Crosstown Class IV Corridor Study Updates

SUMMARY AND RECOMMENDATIONS

The Crosstown Class IV Corridors study project was identified as a high priority in the 2018 Update of the Bicycle and Pedestrian Master Plan (BPMP) based on a robust public planning process, review of existing data, and on the ground conditions. The Crosstown Class IV Corridors Study seeks to review and identify how to improve safety, access, and mobility for all roadway users along Bancroft Avenue and Williams Street. The proposed project will develop a community-based Class IV Corridor Study for these two major roadways and by doing so, will help transition San Leandro's transportation network into a safer and more accessible system for all users.

City staff and the consultant team will provide a status update on the community outreach and existing conditions phase of the study.
