
Small Collection	CC, CS, CN, SA-1, SA-2 and SA-3	Admin. Review
Small Scale Hazardous Waste Center	CS	Admin. Review
Large Collection	CC, CS, IG, IL, IP, IG(AU), IL(AU) and IP(AU) IT	Admin. Review Use Permit
Light Processing	IL, IL(AU), IG and IG(AU) IT	Admin. Review Use Permit
Heavy Processing	IG, IG(AU), and IT	Use Permit

1. The Zoning Enforcement Official shall be the decision-maker but may refer to the Board of Zoning Adjustments for a Conditional Use Permit.

C. Permits for Multiple Sites.

1. The Zoning Enforcement Official may grant a single zoning permit to allow more than one reverse vending machine or small collection facility located on different sites under the following conditions:
 - a. The operator of each of the proposed facilities is the same;
 - b. The proposed facilities are determined to be similar in nature, size, and intensity of activity; and

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

- c. All the applicable criteria and standards set forth in Section 4-1646.D are met for each such proposed facility.

D. Design Criteria and Standards.

1. Reverse Vending Machine(s).

- a. Each machine shall be located so as not to obstruct pedestrian or vehicular circulation.
- b. No required parking space shall be occupied, and machine shall not encroach into aisles.
- c. Each machine shall occupy no more than fifty (50) square feet of space, including any protective enclosure, and shall not exceed eight (8) feet in height.
- d. Each machine shall be clearly marked to identify the type of material to be deposited, operating instructions, and the identity and phone number of the operator or responsible person to call if the machine is inoperative.
- e. The maximum sign area is four (4) square feet per machine, exclusive of operating instructions of Subsection 4-1646.D.1.d, above;
- f. Adequate nighttime lighting shall be provided, if warranted.

2. Small Collection Facilities.

- a. Small collection facilities shall be no larger than five hundred (500) square feet, shall be set back at least ten (10) feet from a front or side property line, and twenty (20) feet from an R district boundary or lot developed for residential use, and shall not obstruct pedestrian or vehicular circulation or parking areas. Small collection facilities shall be located no closer than one-half mile distance from one another.
- b. Applicants of small collection facilities shall submit an Administrative Review application, along with a site plan showing the proposed location and written authorization from a property or business owner for each separate facility location.
- c. No power-driven processing equipment shall be used except for reverse vending machines.
- d. All containers shall be constructed and maintained with durable waterproof and rustproof material, covered when the site is not attended, secured from

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

unauthorized entry or removal of material, and of a capacity sufficient to accommodate materials collected.

- e. All recyclable material shall be stored in containers or in a mobile unit vehicle.
- f. Attended facilities located within one hundred (100) feet of the boundary of an R district shall operate only between 7:00 a.m. and 7:00 p.m.
- g. Containers shall be clearly marked to identify the type of material that may be deposited; the facility shall be clearly marked to identify the name, address, website and telephone number of the facility operator or organization and the hours of operation, and display a notice stating that no material shall be left outside the recycling enclosure or containers.
- h. The maximum sign area shall be sixteen (16) square feet exclusive of informational requirements and operational instruction of Subsection (c) above. Directional signs bearing no advertising message may be installed if necessary to facilitate traffic circulation, or if the facility is not visible from the public right-of-way.
- i. No additional parking spaces will be required for customers of a small collection facility located at the established parking lot of a host use. One (1) space may be provided for the attendant, if needed.
- j. Mobile recycling units shall have an area clearly marked to prohibit other vehicular parking during hours when the mobile unit is scheduled to be present.
- k. No required parking spaces shall be occupied by the facility.

3. Large Collection Facilities.

- a. A large collection facility shall be located at least two hundred (200) feet from an R district.
- b. Each facility shall be in an enclosed building or within an area enclosed by a fence at least eight (8) feet in height that substantially screens the site.
- c. Six (6) parking spaces shall be for customers and one (1) parking space shall be provided for each commercial vehicle operated by the recycling facility.
- d. Power-driven processing, including aluminum foil and can compacting, baling, plastic shredding, or other light-processing activities necessary for efficient temporary storage and shipment of material may be allowed if noise and other conditions are met.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

4. Processing Facilities.

- a. Light processors shall operate in a wholly enclosed building except for incidental storage, in compliance with the regulations set forth in Section 4-1662, "Outdoor Facilities and Storage/Loading Facilities."
- b. Heavy processors shall operate in a wholly enclosed building, except for incidental storage or within an area enclosed on all sides by an opaque fence or wall not less than eight (8) feet in height and landscaped on all street frontages located at least one hundred fifty (150) feet from an R district.
- c. Power-driven processing shall be permitted provided all noise-level requirements are met.
- d. If the facility is open to the public, space shall be provided for a minimum of ten (10) customers or the peak load, whichever is higher, except where the Zoning Enforcement Official determines that allowing overflow traffic is compatible with surrounding businesses and public safety.
- e. One (1) parking space will be provided for each commercial vehicle operated by the processing center.

5. All Collection and Processing Facilities.

- a. No facility shall occupy a required front or corner side yard, and all regulations applicable to the principal structure on the site shall apply to collection and processing facilities except as provided in this Section.
- b. A large collector or processing facility may accept used motor oil for recycling from the generator in accordance with Section 25250.11 of the California Health and Safety Code.
- c. All exterior storage of material shall be in sturdy containers or enclosures that are covered, secured, and maintained in good condition. Storage containers for flammable material shall be constructed of non-flammable material. No storage, excluding truck trailers and overseas containers, will be visible above the height of the fencing.
- d. Noise levels shall not exceed sixty decibels (60 dBA) as measured at the property line of an R district or otherwise shall not exceed seventy decibels (70 dBA).

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

- e. All facilities shall be administered by on-site personnel during hours the facility is open. If a large collection or processing facility is located within five hundred (500) feet of an R district, it shall not be in operation between 7:00 p.m. and 7:00 a.m.
- f. Any containers provided for after-hours donation of recyclable materials shall be of sturdy, rustproof construction; shall have sufficient capacity to accommodate materials collected; and shall be secure from authorized entry or removal of materials.
- g. The site of the facility shall be kept free of litter and any other undesirable material. Containers shall be clearly marked to identify the type of material that may be deposited. A notice stating that no material shall be left outside the recycling containers shall be displayed.
- h. Sign requirements shall be those provided for the zoning district in which the facility is located. In addition, each facility shall be clearly marked with the name and phone number of the facility operator and the hours of operation.
- i. No dust, fumes, smoke vibration or odor above ambient level may be detectable on neighboring properties. (Ord. 2014-011 § 2; Ord. 2008-013 § 1; Ord. 2004-007 § 5; Ord. 2001-015 § 1)

Division 3. All Districts

4-1648 Relocated Buildings

In addition to the requirements of San Leandro's Municipal Code, Title IV, Article 5, Moving Buildings, Oversized Vehicles or Objects, a permit for relocation of a building shall be required. This permit, to be issued by the Zoning Enforcement Official, shall establish conditions necessary to ensure that the relocated building and its new site will be compatible with its surroundings in terms of architectural character, height and bulk, and quality of exterior appearance. (Ord. 2001-015 § 1)

4-1650 Development on Lots Not Meeting Minimum Area or Width

A legally created lot having a width or area less than required for the base district in which it is located may be occupied by a permitted or conditional use if it meets the following requirements:

- A. R Districts. Such lots shall be subject to the same yard, setback, density, and FAR requirements as a standard lot. One (1) dwelling unit may be located on a lot of less than required area or width if it conforms to all requirements for a single-family dwelling in the RS District. A use permit shall be required for any other proposed new use.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

- B. Other Districts. A use permit shall be required for any proposed new use. (Ord. 2004-007 § 5; Ord. 2001-015 § 1)

4-1652 Development on Lots Divided by District Boundaries

The regulations applicable to each district shall be applied to the area within that district, and no use other than parking serving a principal use on the site shall be located in a district in which it is not a permitted or conditional use. Pedestrian or vehicular access from a street to a use shall not traverse a portion of the site in a district in which the use is not a permitted or conditional use. (Ord. 2004-007 § 5; Ord. 2001-015 § 1)

4-1654 Building Projections into Yards and Courts

Projections into required yards or required open space shall be permitted as follows. In addition, all development proposals in the SA Districts shall be reviewed by City staff to ensure general consistency with the provisions contained in the Design Guidelines in the East 14th Street South Area Development Strategy.

- A. Cornices, eaves, mechanical equipment, and ornamental features: two (2) feet.
- B. Uncovered porches, terraces, platforms, decks, subterranean garages, and patios not more than thirty (30) inches in height: three (3) feet in a side yard, and six (6) feet in a front or rear yard for a length of ten (10) feet parallel to the adjoining property line.
- C. Balconies, stairs, canopies, awnings, and covered porches: six (6) feet into a front or rear yard, and two (2) feet into an interior side yard.
- D. Fire escapes: three and one-half (3½) feet.
- E. Bay windows: two and one-half (2½) feet for a width of no more than eight (8) feet.
- F. Chimneys: two (2) feet, except where the required setback from an interior property line is three (3) feet or less in which case no projection is permitted.
- G. Wheelchair Ramps. Ramps constructed as part of an accessible route are permitted in required front or side yard (for corner properties) setbacks with administrative approval. Ramps shall not be allowed to encroach into the City right-of-way. In addition, ramps shall not block access to or encroach into any required off-street parking space or driveway leading to such place; unless there is no other feasible location for the ramp. Ramps may be constructed of concrete and wood or galvanized metal/aluminum and shall comply with the Uniform Federal Accessibility Standards (UFAS) Section 4.8 Ramps. Wood railings shall be stained or painted to be compatible with the color/trim of the home. Metal handrails, spindles and hardware shall be powder-coated to be compatible with the color/trim of the home. (Ord. 2006-011 § 1; Ord. 2001-015 § 1)

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike-through~~ represents text to be eliminated

4-1656 Supportive and Transitional Housing.

Pursuant to SB 2 (Chapter 633, Statutes 2007) and California Government Code Section 65583(a)(5), supportive and transitional housing must be considered a residential use of property, subject only to restrictions that apply to other residential dwellings of the same type in the applicable zoning districts in the Code. See Article 3 (“Definitions”) for definitions of supportive housing, transitional housing, and target population. Applicable parking standards for supportive and transitional housing can be found in Article 17 (“Off-Street Parking and Loading Regulations”). (Ord. 2015-11 § 4)

4-1658 Exceptions to Height Limits

Towers, spires, cupolas, chimneys, elevator penthouses, water tanks, flagpoles, monuments, theater scenery lofts, radio and television antennas, transmission towers, fire towers, and similar structures and necessary mechanical appurtenances covering not more than ten percent (10%) of the ground area covered by the structure to which they are accessory may exceed the maximum permitted height in the district in which the site is located by no more than ten (10) feet, unless the Board of Zoning Adjustments approves a variance that authorizes additional height. (Ord. 2001-015 § 1)

4-1660 Reserved (Ord. 2001-015 § 1)

4-1662 Outdoor Facilities and Storage/Loading Facilities

A. Outdoor Storage—Where Permitted.

1. IG District—Permit Not Required. Outdoor storage of materials or equipment is allowed in the IG district, subject to the screening requirements prescribed in Subsection C below. Outdoor storage of materials or equipment shall be strictly related to the operation of the principal use. In no case shall this section permit outdoor storage or display of merchandise, goods, or materials for retail or wholesale sales, unless a Temporary Use Permit is obtained in accordance with Section 5-2222. If the outdoor sales exceed ninety (90) consecutive days in duration, an Outdoor Facilities Permit shall be required, per Subsection 2 below.
2. Other Commercial and Industrial Districts—Outdoor Facilities Permit Required. Outdoor storage and display of merchandise, materials, or equipment, including display of merchandise, materials, and equipment for customer pick-up shall be subject to approval of an Outdoor Facilities Permit by the Zoning Enforcement Official in the CN, CC, CS, CR, DA-1, DA-2, DA-3, DA-4, ~~DA-5~~, DA-6, C-RM, NA-1, NA-2, SA-1, SA-2, SA-3, IG, IL, ~~and IP~~, and IT Districts subject to screening requirements prescribed in Subsection C below. Sidewalk cafés and outdoor food service accessory to an Eating and Drinking Establishment or a retail use shall be

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

permitted subject to approval of an Outdoor Facilities Permit by the Zoning Enforcement Official in the CN, CC, DA-1, DA-2, DA-3, DA-4, ~~DA-5~~, DA-6, CR, C-RM, NA-1, NA-2, SA-1, SA-2, SA-3, P, ~~PHD~~, IG, IL, IP, IT, and OS Districts and shall be subject to subsection (B) below. Temporary displays for Outdoor Retail Sales may be allowed with a Temporary Use Permit up to ninety (90) days in accordance with Section 5-2222, consistent with the applicable base district land use regulation, as modified by an overlay district.

- B. Outdoor Facilities Permits—Conditions of Approval and Grounds for Denial. The Zoning Enforcement Official may impose conditions of approval on any permit for outdoor storage, display, or food service issued under this Section, including requirements for yards, screening, or planting areas where it is determined by the Zoning Enforcement Official that such conditions are necessary to prevent adverse impacts on surrounding properties and uses. If the Zoning Enforcement Official determines that such impacts cannot be adequately mitigated, the permit shall be denied.
- C. Outdoor Storage and Loading Facilities—Screening Required:
1. Outdoor storage areas, and truck bays/loading docks areas, shall be screened by the placement of a solid wall, fence, landscaping, and/or building location in order to substantially obscure visibility from a public street. Limited visibility of truck staging areas, as necessary only for truck access to and from the site, may be permitted if no other alternative layout is practical.
 2. The storage of merchandise, materials, and/or equipment at height above the screening wall is not permitted, unless administrative approval is given by the Zoning Enforcement Official, who in order to give approval shall find that: a) the limitation in storage would not be practical for the subject business, and b) such stored items would not be visually obtrusive from a public street or neighboring property.
- D. Exemptions. Notwithstanding the permit regulations of Subsections A and B above, and the screening requirements prescribed in Subsection C above, unscreened outdoor storage and display may be permitted, subject to any restrictions and/or limitations within project specific conditions attached to a use permit, site plan approved pursuant to Article 2, or zoning approval, in conjunction with the following use classifications in districts where they are permitted or conditionally permitted, and provided outdoor storage and display shall be limited to vehicles or equipment:
1. Vehicle/Heavy Equipment Dealers, New
 2. Vehicle/Heavy Equipment Dealers, Used
 3. Vehicle/Heavy Equipment Rentals

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

- E. Vehicles/Equipment as Advertisement. No vehicle or equipment shall be stored with mast arms in an elevated position. (Ord. 2014-011 § 2; Ord. 2008-003 § 8; Ord. 2004-007 § 5; Ord. 2001-015 § 1)

4-1664 Screening of Mechanical Equipment

- A. General Requirement. Except as provided in Subsection B below, all exterior mechanical equipment, except solar collectors in any district and operating mechanical equipment in an IG District located more than five hundred (500) feet from a C, NA, SA, R, PS, PD, or OS district boundary, shall be screened from view on all sides. Except to the extent restricted by public utility companies, equipment to be screened includes but is not limited to heating, air conditioning, refrigeration equipment, plumbing lines, ductwork, and transformers. The Zoning Enforcement Official may waive the screening requirement in C, NA, SA, or I district for equipment not visible from a public street or R district.
- B. Utility Meters. Utility meters shall be screened from view from public rights-of-way, but need not be screened on top or when located on the interior side of a single-family dwelling. Meters in a required front yard or in a side yard adjoining a street shall be enclosed in subsurface vaults.
- C. Screening Specifications. Screening materials may have evenly distributed openings or perforations averaging fifty percent (50%) of the surface area and shall effectively screen mechanical equipment, so that it is not visible from a street or adjoining lot. (Ord. 2001-015 § 1)

4-1666 Refuse Storage Areas

Except as exempted by the Zoning Enforcement Official, a refuse storage area screened on all sides by a six (6) foot solid wood or masonry wall or located within a building, shall be provided prior to occupancy for all commercial, industrial, and public/semipublic uses. Locations, horizontal dimensions, and general design parameters of refuse storage areas shall be in accord with standards established by the Zoning Enforcement Official, subject to appeal to the Planning Commission. The Zoning Enforcement Official may waive the screening requirement for dumpsters and equipment for refuse collection and storage in a CS, DA-1, DA-2, DA-3, DA-4, ~~DA-5~~, DA-6, or I District, which are not visible from a public street or from an R district. (Ord. 2008-003 § 9; Ord. 2001-015 § 1)

4-1668 Underground Utilities

All new electrical, telephone, CATV, and similar distribution lines providing direct service to a development site, and any existing such service on the site, shall be installed underground within the site unless the Zoning Enforcement Official finds such installation is unfeasible. (Ord. 2001-015 § 1)

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

4-1670 Performance Standards

The following performance standards shall apply to all use classifications in all zoning districts:

- A. Noise. All uses and activities shall comply with the provisions of the San Leandro Noise Regulations (Title IV, Chapter 1 of the Municipal Code).
- B. Vibration. No use, activity, or process shall produce vibrations that are perceptible without instruments by a reasonable person at the property lines of a site.
- C. Dust. No use, process, or activity shall produce objectionable dust that is perceptible without instruments by a reasonable person at the property lines of a site.
- D. Glare.
 - 1. From Glass. Mirror or highly reflective glass shall not cover more than twenty percent (20%) of a building surface visible from a street unless an applicant submits information demonstrating to the satisfaction of the Zoning Enforcement Official that use of such glass would not significantly increase glare visible from adjacent streets or pose a hazard for moving vehicles.
 - 2. From Outdoor Lighting. Parking lot lighting shall comply with Article 17. Security lighting in any district may be indirect or diffused, or shall be shielded or directed away from an R district within five hundred (500) feet. Lighting for outdoor court or field games within three hundred (300) feet of an R district shall require approval of a use permit.
- E. Combustibles and Explosives. The use, handling, storage, and transportation of combustibles and explosives shall comply with the provisions of the San Leandro Uniform Fire Code (Title III, Chapter 3 of the Municipal Code) and any other applicable laws.
- F. Radioactive Materials. The use, handling, storage, and transportation of radioactive materials shall comply with the provisions of the California Radiation Control Regulations and any other applicable laws.
- G. Hazardous and Extremely Hazardous Materials. The use, handling, storage, and transportation of hazardous and extremely hazardous materials, including biologically hazardous material, shall comply with the provisions of the California Hazardous Materials Regulations and the San Leandro Uniform Fire Code.
- H. Heat and Humidity. Uses, activities, and processes shall not produce any unreasonable, disturbing, or unnecessary emissions of heat or humidity, at the property line of the

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

site on which they are situated that cause material distress, discomfort, or injury to a reasonable person.

- I. Electromagnetic Interference. Uses, activities, and processes shall not cause electromagnetic interference with normal radio or television reception or with the function of other electronic equipment beyond the property line of the site on which they are situated.
- J. Evidence of Compliance. The Zoning Enforcement Official may require such evidence of ability to comply with performance standards as he or she deems necessary prior to issuance of a zoning permit or any other required permit. (Ord. 2001-015 § 1)

4-1672 Earth Station and Microwave Equipment

- A. Purpose. To ensure that amateur radio antennas and satellite and microwave dish earth stations and equipment do not have an adverse impact on aesthetic values and public safety in residential, commercial, and industrial areas, installation of these earth stations and equipment is governed by the following controls. The intent of these regulations is only to locate such earth stations and equipment where they are least visible from public rights-of-way in the vicinity, while not burdening adjacent property owners with adverse visual impacts. The intent is not to discriminate against dish earth stations in favor of other communications facilities.
- B. Permit Required. A zoning permit shall be required for the installation of amateur radio antennas, a satellite or microwave-receiving earth station, and a use permit shall be required for the installation of microwave transmitting and relay equipment. In considering a permit application, the Zoning Enforcement Official or Board of Zoning Adjustments shall balance the imposition of all applicable codes, regulations, and standards of the City of San Leandro with the applicant's right to receive satellite transmissions without unreasonable limitations on transmission reception or the imposition of costs which are excessive in light of the purchase cost of the equipment.
- C. Location Criteria: Amateur Radio. An amateur radio antenna may be installed on a lot in any district if it complies with the following criteria:
 - 1. Setbacks. Five (5) feet from interior side or rear property line.
 - 2. Maximum Height. Ten (10) feet above the district height limit, provided that additional height may be authorized with a use permit.
 - 3. Surface Materials and Finishes. Highly reflective surfaces shall not be permitted.
- D. Location Criteria: Satellite. A satellite earth station may be installed on a lot in any zoning district if it complies with the following criteria:

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike-through~~ represents text to be eliminated

1. Placement on Lot. The preferred placement of a satellite earth station shall be in the rear yard or interior side yard of a given parcel, no closer than five (5) feet to the side or rear property line, or to the front street-side setback line. The placement of a satellite earth station on a roof, shall be allowed only upon proof, presented to the satisfaction of the Zoning Enforcement Official by the property owner at the time of application for a permit, that placement of the earth station at other preferred locations would unreasonably limit reception of satellite transmission.
 2. Maximum Height. Ten (10) feet, measured from ground level, or the point of attachment on the roof, immediately under the earth station to the highest point of the earth station or any appurtenance attached to it.
 3. Screening.
 - a. If other than roof-mounted, the satellite earth station must be effectively screened by a solid screen fence, wall, or hedge six (6) feet in height, so as not to be visible from public streets. The fence, wall, or hedge shall be located no closer than five (5) feet to the satellite earth station.
 - b. If roof-mounted, the satellite earth station must be effectively screened so as not to be visible from public streets. Where possible, all roof-mounted satellite earth stations shall be painted to match the existing roof color. No satellite earth stations shall be more than ten (10) feet in height above the point of attachment, or four (4) feet in height above any peak of a pitched roof or parapet of a flat roof unless it is demonstrated that this height limit unreasonably restricts reception of a signal.

The above requirements for screening shall not apply in an "I" District unless the earth station is readily visible from an R District.
 4. Undergrounding. All wires and/or cables necessary for operation of the earth station or reception of the signal shall be placed underground, except for wires or cables attached flush with the surface of a building or the structure of the earth station.
 5. Surface Materials and Finishes. Highly reflective surfaces shall not be permitted, nor shall any lettering or emblem be allowed, except the name of the manufacturer in letters not to exceed two (2) inches in height.
- E. Locational Criteria. Microwave Receiving. Microwave receiving earth stations may be installed if they comply with the following criteria:

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

1. CC, CS, NA-1, NA-2, SA-1, SA-2, SA-3, and I Districts. Installation is prohibited in any required front or street side setback area, and all wires or cables necessary for the operation of the earth station or reception of the signal shall be placed underground, except those wires or cables attached flush with the surface of a building or structure of the earth station. Landscaping or solid screening shall be placed around the base of any tower to screen the tower from view and to provide a physical separation between the tower and any pedestrian or vehicular circulation.
 2. CN, DA-1, DA-2, DA-3, DA-4, ~~DA-5~~, ~~DA-5~~, DA-6 and P Districts. Installation is permitted only if the earth station is attached to the rear half of a roof or is fully screened from view from any adjacent public street or R district.
- F. Location Criteria: Microwave Transmitting and Relay Equipment. Microwave transmitting and relay equipment may be installed in any zoning district subject to the requirements of a use permit and the criteria of Subsection E above. (Ord. 2014-011 § 2; Ord. 2008-003 § 10; Ord. 2004-007 § 5; Ord. 2001-015 § 1)

4-1674 Bed and Breakfast Inns

The following regulations shall apply to bed and breakfast inns.

- A. Where Permitted. Bed and breakfast inns are conditionally permitted in the **IT**, CN, CC, DA-1, DA-2, DA-3, DA-4, ~~DA-5~~, DA-6, CR, P, ~~PHD~~, NA-1, NA-2, SA-1, SA-2, and RM districts or in any L Overlay District in owner-occupied landmark buildings.
- B. Use Permit Required. A use permit issued by the Board of Zoning Adjustments shall be required for bed and breakfast inns. Applications shall be submitted to the Planning Division accompanied by: the required fee; plans and elevations showing any proposed modifications to the existing exterior of the structure, descriptions of landscaping, exterior finishes, signs, and parking to be provided; and any other information required by the Zoning Enforcement Official to determine whether the proposed bed and breakfast inn conforms to all the requirements of this ordinance.

The Board of Zoning Adjustments shall approve a bed and breakfast inn after a duly noticed public hearing upon finding that:

1. The bed and breakfast inn will be operated by a property owner or resident manager living on the premises;
2. The bed and breakfast inn conforms to the design and development standards of Subsection C of this Section and is compatible with adjacent buildings in terms of building materials, colors and exterior finishes; and

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

3. Public and utility services including emergency access are adequate to serve the bed and breakfast inn.

C. Design and Development Standards.

1. Number of Guest Rooms. No more than six (6) rooms shall be rented for lodging.
2. Parking. A minimum of one (1) independently accessible, off-street parking space shall be provided for each guest room plus one (1) for the resident owner. This requirement may be reduced to one (1) space for each two (2) rooms for a bed and breakfast inn provided that the Board of Zoning Adjustments finds that on-street parking in the vicinity is not subject to time restrictions that would interfere with the hours normally required for guest parking.
3. Signs. No identifying sign shall be displayed other than one (1) sign no larger than six (6) square feet per frontage identifying the name of the establishment. The face of the sign may be indirectly illuminated by an exterior light source entirely shielded from view, but no illumination from an internal light source shall be permitted. (Ord. 2008-003 § 11; Ord. 2004-007 § 5; Ord. 2001-015 § 1)

4-1676 Airport Safety Zones

The following regulations shall apply to land uses occurring within airport safety zones established for Metropolitan Oakland International Airport by the Alameda County Airport Land Use Commission (ALUC) and set forth in the Airport Land Use Policy Plan. Maps of airport safety zone boundaries as established by the Airport Land Use Policy Plan are kept on file with the Zoning Enforcement Official. The airport safety zone boundaries shall also be delineated on the Zoning Map with reference to applicable regulations.

- A. Purposes. The specific purposes of the Airport Safety Zone regulations are to ensure land use compatibility with airport operations in proximity to San Leandro and to provide for the safe operation of aircraft. The airport safety zone consists of two (2) areas, an inner portion and an outer portion, for which different land use regulations apply. The four air safety considerations addressed by these regulations are:
1. Height Limits. The prevention of obstacles to air navigation caused by tall objects, structures, or buildings.
 2. Hazards. The prevention of hazards to air navigation caused by smoke, glare, electrical interference, bright or concentrated beams of light, and concentrations of birds.
 3. Ground Safety. The exposure of persons on the ground to accidents, especially where land uses are characterized by concentrations of persons.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

4. Noise. The exposure of persons on the ground to noise from aircraft operations, especially jet aircraft.
- B. Inner Portion. Within the inner portion of the airport safety zone, extending to fourteen hundred (1,400) feet from the end of the runway, the following uses and structures are not permitted:
1. Permanent structures or objects projecting above the level (elevation) of the primary surface of the runway.
 2. Any land use that on a regular basis would result in a concentration of persons exceeding twenty-five (25) persons per net acre.
 3. Compatible land uses in this portion of the safety zone include limited horticulture provided that no nursery equipment or materials shall be stored and no structures erected, open space for natural resources (wetlands), open space for the managed production of resources (water areas necessary to commercial fisheries), and open space for public health and safety (uses related to flood control such as retention ponds, drainage easements, or flood plains).
- C. Outer Portion. Within the outer portion of the airport safety zone, extending beyond fourteen hundred (1,400) feet to five thousand three hundred (5,300) feet, new uses shall be nonresidential low-density.
1. Uses which will have a density of more than twenty-five (25) persons per net acre over an eight (8) hour period or a density of more than fifty (50) persons per net acre for more than two (2) hours per day are considered incompatible and shall not be allowed. In addition, retail sales, eating and drinking establishments, schools, hospitals, places of public or religious assembly, and detention facilities are prohibited land uses.
 2. Compatible land uses include all those allowed in the inner portion of the airport safety zone. Additional compatible land uses are open space for outdoor recreation, limited warehousing and storage, vehicle storage, and limited industry provided these land uses comply with density regulations specified in Subsection C.1 above and height restrictions on structures and facilities contained in FAR Part 77, including Subpart D. (FAR Part 77 is included in Appendix C to the Airport Land Use Policy Plan and kept on file with the Zoning Enforcement Official.)
 3. Within the overall density limits established in Subsection C.1 above, clustering of uses within a parcel may be compatible where such clustering provides emergency landing areas, avoids concentration of development along the extended runway centerline, and does not pose a hazard to air navigation.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

4. Flammable liquids, as defined in the Uniform Fire Code, shall be stored underground.
- D. Use Permit Required. Any new development proposed for a parcel located within the airport safety zone must secure a use permit from the Board of Zoning Adjustments. The Board shall approve a use permit if it makes the findings required by Section 5-2212 and determines that the proposed development is a compatible land use in that portion of the safety zone in which the project will be located and meets the requirements of this section.
- E. Noise and Aviation Easement. No land division shall be approved nor shall a permit of any type be issued for any development within the airport safety zone until the City is provided with a noise and aviation easement permitting the right of flight in the airspace above the site. Such easement shall be supplied in a form prescribed by the City Attorney and shall be recorded on the title of the property. The purpose of the easement is to ensure that prospective property owners and developers are informed and aware of the potential impacts of airport over-flights and operations.
- F. Recorded Notice of Aircraft Over-flight Required. No land division shall be approved nor shall a permit of any type be issued for any development activity within the airport safety zone until a notice has been recorded in the Office of the County Recorder, stating that the property is subject to aircraft over-flight. Such a notice shall include a map showing the boundaries of the airport safety zone as adopted by the Alameda County Airport Land Use Commission. (Ord. 2001-015 § 1)

4-1678 Restrictions on Use of Razor/Barbed Wire

- A. Razor/barbed wire materials, such as wire strips or coiled (“concertina”) wire attached to a fence or a building. The installation of razor wire shall be permitted only in the CS, IL and IG zoning districts, prohibited in all other zoning districts, and is subject to the following restrictions where permitted and must meet the following criteria:
 1. Razor/barbed wire, on either a fence, wall or building, is prohibited within three hundred (300) feet of the public street frontage, unless such installations will not be visible from any public street as to be determined by and subject to the approval of the Zoning Enforcement Official prior to installation.
 2. Razor/barbed wire shall not extend over a property line or over the public right-of-way.
 3. Razor/barbed wire shall not be located within two hundred (200) feet of a residential district.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike-through~~ represents text to be eliminated

4. The height of the fence, with the razor/barbed wire, cannot exceed the fence height limits established in the fence regulations.
- B. Removal of Nonconforming Razor/Barbed Wire. In regards to use and/or development applications for properties with razor/barbed wire installations, which are not in compliance with the regulations prescribed in Subsection A, the nonconforming razor/barbed wire shall be removed as a condition of approval for any zoning permit, conditional use permit, or site plan approval given after August 15, 2001. (Ord. 2014-011 § 2; Ord. 2001-015 § 1)

4-1680 Site Remediation Screening Review

Prior to the removal or on-site remediation of contaminated soil or water, details on screening of the site and noise mitigation measures for any mechanical equipment used in the process shall receive approval of the Community Development Director if the removal or remediation process will exceed twenty-one (21) days in length. Screening of the site shall be by an obscure material and allowable noise shall not exceed the levels provided in the General Plan. This Section shall apply in all zoning districts. (Ord. 2001-015 § 1)

4-1682 Fences, Walls, and Hedges

- A. Residential, Open Space and Public/Semi-Public Districts. Except as provided for in Paragraphs 1, 2 and 3 below, the maximum height of a fence, wall, or hedge shall be seven (7) feet except in required front or corner side yards abutting a street where the maximum height shall be three (3) feet. All fences, walls, and hedges shall be subject to the driveway visibility requirements of Article 17, Off-Street Parking and Loading Requirements.
 1. RO District. The maximum height of a fence, wall, or hedge in the RO District shall be six (6) feet except in required front or corner side yards abutting a street where the maximum height shall be three (3) feet.
 2. Corner lots in the RO, RS, RS-40, RS-VP, and RD Districts. Starting from the back wall of the house, the maximum height of a fence, wall, or hedge on a corner lot in the RO, RS, RS-40, RS-VP or RD District shall follow the gradient formula diagram below, which allows for an increase in height of one (1) foot for each two and one-half (2 1/2) feet back from the street side property line, up to a maximum of six (6) feet in the RO District, and seven (7) feet in the RS, RS-40, RS-VP and RD Districts. The area in front of the fence shall be required to be planted with a combination of groundcovers, shrubs, and/or small trees and shall also have irrigation installed. Over-height fences along the side of the house shall continue to require review and approval of a fence modification.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

Gradient Fence Formula (illustrative)

(Where PL = Property Line and 2-10 indicates feet back from Property Line)

3. RS-VP District. In order to protect the existing view corridor, the maximum height of a solid fence, wall or hedge in the RS-VP District shall be no more than three (3) feet above finished grade. The portion of a permitted fence between the heights of three (3) feet to seven (7) feet shall be constructed with glass to allow for continued enjoyment of the view. Transparent materials do not include chain link, mini-mesh, chicken wire, wood or lattice materials. Non-transparent structural materials necessary for the support of the fence are permitted every four (4) feet.

The views currently enjoyed by neighbors shall be respected. The proposed construction shall not unreasonably block or diminish neighbors' views of distant and scenic features, such as the San Francisco Bay and surrounding open spaces and skylines, while balancing the applicant's ability to improve the subject property in accordance with the applicable restrictions. Fences proposed in side and rear yards where no views as defined above are significantly affected are not subject to this section. as determined by the Zoning Enforcement Official.

The Zoning Enforcement Official may modify the standards referenced herein subject to the approval of a Fence Modification Permit.

B. Commercial, Professional and Industrial Districts.

1. Maximum Height. The maximum height of a fence, wall, or hedge shall be eight (8) feet except in required front or corner side yards where the maximum height shall be three (3) feet.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

2. Minimum standards for fences along street frontages. Fences that are adjacent to the required minimum front, corner side and/or rear yard with frontage along a public street frontage shall be constructed of either: (a) tubular steel, or of equally high quality “visually transparent” style; or (b) a solid architectural wall compatible with the building colors and materials.

In addition, all fences, walls, and hedges shall be subject to the driveway visibility requirements of Article 17: Off-Street Parking and Loading Requirements. Walls adjoining residential uses shall be subject to the regulations of Section 4-1642: Walls Adjoining Residential Use.

- C. Fence Modifications. Approval to vary from the standards of this Section may be granted with the approval of a fence modification application.

1. The Zoning Enforcement Official May Approve Modifications. The Zoning Enforcement Official in a hearing following informal notice as specified in Paragraph 4 below may modify the requirements for the maximum height, minimum setback, and material of construction for fences as established in the Zoning Code.
2. Noticing Requirements. Notice of the time, place, and purpose of the hearing shall be posted at least ten (10) days prior to the date of the hearing, on or adjacent to the property involved, and mailed at least ten (10) days prior to the hearing to the owners of adjacent property.
3. Standards for Approval.
 - a. The fence is not detrimental to adjacent property;
 - b. The fence is compatible with the neighborhood in terms of aesthetics;
 - c. The fence does not create a site distance hazard; and
 - d. The fence is not detrimental to the public health, safety, or welfare.
4. Referrals and Appeals. The Zoning Enforcement Official may refer a fence modification request to the Board of Zoning Adjustments. The Board of Zoning Adjustments shall also review fence modification(s) requests that are made in conjunction with an application for either a conditional use permit or variance. Appeals of the decision of the Zoning Enforcement Official approving or denying a fence modification shall be heard by the Board of Zoning Adjustments, pursuant to the requirements of Article 28. (Ord. 2012-001 § 3; Ord. 2008-001 § 1; Ord. 2001-015 § 1)

4-1683 Adult-Oriented Business Regulations

- A. Purpose and Intent. It is the intent of this article to prevent community wide adverse economic impacts, increased crime, decreased property values, and the deterioration of neighborhoods which can be brought about by the concentration of adult-oriented

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike-through~~ represents text to be eliminated

businesses in close proximity to each other or proximity to other incompatible uses such as schools for minors, churches, and residentially zoned districts or uses. The City Council finds that it has been demonstrated in various communities that the concentration of adult-oriented businesses causes an increase in the number of transients in the area, and an increase in crime, and in addition to the effects described above can cause other businesses and residents to move elsewhere. It is, therefore, the purpose of this Article to establish reasonable and uniform regulations to prevent the concentration of adult-oriented businesses or their close proximity to incompatible uses, while permitting the location of adult-oriented businesses in certain areas.

B. Location Standards.

1. Subject to the provisions of this chapter, adult-oriented businesses shall be permitted only in the Industrial Park (IP), Industrial Limited (IL), ~~and Industrial General (IG),~~ **and Industrial Transition (IT)** Districts, provided:
 - a. Each adult-oriented business shall, prior to commencement or continuation of such business, first apply for and receive zoning approval from the Community Development Department.
 - b. Each such adult-oriented business must, prior to commencement or continuation of such business, first apply for and receive an adult-oriented business license.
 - c. Each such adult-oriented business must comply with all applicable development and design regulations of the applicable zone.
 - d. No adult-oriented business shall be located in any zoning district with an overlay zone.
 - e. No adult-oriented business shall be located on any parcel that contains frontage on Merced Street, Alvarado Street, Williams Street, Doolittle Drive or Fairway Drive.
2. No adult-oriented business shall be established or located within one thousand (1,000) feet of the following:
 - a. Any place of religious assembly;
 - b. Any residentially zoned land, whether in the City of San Leandro, in an adjoining city, or within the unincorporated area;
 - c. Any public park, or property zoned, planned, or otherwise designated for such use by City action, and a public or private educational facility including, but not

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

limited to, child day care facilities, libraries, nursery schools, pre-schools, kindergartens, elementary schools, private schools, intermediate schools, junior high schools, middle schools, high schools, secondary schools, continuation schools, special education schools, junior colleges, and universities; schools includes the school grounds, but does not included facilities used primarily for another purpose and only incidentally as a school;

- d. Any boys club, girls club, or similar youth organization; or
- e. Any large family, general, or limited day care facility licensed by the State of California.
- f. Any establishment that holds a state license for the sale or consumption of alcohol beverages, except this definition shall not include restaurants that have a bar on site so long as more than fifty (50) percent of the customer seating is dedicated to restaurant patrons. This definition applies solely to the location criteria of this Section.

The uses and zones set forth herein shall be collectively known as “impacted uses.”

- 3. No adult-oriented business may be established or located within one thousand (1,000) feet of any other adult-oriented business, whether in the City of San Leandro, in an adjoining city, or within the unincorporated area.
 - 4. If any portion of a property fails to meet the distance criteria set forth above, the entire property shall be ineligible for an adult-oriented business use.
- C. Design Standards. Per Zoning Code Section 2-700E, the purpose of the industrial district regulations include ensuring that “the appearance and effects of industrial uses are compatible with the character of the area in which they are located.” The Zoning Enforcement Official shall review and approve all plans and elevations of buildings housing adult-oriented businesses to determine whether they meet this standard. This review will consider building color, massing, architectural features and other exterior details. A decision on this design compliance for a new business shall be given within thirty (30) days of the granting of an Adult-Oriented Business Regulatory Permit; any changes to the exterior of the building after the initial review shall also be subject to review and approval by the Zoning Enforcement Official.
- D. Appeal. Any decision of the Zoning Enforcement Official made pursuant to this Article may be appealed to the Planning Commission pursuant to Article 28. Any administrative action made pursuant to this Article may be appealed to a court of competent jurisdiction. (Ord. 2001-015 § 1)

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

4-1684 Hazardous Waste Facilities

- A. Intent. The purpose of this Section is to establish uniform standards, land-use regulations and a permit process for controlling the location, design, maintenance and safety of off-site hazardous waste facilities. These standards, regulations and processes are intended to be consistent with Article 8.7 of the California Health and Safety Code, applicable portions of the Alameda County Hazardous Waste Management Plan and the City of San Leandro General Plan.
- B. Applicability.
1. The specific requirements of this ordinance are applicable to the siting and development of off-site hazardous waste treatment, storage, or transfer facilities. Off-site hazardous waste facilities mean those facilities which treat, store, recycle, incinerate or transfer hazardous wastes from at least two (2) producers of hazardous wastes which are not located on the same property of the hazardous waste facility. Consistent with the Alameda County Hazardous Waste Management Plan, off-site hazardous waste facilities only include those facility types as defined by the Plan for small-scale transfer and storage including hazardous waste collection facilities, industrial transfer, storage and treatment facilities, and residual repositories.
 2. The off-site facility definition does not apply to:
 - a. Transportable Treatment Units (TTUs), which are designed to be moved either intact or in modules and which are intended to be operated at a given location for a limited period of time; or
 - b. Permanent on-site hazardous waste facilities at locations where hazardous waste is produced and which are owned by, leased to, or under the control of the producer of the waste.
 3. All such facilities (i.e., off-site, on-site, household hazardous waste collection, and TTUs) shall obtain all necessary state licensing and Certified Unified Program Agencies (CUPA) approvals to install and operate.
 4. A conditional use permit for a hazardous waste facility shall be granted for only those substances and quantities identified in the conditions of approval. No additional types of wastes or increases in the quantity of approved wastes shall be allowed beyond those specified in the approved permit, unless a separate application is made, which shall satisfy the same procedures and contents as those required in an initial application.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

C. Procedure. Applications for hazardous waste facilities as defined by this Section shall follow the procedure specified by Article 8.7 of the State Health and Safety Code and Article 22 of the Zoning Ordinance pertaining to use permits.

D. Application Requirements.

The information listed below is required at the time a hazardous waste facility application for an off-site facility is submitted to the Community Development Department:

1. A complete development case application signed by the property owner or their authorized representative.
2. A non-refundable deposit or fee as set forth by ordinance or resolution of the City Council.
3. Any deposit for technical assistance pursuant to Section 25199.7 (g) of the State Health and Safety Code.
4. A letter of justification describing the proposed project and explaining how it will satisfy the findings in Section 4-1684.J.
5. Information required for public meetings and hearings, as determined by the Community Development Director.
6. A scaled, fully-dimensioned site plan and development plan drawn in sufficient detail to clearly describe the following:
 - a. Physical dimensions of property and structures;
 - b. Location of existing and proposed structures;
 - c. Setbacks;
 - d. Methods of circulation and location of truck routes;
 - e. Ingress and egress;
 - f. Utilization of property under the requested permit;
 - g. The distance from the project property lines to the nearest residential structure;
 - h. Proximity of the project to one hundred (100) year floodplain areas;
 - i. Proximity of the project to any known earthquake fault zones;

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

- j. The relationship of the proposed project to all aboveground water supplies, as well as known underground aquifers that could conceivably suffer contamination;
 - k. Topographic description of the property and surrounding area;
 - l. Existing and proposed utilities that service or will be needed to service the facility;
 - m. Identification of surrounding zoning and land uses;
 - n. Landscape plans showing theme and location of all landscape areas;
 - o. Building elevations showing building height, exterior materials, and architectural theme; and
 - p. Other information as required by the Community Development Director.
- 7. A preliminary geological study of the property and surrounding area, which includes a soils analysis down to the depth of the deepest known aquifers, regardless of the potability of those aquifers.
 - 8. Identification of all wastewater, treated and untreated, generated by the proposed facility and the method and place of final discharge.
 - 9. Identification of the amounts (tonnage) and types of hazardous wastes to be treated at the proposed facility; the sources of these wastes; the ultimate disposition of the wastes; and the anticipated life of the facility. Information shall be provided on the amount, sources, and types of hazardous wastes to be treated based on an actual survey of the industries to be served and, thereby, be representative of the wastes that will be processed at the facility.
 - 10. A plan that clearly delineates all public involvement with the proposed project prior to any formally advertised and scheduled public hearings. Said plan will provide for adequate public testimony on the project in an effort to mitigate all public concerns prior to the approval body reviewing the case.
 - 11. A plan that identifies an ongoing monitoring program to ensure no unintentional release of any hazardous substance from the site. This shall include any ongoing monitoring necessary by other permitting agencies such as State Department of Health Services, the Bay Area Air Quality Management District (BAAQMD), Environmental Protection Agency (EPA), San Francisco Bay Regional Water Quality Control Board, etc.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

12. A preliminary contingency plan for emergency procedures designed to minimize hazards to human health or the environment from fires, explosions, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water. The plan shall provide for its immediate implementation whenever there is a fire, explosion, or release of hazardous waste constituents, which could threaten human health or the environment. The preliminary contingency plan shall address the requirements included in Section 4-1684.G.3.
13. Other information as required by the Community Development Director to demonstrate compliance with the facility siting criteria as outlined in Section 4-1684.F.

E. Environmental Review.

1. The project shall be subject to environmental analysis according to the City's environmental guidelines pursuant to the California Environmental Quality Act (Public Resources Code Sections 21000-21177; 15000-15387).
2. The environmental analysis shall address, but not be limited to, the following:
 - a. Describe at least two (2) reasonable alternative sites to the project; these alternatives shall be reviewed pursuant to the California Environmental Quality Act [Public Resources Code, Section 15060(d)].
 - b. An analysis of visual, noise, and any olfactory impacts associated with the project and recommended mitigation measures.
 - c. An analysis of all anticipated air quality impacts associated with the project and proposed mitigation to ensure no degradation of air quality in the area.
 - d. A health and safety assessment that analyzes in detail all probabilities of accidents or spills at the site, as well as transportation-related accidents from the point of origin to the facility. Such analysis shall identify mitigation measures to reduce identified risks. The health and safety assessment shall identify the most probable routes for transporting hazardous wastes to the facility within Alameda and, if applicable, Contra Costa or Santa Clara counties.
 - e. An analysis of traffic impacts associated with the project and recommended mitigation measures.
 - f. An analysis of all anticipated water quality impacts associated with the project and proposed mitigation to ensure no degradation of water quality in the area.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

- g. Other information as required by the California Environmental Quality Act (CEQA).

F. Facility Siting Criteria and Permitting Requirements.

The following siting criteria has been established for use by hazardous waste facility project proponents in locating and designing suitable facility sites and appropriate facilities and by the City in evaluating proposed sites and facility projects. The purpose of the criteria is to reduce public health and environmental risks and governmental costs associated with development of off-site hazardous waste facilities.

1. Protect the Residents of Alameda County (and the City of San Leandro).

a. Health and Safety Assessment.

- i. All Facilities. Facilities shall be sited so as not to create significant risks or cause adverse impacts to the health and safety of populations in surrounding public and private areas, as determined by a health and safety assessment. A health and safety assessment by a qualified preparer is required for a proposed facility prior to approval of a local permit, to provide technical and environmental evaluation of the proposed facility, site, and surrounding area. A health and safety assessment will provide the information and analysis needed to demonstrate compliance of the proposed facility with the siting criteria. The scope of the assessment will vary according to the size, type, and proposed location of the facility. It is not intended that the health and safety assessment duplicate information developed for environmental impact reports or risk assessments required under local, state or federal regulations. When environmental impact reports and health risk assessments are required, their scopes should provide the information and analysis required, and, thereby, suffice for the health and safety assessment.
- ii. The health and safety assessment shall evaluate the potential impact of the proposed facility on existing and planned residences and immobile populations, at minimum, the buffer area prescribed by the Alameda County Hazardous Waste Management Plan. Immobile populations include those in schools, hospitals, convalescent homes, jails, and other similar facilities within the area of potential impact. The health and safety assessment must consider the quantities and the physical and chemical characteristics of the specific types of waste that would be handled, the facility design features, and planned operations practices. The justification for any reduction in buffer areas of the facility from residential areas or immobile populations than that prescribed by the Alameda County Hazardous Waste Management Plan will be identified. The

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike-through~~ represents text to be eliminated

assessment must include a hydrologic evaluation and must assess risks due to physical hazards, such as flooding and earthquakes and potential water or air pollution. The assessment will detail credible potential accidents, including the distance over which effects would carry a variety of options for reducing risks, and procedures for dealing with the effects. The assessment will identify the capabilities (including equipment and trained personnel) and response times of existing emergency services with regard to accidents at the facility and will provide an emergency evacuation plan. If existing emergency services are deemed inadequate, the local agency may require the developer to supplement those services with on-site trained personnel and equipment.

- iii. Avoidance or mitigation of potential significant health or safety risks must be demonstrated to the satisfaction of the local permitting agency and the California Department of Health Services.

b. Distance from Populations.

All Facilities. Facilities shall comply with local minimum zoning code setbacks, unless a greater buffer distance from other uses is deemed necessary based on a required health and safety assessment.

2. Ensure the Structural Stability of the Facility.

a. Floodplains.

- i. All Facilities. Facilities must be designed, constructed, operated and maintained to preclude failure due to flooding, per flood control authorities and requirements. Provisions must be made to contain and test storm runoff prior to discharge in areas subject to contamination by waste or treated material. The required health and safety assessment will address flooding risks associated with the facility.
- ii. Treatment, Recycling and Collection Facilities. Facilities may be located in areas subject to one hundred (100) year flooding only if protected by offsetting engineered improvements, such as berms or raising the facility above flood levels. This includes areas subject to flooding by dam or levee failure and natural causes such as river flooding, flash floods, rainfall or snowmelt, tsunamis (tidal waves), seiches (earthquake-induced waves in lakes), and coastal flooding. A structural analysis or engineering design study must be provided which shows methods to prevent undulation or washout.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

- iii. Residuals Repositories. Repositories are prohibited from locating in floodplain areas subject to one hundred (100) year flooding from natural causes or dam failure, even with protection, per Code of Federal Regulation (CFR), Title 40, Section 264.18(b) and California Administrative Code (CAC), Title 22, Section 66391(a)(11)(b).

- b. Earthquakes.

All Facilities. Facilities must have a minimum two hundred (200) foot setback from active or recently active earthquake faults, per the California Administrative Code (CAC), Title 22, Section 6391(a)(f11)A(1) and (2). The required health and safety assessment will address earthquake safety of the facility.

- c. Unstable Soils.

- i. Treatment, Recycling and Collection Facilities. Facilities are prohibited from locating in areas of potential rapid geologic change unless the facility and its containment structures have engineered design features to assure structural stability. This includes areas with unstable soils, steep slopes, and areas subject to liquefaction, subsidence, or other severe geologic constraints. The required health and safety assessment will include a geologic report defining any such constraints and engineered solutions.
- ii. Residual Repositories. Repositories are prohibited from locating in areas within twenty-five percent (25%) slope or greater or in areas subject to liquefaction or subsidence.

- 3. Protect Surface and Groundwater Quality.

- a. Groundwater.

- i. All Facilities. Facilities shall be fully enclosed by containment structures of impermeable materials, which would contain any unauthorized release of hazardous material. Facilities shall be equipped with leak detection and spill control and recovery capability.
- ii. Facilities are also encouraged to locate outside of areas where groundwater is within twenty (20) feet of the natural land surface. Facilities may locate in these areas only with increased engineered design features such as horizontal and vertical containment and monitoring systems to ensure protection. Subsurface storage or treatment operation is prohibited.

- b. Surface Water Quality.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

All Facilities. Developers, Operators and Owners shall comply with the requirements of the Statewide General Stormwater Permits; the Municipal Regional Stormwater Permit and Alameda Countywide Clean Water Program requirements.

c. Wastewater.

All Facilities. Facilities operating wastewater should locate in areas with adequate industrial sewer capacity. The quality of wastewater must meet all federal, state, and local sewerage agency discharge requirements, and the facility must obtain a valid industrial wastewater discharge permit.

4. Protect Air Quality.

a. Air Quality Non-Attainment and PSD Areas.

All Facilities. Facilities may be sited in non-attainment and PSD (prevention of significant deterioration) areas only if they meet the requirements of the Bay Area Air Quality Management District. The required health and safety assessment will identify air emissions, impacts and mitigation associated with the facility.

5. Protect Environmentally Sensitive Areas.

a. Wetlands.

All Facilities. Facilities are prohibited from locating in wetlands, such as salt-water, fresh water and brackish marshes, swamps and bogs, as defined in local regional and state plans and policies (generally, areas inundated by surface water or groundwater with a frequency to support, under normal circumstances, a prevalence of vegetative or aquatic life, which requires saturated soil conditions for growth and reproduction).

b. Animal and Plant Habitats.

All Facilities. Facilities are prohibited from locating within critical habitats of endangered species, defined as areas known to be inhabited permanently or seasonally or known to be critical at any stage in the life cycle of any species of wildlife or vegetation identified or being considered for identification as “endangered” or “threatened” by the U.S. Department of Interior or the State of California.

c. Prime Agricultural Lands.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

All Facilities. Facilities are prohibited from locating on prime agricultural lands, as defined in California law and local plans, unless an overriding public need is served and demonstrated.

d. Recreational, Cultural, and Aesthetic Resources.

i. Small-Scale Transfer and Storage Facilities. Low-volume transfer and storage facilities may locate in protected, recreational, cultural, or aesthetic resource areas, as defined by local, regional, state, or national plans or policies, only if necessary to handle hazardous wastes generated by workers, residents, or visitors in these areas.

ii. Industrial Facilities and Residuals Repositories. Facilities are prohibited from locating in protected recreational, cultural and aesthetic resource areas, as defined by local, regional, state, or national plans or policies.

e. Mineral Resource Areas.

All Facilities. Facilities are prohibited from locating on lands containing significant mineral deposits, as classified by local plans or California's mineral land class maps and reports, if the extraction of the mineral deposit would be precluded.

6. Ensure Safe Transportation of Hazardous Waste.

a. Proximity to Waste Generation Areas.

i. Treatment, Recycling and Collection Facilities. Facilities shall locate in Light Industrial and General Industrial Districts at locations close to sources of hazardous waste generation to minimize the risks of transportation.

ii. Residuals Repositories. Repositories may be located more distant from waste generation sources than other facilities because of the need for large land areas.

b. Proximity and Access to Major Routes.

All Facilities. Facilities shall locate to minimize distance from major transportation routes. Facilities must have good access by roads designed to accommodate heavy vehicles. Travel routes from facilities to major transportation routes shall be on industrial streets, accessible to designated truck routes, not pass through residential neighborhoods, shall minimize residential frontages,

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

and shall be demonstrated as safe with regard to road design and construction, accident rates, excessive traffic, etc. The required health and safety assessment will evaluate risks associated with transportation of hazardous wastes.

7. Protect the Social and Economic Goals of the Community.

a. Consistency with General Plan and Zoning.

All Facilities. Facilities must be consistent with local planning policies, including the City General Plan and zoning ordinance.

b. Fiscal Impact.

All Facilities. A facility's fiscal impact to the City, whether positive or negative, must be demonstrated.

c. Socioeconomic Impacts.

All Facilities. The City may require the facility developer to fund an independent study on socioeconomic impacts of the facility.

d. Proximity to Public Services.

All Facilities. Facilities shall be served by necessary public services, including but not necessarily limited to sewer, water, electricity, gas, and telephone. Potential adverse impacts which could occur because of proximity to public facilities shall be determined as a part of the risk assessment conducted in the permitting process. This should consider the physical and chemical characteristics of the wastes that will be handled and the design features of the facility. Proximity to other public facilities such as corporation yards, utilities, roads, and state school lands in remote areas may be acceptable. The response time from the nearest fire station shall also be considered.

e. Consistency with Alameda County Hazardous Waste Management Plan.

All Facilities. Facilities shall be consistent with the goals and policies of the Alameda County Hazardous Waste Management Plan, and must demonstrate compliance with the siting criteria established by this Section. Facilities shall be consistent with the fair-share principal, and with any inter-jurisdictional agreements on hazardous waste management. Local needs are to be the primary basis for facility siting criteria decisions, along with regional commitments; facilities are to be designed and sized primarily to meet the hazardous

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

waste management needs of Alameda County, or to meet the county's broader regional commitments under an inter-jurisdictional agreement.

G. Special Development Requirements.

1. General Conditions.

The City may impose conditions on the granting of a conditional use permit for a hazardous waste facility in order to achieve the purposes of this Chapter and the General Plan and to protect the health, safety and general welfare of the community.

2. Safety and Security.

- a. The owner or operator shall prevent the unknowing entry and minimize the possibility for the unauthorized entry of persons or livestock onto any portion of the facility.
- b. The operator shall provide a twenty-four (24) hour surveillance system (e.g., television monitoring or surveillance by guards or facility personnel), which continuously monitors and controls entry onto the facility.
- c. An artificial or natural barrier (e.g., a wall or a wall combined with a landscaped berm) shall be constructed to completely surround the facility.
- d. All gates or other entrances into the facility shall be provided with adequate means to control entry at all times. Signs with the legend, "Danger - Hazardous Waste Area - Unauthorized Personnel Keep Out," shall be posted at each entrance to the facility and at other locations in sufficient numbers to be seen from any approach. The legend shall be written in English, Spanish, and any language predominant in the area surrounding the facility and shall be legible from a distance of at least twenty-five (25) feet. Existing signs with a legend other than "Danger - Unauthorized Personnel Keep Out" may be used if the legend on the sign indicates that only authorized personnel are allowed to enter the active portion and that entry onto the active portion can be dangerous.

3. Contingency Plan.

- a. The hazardous waste facility is required to have a contingency plan designed to minimize hazards to human health and the environment from fires, explosions, or unplanned release of hazardous waste to air, soil, or surface water. The plan shall be carried out immediately whenever a fire, explosion, or unplanned release occurs.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

- b. The contingency plan shall include:
 - i. The actions employees must take in response to a fire, explosion, or unplanned release of hazardous waste.
 - ii. Arrangements agreed to by local emergency response officials.
 - iii. The names, addresses, and telephone numbers (office and home) of all persons qualified to act as emergency coordinator. [If more than one (1) name is listed, the order in which they may assume authority shall be given, with one (1) person designated as primary coordinator.] The emergency coordinator shall be available to respond to all emergency response measures. The emergency coordinator shall be familiar with all aspects of the contingency plan, all operations and activities of the facility, the location and characteristics of wastes handled, and general facility layout. The emergency coordinator shall have the authority to commit the resources needed to carry out the contingency plan.
 - iv. A listing of all emergency equipment at the facility, including its location and an outline of its capabilities.
 - v. An evacuation plan for employees where evacuation may be necessary, including signals used to begin evacuation, primary evacuation routes, and alternate routes.
- c. Facility emergency coordinator responsibilities shall be identified in the contingency plan to include, at minimum, the following:
 - i. In the event of a fire, explosion, or release of any hazardous material, the emergency coordinator shall immediately activate facility alarms to notify employees and shall contact appropriate state or local emergency response agencies.
 - ii. In the event of a fire, explosion, or release of any hazardous material, the emergency coordinator shall immediately identify the character, exact source, amount, and aerial extent of any released materials. Concurrently, the emergency coordinator shall assess possible hazards, both direct and indirect, to human health or the environment that may result from the emergency.
 - iii. If the emergency coordinator determines that the facility has had a release, fire, or explosion which could threaten human health and the

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

environment outside the facility, the emergency coordinator shall report his or her findings as per the following Subsections 4 and 5.

- iv. If evacuation is necessary, local officials shall be so notified.
- v. The emergency coordinator shall in every situation notify the State Office of Emergency Services and the Alameda County Fire Department, providing the following information:
 - (a) Name and telephone of person reporting;
 - (b) Name and address of facility;
 - (c) Time and type of incident;
 - (d) Name and quantity of material(s) involved;
 - (e) Extent of injuries; and
 - (f) Possible hazard to human health and the environment outside facility.
- vi. During the emergency, the emergency coordinator shall take all reasonable measures to ensure that fires, explosions, and releases do not occur or spread, including such measures as:
 - (a) Stopping operations;
 - (b) Collecting and containing released waste; and
 - (c) Removing or isolating containers.
- vii. If the facility stops operations during an emergency, the emergency coordinator shall monitor for leaks, pressure build-up, gas generation, or ruptures in valves, pipes or other equipment as appropriate.
- viii. Immediately after an emergency, the emergency coordinator shall provide for treating, storing or disposing of recovered waste, contaminated soil or surface water, or any other material resulting from a release, fire, or explosion.
- ix. Other activities required of the emergency coordinator after an emergency are:

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

- (a) No wastes incompatible with the released material is handled until cleanup is completed; and
 - (b) Emergency equipment is cleaned and ready for use before operations are resumed.
- d. Owner/operator responsibilities shall be identified in the contingency plan to include, at minimum, the following:
 - i. Notify the State Department of Health Services and appropriate state and local authorities that the above requirements have been met before operations are resumed in the affected area.
 - ii. Record the time, date and details of any incident, which requires implementing the contingency plan.
 - iii. Within fifteen (15) days, submit a written report on the incident to the State Department of Health Services. The report shall include:
 - (a) Name, address and telephone number of owner/operator;
 - (b) Name, address and telephone number of the facility;
 - (c) Date, time, and type of incident;
 - (d) Name and quantity of materials involved;
 - (e) Extent of injuries;
 - (f) Assessment of actual or potential hazards to human health or the environment, where applicable; and
 - (g) An estimate of the quantity of material recovered and its disposition.
 - iv. A copy of the contingency plan shall be maintained at the facility. A copy shall be sent to City of San Leandro Hazardous Materials Division, surrounding hospitals, Alameda County Health Care Agency, and other regulatory agencies as deemed appropriate.
 - v. The contingency plan shall be reviewed and amended when any of the following occur:
 - (a) The facility permit is revised.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

- (b) Applicable regulations are revised.
- (c) The plan fails in an emergency.
- (d) Operations at the facility change in a way that materially increases the potential of fire, explosion, or unplanned release of hazardous waste.
- (e) The list of emergency coordinators changes.
- (f) The list of emergency equipment changes.

4. Monitoring.

- a. Upon reasonable notice, the City, their designated representatives of other agencies, may enter a parcel on which a conditional use permit for a hazardous waste facility has been granted for the purpose of monitoring the operation of the facility.
- b. All structures shall remain accessible for inspection purposes.

5. Closure Plan.

The owner or operator of a hazardous waste management facility shall submit a written closure plan. A copy of the approved plan and all revisions to the plan shall be kept at the facility until closure is completed. The plan shall identify steps necessary to completely or partially close the facility at the end of its intended operating life. The closure plan shall include at least:

- a. A description of how and when the facility will be partially closed, if applicable, and finally closed. The description shall identify the maximum extent of the operation that will be open during the life of the facility.
- b. An estimate of the maximum inventory of wastes in storage and in treatment at any time during the life of the facility.
- c. A description of the steps needed to decontaminate facility equipment during closure.
- d. An estimate of the expected year of closure and a schedule for final closure. The schedule shall include, at a minimum, the initial time required to close the facility and the time required for intervening closure activities, which will allow tracking of the progress of closure.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

The owner or operator may amend his or her closure plan at any time during the active life of the facility. (The active life of the facility is that period during which wastes are periodically received.) The owner or operator shall amend the plan whenever changes in operating plans or facility design affect the closure plan or whenever there is a change in the expected year of closure. When the owner or operator requests a permit modification to authorize a change in operating plans or facility design, a modification of the closure plan shall be requested at the same time.

- e. The plan shall clearly indicate an effective and ongoing use for the facility after closure. The plan will identify how the subject property will be used after the anticipated life of the project, the nature and type of reclamation, provisions for maintenance of the project, and, finally, the requirements for long-term monitoring of the reclaimed area to ensure no hazardous materials are leaking from the site.
- f. The plan shall indicate financial arrangements (irrevocable trust or other form of security arrangement) for the purpose of providing funds for the closure of its site and its long-term, post-closure monitoring maintenance, per Section 4-1684.H.3 below.

H. Financial Responsibility.

The owner/operator shall show proof of liability insurance as follows:

1. The types, amounts, periods of coverage, and provisions for periodic review as to adequacy of coverage shall be specified in the conditions of approval. Required insurance shall include, but not be limited to: general liability insurance, automotive liability insurance, environmental impairment liability insurance, and architect's and engineer's professional liability insurance.

All such insurance shall name the City as an additional insured and shall be maintained for the life of the site and such additional periods as shall be specified in the conditions of approval.

2. Additionally, coverage will be provided for workers compensation insurance and such other insurance as may be required. Said insurance will name the City as either additional insured or as an additional loss payee. Certificates of insurance will be submitted to the City annually.
3. An irrevocable trust will be established to provide funds for closure of the site and its long-term post-closure and monitoring and maintenance. Funds for this trust would be provided by the owner/operator of the facility quarterly, based on quantity and types of percentage of gross income. The terms of the trust would be as

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

agreed upon by the project owner/operator and the City. The terms will be reviewed annually in regards to the amount of funds in the trust and anticipated closure monitoring and maintenance costs. Applicants shall provide a bond in an amount to be determined by the City for purposes of closure of the site.

4. The owner/operator shall defend, indemnify, and hold harmless the City, its officers, agents, servants, and employees, from all claims, actions, or liabilities arising out of the issuance of this permit, operations at the facility, and transportation of wastes to and from the facility.

I. Local Assessment Committee (LAC).

1. Pursuant to Section 25199.7 (d) of the State Health and Safety Code, the City Council shall appoint a seven (7) member Local Assessment Committee (LAC). The membership, responsibilities, and duties shall be consistent with the provisions of Section 25199.7 of the State Health and Safety Code. The LAC shall cease to exist after the final administrative action has been taken by the state and local agencies on the permit applications for the project for which the LAC was formed.
2. The City Council shall provide staff resources to assist the LAC in performing its duties. (Requirement of Section 25199.7(d)(3) of the California Health and Safety Code.)
3. If the LAC and the applicant cannot resolve any differences through the meetings specified by state law, Office of Permit Assistance (OPA) may assist in this resolution pursuant to Section 25199.4 of the California Health and Safety Code. (Requirement of Section 25199.7(h) of the California Health and Safety Code.)

J. Hearings and Notice.

Hearings and public notices shall be consistent with the applicable requirements of Article 8.7 of the State Health and Safety Code and Article 22: Use Permits, Variances, and Parking Exceptions, of the City of San Leandro Zoning Ordinance.

K. Findings.

In order for the Board of Zoning Adjustments to approve a hazardous waste facility application, the Board must act on this application prior to approving a conditional use permit for a hazardous waste facility. The Board of Zoning Adjustments shall find that:

1. The project is consistent with the City's General Plan and zoning ordinance.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

2. The project is not detrimental to the public health, safety or general welfare of the community.
3. The project site is or will be adequately served by roads and other public or private service facilities.
4. The project is consistent with the regional fair-share facility needs assessment and siting policies established in the Alameda County Hazardous Waste Management Plan.
5. The project complies with the facility siting criteria per Section 4-1684.F.

L. Appeal.

An applicant or an interested person may file an appeal of a land-use decision made by the City to the Governor's Appeal Board within thirty (30) days after the date the City takes final action on the land-use decision pursuant to California Health and Safety Code Section 25199.9. Procedures for filing an appeal are outlined in Section 25199.14 of the California Health and Safety Code.

M. Time Limits.

1. A conditional use permit granted for an off-site hazardous waste facility shall be exercised within two (2) years from the effective date thereof, or within such additional time as may be set in the conditions of approval, which shall not exceed a total of seven (7) years; otherwise, the permit shall be null and void. The term "exercised" shall mean the beginning of substantial construction of the use that is authorized, which construction must thereafter be pursued diligently to completion.
2. Permit review and renewal shall be determined at the time of approval and shall not exceed five (5) years.

N. Household Hazardous Waste Collection Facilities.

Household hazardous waste collection facilities which meets the requirements of Article 10.8 of the State Health and Safety Code shall meet the requirements of this Section provided that the Community Development Director may exempt informational or analysis requirements of Sections 4-1684.D, 4-1684.F, and 4-1684.G where the data are determined to be nonessential for the approval of the permit.

O. Conflicts with Industrial Zone Standards.

Where conflicts in standards and requirements may exist between this section and Article 7: Industrial Districts, the provisions of this Section shall take precedence.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

P. Severability.

In the event that any one (1) or more of the phrases, sentences, clauses, paragraphs, or sections contained in this ordinance shall be declared invalid or unenforceable by a valid judgment or decree of a court of competent jurisdiction, such invalidity or unenforceability shall not affect any of the remaining phrases, sentences, clauses, paragraphs, or sections of this ordinance which are hereby declared as several and shall be interpreted to carry out the intent hereunder. (Ord. 2014-011 § 2; Ord. 2001-015 § 1)

4-1686 Wireless Telecommunications Facilities

- A. Title, Purpose and Applicability. The provisions of this Chapter shall be known as the Wireless Telecommunications Facilities regulations. The purpose and intent of these regulations are to provide a uniform and comprehensive set of standards for the development, location, siting, design and installation of wireless telecommunications facilities. These regulations are intended to balance the needs of the wireless communications providers, the regulatory functions of the City of San Leandro, the mandates of State and Federal law and the potential impacts on the community and neighboring property owners in the design and siting of wireless facilities. The regulations are designed to promote and protect the public health, safety, and welfare and visual quality of the City of San Leandro while encouraging the appropriate development of telecommunications activities and site sharing throughout the City. These regulations shall apply to telecommunications projects.
- B. Definitions. As used in this Section, the following terms shall have the meanings indicated, as they relate to wireless telecommunications facilities:
1. “Alternative tower structure” shall mean stealth facilities like freestanding support structures, man-made trees, clock towers, bell steeples, light poles and similar alternative-design mounting structures that camouflage or conceal the presence of antennas or towers so that the purpose of the freestanding facility or structure is not readily apparent to the casual observer.
 2. “Antenna” shall mean any communications equipment that transmits and receives radio-frequency signals used in the provision of all types of wireless telecommunications services.
 3. “Architecturally-integrated” shall mean that the wireless telecommunications facility is designed to closely blend into the surrounding environment and to be minimally visible to the casual observer (i.e., stealth). Antennas and related equipment are either not readily visible beyond the property on which it is located, or if visible, appear to be part of the existing building or environment rather than a wireless facility. The wireless facility may be incorporated into a building’s architectural features, such as a steeple, parapet wall, clock tower, flagpole, cupola, chimney, vent

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike-through~~ represents text to be eliminated

pipe or light standard or be screened by an equipment screen or other equally suitable method. It may include alternative tower structures, such as freestanding flagpoles, treepoles, windmills, signs and similar support structures that conceal the presence of a wireless facility within that structure. Related equipment shall be designed to match the architecture of adjacent buildings and/or be screened from public view by walls, fences, parapets, landscaping, and similar treatments.

4. “Base station” shall mean the equipment and non-tower supporting structure or enclosure at a fixed location that enables licensed or authorized wireless telecommunications between user equipment and a communications network, including, but not limited to, an antenna, transceiver, coaxial cable, power supply and other associated equipment.
5. “Co-location” shall mean the location of two (2) or more wireless telecommunications facilities on a single existing, previously-approved tower, building, or other support structure for the purpose of transmitting and/or receiving radio frequency signals for communications purposes. Co-locations that do not substantially change the physical dimensions of the existing support structure as defined herein and by Section 6409(a) of the Middle Class Tax Relief and Jobs Creation Act of 2012 may be processed through an eligible facilities request to the Community Development Department.
6. “Eligible facilities request” shall mean any request for the modification of an existing wireless tower or base station that involves: (a) co-location of new transmission equipment; (b) removal of transmission equipment; or (c) replacement of transmission equipment pursuant to Section 6409(a) of the Middle Class Tax Relief and Job Creation Act of 2012. Such a request to the Community Development Department shall show the baseline height and width of the existing facility in relation to the proposed changes to demonstrate that the proposed changes do not result in a substantial modification to the physical dimensions of the existing support structure (i.e., a maximum increase of ten percent (10%) surface area in antennas and related equipment).
7. “FAA” shall mean the Federal Aviation Administration.
8. “FCC” shall mean the Federal Communications Commission.
9. “Governing authority” shall mean the City Council of the City of San Leandro.
10. “Ground-mounted facility” shall mean a wireless telecommunications facility consisting of one (1) or more poles or posts mounted on the ground that are used to support antennas. Any ground-mounted facility that is over fifteen (15) feet in height shall be considered a monopole.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike-through~~ represents text to be eliminated

11. "Height" shall mean, when referring to a tower or other structure, the distance measured from ground level to the highest point on the tower or other structure, even if said highest point is an antenna.
12. "Maintenance" shall mean the following: (a) scheduled preventive inspections and activities per manufacturer's instructions or regulatory requirements; (b) corrective maintenance including modification to existing equipment to repair physical damage or correct internal faults; (c) minor repositioning or changes in internal components to improve performance or energy efficiency or increase power output; and (d) other changes to the existing equipment that does not substantially change its physical appearance.
13. "Minor modification" shall mean a change to an existing wireless telecommunications facility, whether emergency or routine, provided there is little or no change in the visual appearance (i.e., a maximum increase of ten percent (10%) surface area in antennas and related equipment) and does not constitute a substantial modification, as defined herein (see Subsection B.16). Minor modifications are those modifications to conforming wireless telecommunications facilities that meet the performance standards set forth in these regulations.
14. "Monopole" shall mean a single, freestanding pole, treepole, flagpole, post, tower or alternative tower structure over fifteen (15) feet in height that is used to support equipment associated with a wireless telecommunications facility.
15. "Pre-existing wireless telecommunications facility" shall mean any wireless telecommunications facility for which a permit has been properly issued prior to the effective date of this Section and shall not be required to meet the requirements of this Section, other than the requirements of Subsection C.4. Any such facility shall be referred to in this Section as "pre-existing wireless telecommunications facility."
16. "Substantial modification" shall mean substantially changing the physical dimensions of a tower or base station on an existing wireless telecommunications facility, such that it meets one or more of the following criteria:
 - a. Height. Increases the existing vertical height by more than ten percent (10%) for towers other than towers in the public right-of-way or by the height of one additional antenna array with separation from the nearest existing antenna not to exceed twenty (20) feet, whichever is greater, except that the mounting of the proposed antenna may exceed the size limits set forth in this paragraph if necessary to avoid interference with existing antennas.

For other, eligible support structures, it increases the height of the structure by more than ten percent (10%) or more than ten (10) feet, whichever is greater.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike-through~~ represents text to be eliminated

- b. Width. Involves adding an appurtenance to the silhouette of a tower for towers other than towers in the public right-of-way that would protrude horizontally from the edge of the tower more than twenty (20) feet, or more than the width of the tower structure at the level of the appurtenance, whichever is greater, as seen from an elevation perspective, except that the mounting of the proposed antenna may exceed the size limits set forth in this paragraph if necessary to shelter the antenna from inclement weather or to connect the antenna to the tower via cable.

For other, eligible support structures, it involves adding an appurtenance to the body of the structure that would protrude from the edge of the structure by more than six (6) feet.

- c. Equipment Cabinets. Involves the installation of more than the standard number of new equipment cabinets necessary for the technology involved, not to exceed four cabinets; or for towers and base stations in the public right-of-way, it involves installation of any new equipment cabinets on the ground if there are no pre-existing ground cabinets associated with the structure, or else involves installation of ground cabinets that are more than ten percent (10%) larger in height or overall volume than any other ground cabinets associated with the structure.
 - d. Excavation/Deployment Beyond Site. Involves any excavation or deployment outside the current site, defined as the current boundaries of the leased or owned property surrounding the tower and any access or utility easements currently related to the site; and for other, eligible support structures, further restricted to that area in proximity to the structure and to other transmission equipment already deployed on the ground.
17. “Tower” shall mean any structure that is designed and constructed primarily for the purpose of supporting one or more wireless telecommunications facilities, including self-supporting lattice towers, guy towers, utility poles, treepoles, monopoles, alternative tower structures, or architecturally-integrated facilities. The term includes, but is not limited to, radio and television transmission towers, microwave towers, and certain co-locations not otherwise governed by Section 6409(a) of the Middle Class Tax Relief and Job Creation Act of 2012.
18. “Wireless telecommunications facility” shall mean a commercial facility that is licensed by the FCC to transmit and/or receive electromagnetic or radio-frequency waves, including, but not limited to, towers, existing tower structures, monopoles, utility poles, alternative tower structures, co-locations, architecturally-integrated facilities, antennas, and distributed antenna systems. It includes all related equipment which is ancillary to the transmission and reception of a wireless telecommunications facility, including, but not limited to, coaxial cable, electrical and telco

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike-through~~ represents text to be eliminated

conduit and connectors, electrical meters, equipment cabinets, and equipment compounds and shelters. Amateur radio operators are not included in this definition.

C. Exclusions. The following activities shall be exempt from these regulations:

1. District Height Limitations. The requirements set forth in this Section shall govern the location of wireless telecommunications facilities that exceed and that are installed at a height in excess of the height limitations specified for each zoning district. The height limitations applicable to buildings and structures shall not apply to wireless telecommunications facilities.
2. Public Property. Wireless telecommunications facilities located on property owned, leased or otherwise controlled by the City or by any other government-operated public safety network shall be exempt from the requirements of this Section, provided a license or lease authorizing such facility has been approved by the City.
3. Amateur Radio: Receive-Only Antennas. This Section shall not govern any tower, or the installation of any antenna, that is less than ten (10) feet in height above the district height limit and is owned and operated by a federally-licensed amateur ("ham") radio station operator or is used exclusively for receive-only antennas.
4. Pre-Existing Wireless Telecommunications Facility. Any wireless telecommunications facility for which a permit has been properly issued prior to the effective date of this Section shall not be required to meet the requirements of this Section, other than the requirements of Subsection F. Any such facilities shall be referred to in this Section as "pre-existing wireless telecommunications facilities." Any nonconforming facilities may continue to be operated, repaired, and maintained but shall not be enlarged, expanded, relocated, or modified in any material manner, as determined within the reasonable discretion of the Community Development Department.
5. Satellite Antenna. This Section shall not apply to any satellite antenna placed in residential zones that is one meter or less in diameter nor to any other satellite antenna located in any other zone that is two meters or less in diameter.
6. Exempted by State and/or Federal Regulations. The Community Development Department may grant an exception to any requirement of Section 4-1686 upon making findings that: (a) strict compliance precludes the reasonable accommodation of the communication needs of the operator as set forth in State and/or Federal rules and regulations; (b) there are no other feasible alternatives; and (c) either State or Federal rules and regulations requires the Department to issue the exception or that the exception will serve the public interest despite conflict with the mandatory standards herein.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike-through~~ represents text to be eliminated

- D. Restrictions. The following restrictions shall apply to wireless telecommunications facilities:
1. No new unscreened wireless telecommunications facility shall be permitted three hundred (300) feet or less away from any residential property line or residential zoning district boundary.
- E. General Guidelines and Requirements. All wireless telecommunications facilities must comply with the following except when impractical or technologically infeasible. The burden shall be on the applicant to provide evidence as part of the application showing why and how complying with these standards would be impractical or technologically infeasible.
1. Principal or Accessory Use. Wireless telecommunications facilities may be considered either principal or accessory uses. A different existing use or an existing structure on the same lot shall not preclude the installation of a wireless telecommunications facility on such lot. For purposes of determining whether the installation of a wireless telecommunications facility complies with zoning district development regulations, including, but not limited to, set-back requirements, lot-coverage requirements, and other such requirements, the dimensions of the entire lot shall control, even though the wireless telecommunications facility may be located on leased parcels within such lots.
 2. Co-Location. All new wireless telecommunications facilities shall co-locate with other existing or with planned new wireless telecommunications facilities whenever feasible and when doing so will minimize potential visual impacts. Co-locations shall be processed in accordance with the prevailing State and/or Federal rules and regulations.
- F. Specific Design Criteria. The following design standards shall govern the siting, design and location of all wireless telecommunications facilities; provided, however, that the Board of Zoning Adjustments may waive these requirements if it determines that the goals of this Section are better served thereby.
1. Freestanding Towers and Ground-Mounted Facilities.
 - a. Freestanding towers and ground-mounted wireless telecommunications facilities shall either maintain a galvanized steel finish or be painted a neutral color, as determined by the City, so as to reduce visual impacts and blend into the landscape or visual backdrop against which they will be seen to the greatest extent possible, unless otherwise required by the FAA.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

- b. Freestanding and ground-mounted wireless telecommunications facilities shall incorporate camouflaging techniques, such as alternative tower structures, wherever feasible and shall be located in areas where existing topography, vegetation, buildings or other structures provide the greatest amount of screening to minimize visual impacts.
 - c. Alternative tower structures, such as treepoles shall incorporate enough architectural branches (including density, needle count and vertical height), three (3) dimensional bark cladding, and other design materials or appropriate techniques to cause the structure to appear as a natural element of the environment. Treepoles shall be integrated into the surrounding environment through the planting of trees and/or shrubs distributed around the entire facility to appear as a naturally occurring or integrated landscape element.
 - d. Alternative tower structures, such as flag poles shall be tapered to maintain the appearance of an actual flag pole. A flag shall be flown from the wireless facility and properly lighted and maintained at all times, in accordance with the U.S. Flag Code.
 - e. Freestanding towers and ground-mounted facility sites shall incorporate ancillary buildings and equipment, such as equipment shelters that, to the extent possible, use materials, colors, textures, screening, and landscaping that will blend the facilities to the natural setting and built environment.
 - f. Freestanding towers and ground-mounted facilities shall not be artificially lighted, unless required by the FAA or other applicable authority or unless they contain a U.S. Flag. If lighting is required, the Zoning Enforcement Official may review the available lighting alternatives and approve the design that would cause the least disturbance to the surrounding views. Any exterior lighting shall be manually operated or on an automatic timer and used only during night, during periods of maintenance or during an emergency situation, unless otherwise required by applicable Federal law. Lighting shall be shielded or directed to minimize glare as viewed from off-site locations.
 - g. Freestanding towers and alternative tower structures shall incorporate coaxial cable and electrical and telco conduits inside the pole structure and underground, whenever feasible.
2. Building-Mounted Facilities.
- a. Building-mounted wireless telecommunications facilities shall be architecturally-integrated into the building design and otherwise made as unobtrusive as possible, whenever feasible. Antennas shall be located entirely within an existing or newly created architectural feature so as to be completely screened

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

from view. Where feasible, antennas can be placed directly above, below or incorporated with the vertical design elements of a building and painted to match the background color of the building to help in camouflaging the facility. (See Subsection B.3 “Architecturally-Integrated.”)

- b. Building-mounted designs shall ensure that the antenna(s) and ancillary equipment, such as cable trays and coaxial cables and electrical and telco conduits are located within existing building walls, whenever feasible, or inside cable trays painted a color that is identical to, or closely compatible with, the background color of the supporting building or structure so as to make them as visually unobtrusive as possible. All ancillary equipment shall be sited and designed to appear as an integral part of the building or structure. (See Subsection B.3 “Architecturally-Integrated.”)
- c. Building-mounted and roof-mounted wireless telecommunications facilities, including any screening devices, may not exceed a height of fifteen (15) feet above the roof or parapet, whichever is higher, of the building on which it is mounted unless approved through a Conditional Use Permit.
- d. Building-mounted and roof-mounted wireless telecommunications facilities located on the façade of the building parapet or rooftop penthouse shall be painted and/or textured to match the background color of the existing structure. Façade-mounted or flush-mounted wireless telecommunications facilities shall not extend more than twenty-four (24) inches out from the building face. If a building-mounted wireless telecommunications facility is mounted flush against a building wall, the color and material of the antenna and other equipment shall match the exterior of the building. If there is a discernible gap between the antenna and the façade, the antenna shall be screened so as to hide the gap.
- e. Roof-mounted antennas and associated equipment shall maintain a 1:1 ratio (i.e., a ten (10) foot high antenna requires a ten (10) foot setback from façade; a six (6) foot high cabinet requires a six (6) foot setback from façade) and shall be located as far back from the edge of the roof as is technically feasible in order to minimize visibility from residences, public rights-of-way and significant view corridors. Where appropriate, construction of a rooftop parapet or wall to hide the antenna or equipment may be required to minimize visual impacts. Roof-mounted facilities shall also be screened from above, if visible from adjacent properties.
- f. Building-mounted facilities and support structures may not be illuminated unless specifically required by the FAA or other governmental agencies.

3. Equipment.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike-through~~ represents text to be eliminated

- a. The ancillary equipment, associated with the base station, such as equipment cabinets, shelters and compounds, for all wireless telecommunications facilities shall use materials, colors and textures, screening, and landscaping that will blend the equipment into the natural setting and built environment as much as possible.
 - b. Related equipment for co-located wireless telecommunications facilities shall be located within an existing equipment enclosure or compound, whenever feasible, or located as close to the existing equipment enclosure or compound as possible and shall match the materials, color, and texture of the existing enclosure as much as possible.
4. Noise. Wireless telecommunications facilities operating in excess of the maximum sound levels permitted by the City's Noise Ordinance shall be enclosed to achieve compliance with the Noise Ordinance. Back-up generators or similar equipment that operates only during power outages or other emergencies are exempt from this requirement. Testing of such back-up generators or similar equipment may only occur during standard daytime hours.
5. Dimensions. Wireless telecommunications facilities shall be no greater in diameter or any other cross-sectional dimension than is reasonably necessary for the proper functioning and physical support of the facility and future co-location of additional wireless telecommunications facilities.
6. Security Fencing. Freestanding wireless telecommunications facilities and alternative tower structures shall be enclosed by security fencing not less than six (6) feet in height. Such facilities shall also be equipped with an appropriate anti-climbing device, provided however, that the Zoning Enforcement Official may waive such requirements, as appropriate. Chain-link fencing material is only permitted in association with a wireless telecommunications facility in an industrial zone where the fence is not visible from the public right-of-way or adjacent non-industrial zone. Preferred fencing materials shall consist of wood, tubular steel or other architecturally-appropriate fencing material.
7. Landscaping. Facilities shall be landscaped with a buffer of plant materials that effectively screens the view of the facility from adjacent off-site properties. Wireless telecommunications facilities adjacent to residential uses shall incorporate landscaping that will maximize screening of the site from those residences. The standard buffer shall consist of a landscaped strip at least five (5) feet wide outside the perimeter of the facility to provide a visual buffer of any ground-mounted ancillary equipment. These requirements may be waived by the Zoning Enforcement Official if the goals of this Section would be better served thereby. Consideration shall also be given to the fact that vegetation can impede radio-frequency signals.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike-through~~ represents text to be eliminated

8. Signage. All wireless telecommunications facilities shall post a sign in a readily visible location identifying the name and phone number of a party to contact in the event of an emergency. No signs, flags, banners, or any form of advertising shall be attached to a wireless telecommunications facility except for government-required certifications, warnings, or other required seals or signs.
9. Federal and State Requirements. All wireless telecommunications facilities must meet or exceed current standards and regulations of the FAA, the FCC, the California Public Utilities Commission and any other agency of the Federal or State government with the authority to regulate wireless telecommunications facilities. If such standards and regulations are changed, then the owners of the wireless telecommunications facilities governed by this Section shall bring such wireless telecommunications facilities into compliance with such revised standards and regulations within six (6) months of the effective date of such standards and regulations, unless a more stringent compliance schedule is mandated by the controlling Federal or State agency. Failure to bring wireless telecommunications facilities into compliance with such revised standards and regulations shall constitute grounds for the removal of the wireless telecommunications facilities at the owner's expense.

ditional Use Permit.

* Co-locations that meet the standards set forth by Section 6409(a) of the Middle Class Tax Relief and Job Creation Act may submit
an eligible facilities request to Community Development.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike-through~~ represents text to be eliminated

- G. Permitted Uses. The wireless telecommunications facilities listed as “P” in Table 1 are deemed to be permitted uses in certain zoning districts, such as the CC, CS, CR, C-RM, IL, IL(AU), IG, IG(AU), IP, and IP(AU) Districts. These permitted wireless telecommunications facilities are to be architecturally-integrated or co-located on an existing tower or other support structure. Permitted uses shall not require discretionary review unless the applicant seeks a modification of the basic development standards set forth herein. Permitted uses shall comply with the general requirements of Subsection F, “Specific Design Criteria” as well as building permit requirements.
- H. Administrative Review Applications. The wireless telecommunications facilities listed as “AR” in Table 1 are deemed to be allowable uses with an Administrative Review approval in certain zoning districts. New monopoles and towers are allowable uses in the IL, IG, IP, IT, IL(AU), IG(AU), and IP(AU) Districts with an Administrative Review approval. Architecturally-integrated facilities are allowed in the RO, RS, RD, RM, CN, P, ~~PHD~~, NA-1, NA-2, SA-1, SA-2, SA-3, DA-1, DA-2, DA-3, DA-4, ~~DA-5~~, DA-6, OS and PS Districts. Co-locations not otherwise governed by Section 6409(a) of the Middle Class Tax Relief and Job Creation Act of 2012 are allowed in the RO, RS, RD, RM, CN, P, ~~PHD~~, NA-1, NA-2, SA-1, SA-2, SA-3, DA-1, DA-2, DA-3, DA-4, ~~DA-5~~, DA-6, OS and PS Districts. Administrative Review applications shall be reviewed and approved by the Zoning Enforcement Official, unless the Zoning Enforcement Official defers action to the Board of Zoning Adjustments. Administrative Review approvals shall comply with the general requirements of Subsection F, “Specific Design Criteria” as well as building permit requirements.
1. The Planning Division shall respond to each Administrative Review application within thirty (30) days after deeming the application complete by either approving or denying the application. If the Planning Division fails to notify the applicant in writing within thirty (30) days of application submittal, then the application shall be deemed to be approved.
 2. If an Administrative Review application is denied by the Zoning Enforcement Official, the applicant may appeal said denial to the Board of Zoning Adjustments.
 3. A decision by the Board of Zoning Adjustments may be appealed to the City Council pursuant to the requirements of Article 28 of the Zoning Code.
- I. Conditional Use Permit Applications. The wireless telecommunications facilities listed as “CUP” in Table 1 are deemed to be allowed by a Conditional Use Permit approval in certain zoning districts. New monopoles and towers are allowed with a Conditional Use Permit in the CN, CC, CS, CR, C-RM, P, ~~PHD~~, NA-1, NA-2, SA-1, SA-3, DA-1, DA-2, OS and PS Districts. Conditional Use Permits shall be reviewed and approved by the Board of Zoning Adjustments. Conditional Uses shall comply with the general requirements of Subsection F, “Specific Design Criteria, Subsections J.10 to J.12” as well as building permit requirements.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike-through~~ represents text to be eliminated

1. The Planning Division shall respond to each Conditional Use Permit application in writing within thirty (30) days after deeming the application complete. If the Planning Division fails to respond to the applicant within thirty (30) days, then the application shall be deemed to be approved.
 2. If a Conditional Use Permit application is denied by the Board of Zoning Adjustments, it may be appealed to the City Council.
- J. Application Requirements. Each applicant requesting an Administrative Review under this Ordinance shall submit the following:
1. A scaled site plan and a scaled elevation view and other supporting drawings, calculations, and other documentation by appropriate licensed professionals, showing the location and dimensions of all improvements, including information concerning topography, tower dimensions of antennas, ancillary equipment and antenna support structures, setbacks, ingress and egress, parking, fencing, landscaping, adjacent uses, and other information deemed by the Planning Division or Board of Zoning Adjustments to be necessary to assess compliance with this Section.
 2. A completed planning application.
 3. A signed letter of authorization from the underlying property owner.
 4. Photo-simulations of the proposed facility that identifies potential visual impacts. Consideration should be given to views from nearby residential areas, public rights-of-way, parks and open space, and other public viewshed areas.
 5. Manufacturer's specification sheets for the proposed antennas and ancillary equipment.
 6. Photographs of the existing site conditions, as well as the surrounding land uses.
 7. A copy of the carrier's current FCC license.
 8. A stamped and signed radio-frequency report prepared by a qualified engineer.
 9. A written description of the proposed project, including a description of the type of proposed installation and the location and dimensions of the proposed antennas, antenna support structures, and all ancillary equipment.
 10. For treepoles, provide bark cladding and branch with leaf/needle samples for review and selection.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

In addition to the requirements listed above, each applicant submitting a Conditional Use Permit application under this Ordinance shall submit the following additional application materials:

11. A five (5) year master plan, drawn to a reasonable scale, for all of the applicant's existing, planned or reasonably anticipated wireless telecommunications facility locations within the jurisdiction of the City or within one-quarter mile of the border thereof, indicating the service area covered by each such facility and including specific information about the location, height, and design of each facility.
12. An alternatives analysis that demonstrates what other sites were considered by the carrier within the coverage area.
13. Radio-Frequency Emissions. Within thirty (30) calendar days of activation of the facility, the applicant shall submit a Radio-Frequency Compliance Report demonstrating that the facility meets the FCC standards for radio-frequency emissions. This report is required in order to verify compliance with prevailing standards for public exposure and will be prepared by a qualified engineer. Such documentation shall include the following:
 - a. The make and model (or other identifying information) of the equipment tested;
 - b. The date and time of the inspection and the methodology used to make the determination;
 - c. The name and title of the person(s) conducting the tests, and a certification that the unit is properly installed and working within applicable FCC standards;
 - d. Documentation indicating that cumulative levels of radio-frequency emissions from the wireless telecommunications facility and all co-located wireless telecommunications facilities are in compliance with FCC standards, including, but not limited to, FCC Office of Engineering Technology Bulletin 65, Evaluating Compliance with FCC Guidelines for Human Exposure to Radio-frequency Electromagnetic Fields, as amended;
 - e. If the documentation demonstrates that the cumulative levels of radio-frequency emissions exceed or may exceed FCC standards, the Zoning Enforcement Official may require the applicant to modify the location or design of the wireless telecommunications facility and/or implement other mitigation measures to ensure compliance with FCC standards. The Zoning Enforcement Official may require additional independent technical evaluation of the

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

wireless telecommunications facility, at the applicant's sole expense, to ensure compliance with FCC standards.

K. Factors Considered in Evaluating Applications. The City shall consider the following factors in determining whether to approve an application although the City may waive or reduce the burden on the applicant of one or more of these criteria if the City concludes that the goals of this Ordinance are better served thereby, or if the submittal is eligible under Section 6409(a) of the Middle Class Tax Relief and Job Creation Act of 2012.

1. Height of the proposed wireless telecommunications facility.
2. Proximity of the facility to residential structures, residential property lines, residential district boundaries, and elementary schools.
3. Visual and other potential impacts to surrounding land uses.
4. Surrounding topography.
5. Surrounding tree coverage and foliage.
6. Design of the facility with particular reference to design characteristics that have the effect of reducing or eliminating visual impacts.
7. Existing and proposed parking, as well as site ingress and egress.
8. Availability of suitable existing towers, buildings and structures that would provide site sharing and co-location opportunities in the project vicinity.

L. Availability of Suitable Co-Locations. No new monopole or tower shall be permitted unless the applicant demonstrates to the reasonable satisfaction of the City that no existing or planned tower, alternative tower structure, building or structure can accommodate the applicant's proposed antenna(s). Evidence submitted to demonstrate that no existing tower, alternative tower structure, building, or structure can accommodate the applicant's proposed antenna shall include, but not be limited to, the following:

1. No existing towers, alternative tower support structures, building-mounted or roof-mounted, or architecturally-integrated wireless telecommunications facilities or structures are located within the geographic area required to meet applicant's coverage objectives.
2. Existing wireless telecommunications facilities are not of sufficient height to meet applicant's coverage objectives.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

3. Existing wireless telecommunications facilities do not have sufficient structural strength to support applicant's proposed antenna(s) and related equipment. The City may, at its discretion, require the applicant to submit a structural report prepared by a qualified engineer as verification.
 4. The applicant's proposed wireless telecommunications facility would cause radio-frequency interference with an existing facility, or the existing facility would cause interference with the applicant's proposed wireless telecommunications facility.
 5. The applicant demonstrates that there are other limiting factors that render existing wireless telecommunications facilities unsuitable.
- M. Discontinued Facilities and Removal of Abandoned Antennas and Towers. Any wireless telecommunications facility that is not operated for a continuous period of twelve (12) months shall be considered abandoned, and the owner of such facility shall remove same, and restore the site to its pre-installation condition, within ninety (90) days of receipt of notice from the Community Development Department Director notifying the owner of such abandonment. The notice shall specify that the owner has the opportunity to request a public hearing on the removal of the facility. If such facility is not removed within said ninety (90) days, the Community Development Director may remove such facility at the owner's expense. If there are two (2) or more users of a single facility, then this provision shall not become effective until all users cease using the facility.

Any wireless telecommunications facility shall be removed within thirty (30) calendar days of the discontinuation of the use and shall be restored to its previous condition. The service provider shall provide the Community Development Department with a notice of intent to vacate the site a minimum of thirty (30) calendar days prior to vacation and shall obtain building permits prior to removal of equipment. For facilities located on City property, this requirement shall be included in the terms of the lease. For facilities located on other sites, the property owner shall be responsible for removal of all antennas, structures and related equipment within thirty (30) calendar days of the discontinuation of use. (Ord. 2015-11 § 4; Ord. 2014-011 § 2; Ord. 2001-015 § 1)

4-1688 Cottage Food Operations

Cottage food operations are subject to the following regulations:

- A. Permitted Location. Cottage food operations shall be permitted in any dwelling in the City.
- B. Required Permits. Any dwelling can be used for a cottage food operation when the Zoning Enforcement Official has granted a cottage food operation permit.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

C. Cottage Food Operation Permit—Compliance with Standards. The Zoning Enforcement Official shall grant a permit for the cottage food operation only if after review of the application for such permit, inspection of the premises and any other necessary information, the Zoning Enforcement Official determines that the application complies with the following standards:

1. Spacing. No cottage food operation shall be located within one hundred fifty (150) feet of any other cottage food operation, as measured from the exterior lot lines along the property frontages.
2. On-Street Parking. No cottage food operation shall be located upon a lot having less than thirty-two (32) feet of legally permitted parking along the frontage of the lot.
3. Employee Parking and Customer Parking Circulation Plan. The driveway of a cottage food operation may be used to provide off-street parking required by Article 17 if such use will not obstruct a sidewalk or other public right-of-way.

The applicant shall provide the Zoning Enforcement Official with a written plan for the administration of parking and traffic operations related to the proposed cottage food operation. This plan shall include controls for vehicle circulation, drop-off and pick-up of cottage food related products and parking for the employee so that parking, loading, unloading and turning movements are compatible with the residential environment in which the cottage food operation will be located.

4. Noise Control. The level of noise in connection with the operation of a cottage food operation shall not be persistently maintained at a level of fifty-five (55) decibels or greater, as measured from any point along or beyond the property line of the subject premises.
5. Traffic. A cottage food operation shall not create pedestrian, automobile, or truck traffic detrimental to property in the vicinity. All deliveries of materials related to a cottage food operation shall be by the U.S. Postal Service or similar carrier, or by means of vehicles customarily kept on the site by the permit holder or family members in trucks or vans of three-quarter-ton or less in size.
6. Parking. A cottage food operation shall not result in a reduction or elimination of any required parking space. One off-street parking space shall be provided for employees, per Article 17, Section 4-1704. Said employee parking may be uncovered and located in a driveway.

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

7. Vehicles. Any vehicle or vehicles used by the applicant in conjunction with the cottage food operation or with any related business activity shall be parked in a manner so as not to be visible from a public street. This limitation shall not apply to standard passenger vehicles or trucks and vans of three-quarter-ton or less in size.
 8. Required State Permits or Licenses. No permit issued pursuant to this section shall become operative until copies of the Alameda County application/permitting form and City business license have been filed with the Zoning Enforcement Official.
 9. Nontransferable. A permit issued pursuant to this section shall be nontransferable and shall not run with the land.
- D. Notwithstanding the above, standards C.1 and C.2 will not apply to a cottage food operation where the permit applicant declares on the application form that the cottage food operation will not be making any customer sales directly from the dwelling or property.
- Notwithstanding the above, standards C.1 and C.2 will not apply to a cottage food operation that operates in a location where there are two or more on-site, off-street, dedicated parking spaces for guests.
- E. Administrative Exception Provision. The Zoning Enforcement Official may approve an Administrative Exception, per Section 2-574, if an applicant cannot meet the provisions of Section 4-1688 C.1 through 7.
- F. Appeals. In accord with Article 22, "Use Permits, Variances, and Parking Exceptions," decisions of the Zoning Enforcement Official may be appealed to the Board of Zoning Adjustments by the applicant or by any interested party. (Ord. 2013-006 § 3)

4-1690 Community Gardens

- A. Intent. The purpose of this Section is to establish uniform standards, land-use regulations and a permit process for controlling the location, design, and maintenance of Community Gardens.
- B. Site Criteria and Permitting Requirements. The following siting criteria has been established for use by community garden project proponents in locating and designing suitable garden sites. The purpose of the criteria is to reduce public health and reduction of potential nuisance issues. Community gardens are subject to the following regulations, and the following physical and operational standards shall apply:
1. Compost areas shall be set back at least ten (10) feet from property line or fifteen (15) feet from dwelling unit, whichever is greater. Compost storage is limited to ten (10) percent of total site area and must not be visible from adjacent properties. All organic materials must be managed to avoid rodents, pests, odors and leachates;

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

2. If the community garden is enclosed by fencing, the fencing shall be wood fencing or ornamental fencing. If chain-link or woven wire fencing is proposed, over half of the fence area that borders a public right-of-way shall be covered by plant material or other vegetative screening within three (3) years of the fence installation. All fencing shall comply with height and setback requirements in Section 4-1682;
 3. Use of mechanized farm equipment is generally prohibited; provided, however, that during the initial site preparation of the land heavy equipment may be used. Landscaping equipment designed for household use shall be permitted;
 4. All farm equipment shall be enclosed or otherwise screened from sight. Chemicals and fuels shall be locked in a structure when site is unattended;
 5. Site drainage must be managed to comply with Alameda County Stormwater Permit regulations;
 6. Commercial deliveries and pickups are limited to one (1) time per day;
 7. Row crops that reach thirty-six (36) inches in height, except for trees, are not permitted in required front and corner side yards;
 8. Trash receptacles must be provided and screened on at least three (3) sides from public view;
 9. Structures shall not exceed five hundred (500) square feet in floor area and are limited to twelve (12) feet in height;
 10. All lighting shall be shielded to avoid glare and off-site impacts; and
 11. A community garden manager must be identified for each site and contact information for said manager shall be provided on a posted sign. Said signage shall be limited to two (2) square feet in area.
- C. Application Requirements. Administrative Review approval is required for all community gardens in accordance with Article 21. The information listed below is required at the time an application for an Administrative Review is submitted:
1. A scaled, fully-dimensioned site plan showing physical dimension of property and structures, distance from the project property lines to the nearest residential structure, existing and proposed utilities that service the proposed community garden, and proposed areas of compost, planting and storage;

Exhibit D: Article 16

Note: underlined and bolded text represents new text; ~~strike through~~ represents text to be eliminated

2. Identification of community garden manager and description of management plans, responsible parties, and proposed contact information signage;
3. Description of proposed farm equipment and time periods for their use;
4. Statement of intent to spray or use chemicals;
5. Sediment and erosion control plan; and
6. Other information as required by the Zoning Enforcement Official. (Ord. 2014-011 § 2)
