**Accelerating Wireless Broadband Deployment by Removing Barriers to Infrastructure Investment;
Accelerating Wireline Broadband Deployment by Removing Barriers to Infrastructure Investment**

Declaratory Ruling and Third Report and Order
WT Docket No. 17-79; WC Docket No. 17-84

Background: To meet rapidly increasing demand for wireless services and prepare our national infrastructure for 5G, providers must deploy infrastructure at significantly more locations using new, small cell facilities. Building upon streamlining actions already taken by state and local governments, this *Declaratory Ruling and Third Report and Order* is part of a national strategy to promote the timely buildout of this new infrastructure across the country by eliminating regulatory impediments that unnecessarily add delays and costs to bringing advanced wireless services to the public.

What the Declaratory Ruling and Third Report and Order Would Do:

- Clarify the scope and meaning of the effective prohibition standard set forth in Sections 253 and 332(c)(7) of the Communications Act as they apply to state and local regulation of wireless infrastructure deployment.
- Conclude that Sections 253 and 332(c)(7) limit state and local governments to charging fees that are no greater than a reasonable approximation of their costs for processing applications and for managing deployments in the rights-of-way.
- Identify specific fee levels for small wireless facility deployments that presumably comply with the relevant standard.
- Provide guidance on certain state and local non-fee requirements, including aesthetic and undergrounding requirements.
- Establish two new shot clocks for small wireless facilities (60 days for collocation on preexisting structures and 90 days for new builds) and codify the existing 90 and 150 day shot clocks for non-small wireless facility deployments that were established in the *2009 Declaratory Ruling*.
- Make clear that all state and local government authorizations necessary for the deployment of personal wireless service infrastructure are subject to those shot clocks.
- Conclude that a failure to act within the new small wireless facility shot clock constitutes a presumptive prohibition on the provision of services. Accordingly, we would expect local governments to provide all required authorizations without further delay.

¹ This document is being released as part of a “permit-but-disclose” proceeding. Any presentations or views on the subject expressed to the Commission or its staff, including by email, must be filed in WT Docket No. 17-79 and WC Docket No. 17-84, which may be accessed via the Electronic Comment Filing System (<https://www.fcc.gov/ecfs/>). Before filing, participants should familiarize themselves with the Commission’s ex parte rules, including the general prohibition on presentations (written and oral) on matters listed on the Sunshine Agenda, which is typically released a week prior to the Commission’s meeting. See 47 CFR § 1.1200 *et seq.*
